II. PROSPECTS FOR PROFIT AND LOSS

This Product falls within the category "Yield Enhancement" which means that there is an upper limit to the profit an Investor can realize with this Product. At redemption the Investor could receive a maximum amount corresponding to the invested capital (excluding any transaction or other costs) plus any additional (guaranteed and/or conditional) payments such as coupon or participation payments, bonuses or others.

On the downside, especially if the Product has forfeited any contingent capital protection (like e.g. a barrier, strike), the Investor is exposed to the development of the Underlying(s). This might (even if a stop loss event has occurred) lead to a partial or even a total loss of the investment.

Please refer to the sections "Product Description" and "Redemption" for more detailed information on the characteristics of this Product.

III. SIGNIFICANT RISKS

RISK FACTORS RELATING TO THE PRODUCT

The risk of loss related to this Product is similar to an investment in the worst performing Underlying. Therefore, the Investor could lose the total capital invested if the Barrier Event has occurred and if the value of the Underlying with the Worst Performance falls to zero.

ADDITIONAL RISK FACTORS

Prospective Investors should ensure that they understand the nature of this Product and the extent of their exposure to risks and they should consider the suitability of this Product as an investment in the light of their own circumstances and financial condition. Products involve a high degree of risk, including the potential risk of expiring worthless. Potential Investors should be prepared to sustain a total loss of the capital invested to purchase this Product. Prospective Investors shall consider the following important risk factors and also see the information on risks contained in the Product Documentation.

This is a structured product involving derivative components. Investors should make sure that their advisors have verified that this Product is suitable for the portfolio of the investor taking into account the investor's financial situation, investment experience and investment objectives.

The terms and conditions of the Product may be subject to adjustments during the lifetime of the Product as set out in the respective Final Terms.

Investors whose usual currency is not the currency in which the Product is redeemed should be aware of their possible currency risk.

The value of the Product may not correlate with the value of the Underlying(s).

Market Risks

The general market performance of securities is dependent, in particular, on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Products.

No dividend payment

This Product does not confer any claim to receive rights and/or payments of the underlying, such as dividend payments, unless explicitly stated herein, and therefore, without prejudice to any coupon or dividend payments provided for in this Termsheet, does not yield any current income. This means that potential losses in value of the Product cannot be compensated by other income.

Credit Risk of Issuing Parties

Investors bear the credit risk of the Issuing Parties of the Product. The Products constitute unsubordinated and unsecured obligations of the relevant Issuing Party and rank pari passu with each and all other current and future unsubordinated and unsecured obligations of the relevant Issuing Party. The insolvency of an Issuing Party may lead to a partial or total loss of the invested capital.

Secondary Market

The Issuer and/or the Lead Manager or any third party appointed by the Issuer, as applicable, will, under normal market conditions, provide bid and offer prices for the Products on a regular basis. In special market situations, where the Issuer and/or the Lead Manager is/are unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks of the Issuer and/or the Lead Manager.

Illiquidity Risk

One or, if applicable, more of the Underlyings might be or become illiquid over the life time of the Product. Illiquidity of an Underlying might lead to larger bid/offer spreads of the Product and/or to an extended time period for buying and/or selling the Underlying respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/or a modified redemption amount, as reasonably determined by the Calculation Agent.
