INTRODUCTORY COVER NOTE

What is this document?

This document (the "**Base Prospectus**") constitutes a base prospectus for the purposes of Article 8 of the Prospectus Regulation in respect of all Products, other than Exempt Products (as described below). This Base Prospectus is valid for 12 months after its approval and will expire on 24 June 2021.

This Base Prospectus may be supplemented from time to time to reflect any significant new factor, material mistake or inaccuracy relating to the information included in it. The obligation to supplement a prospectus in the event of any significant new factor, material mistake or material inaccuracy relating to the information included in it does not apply when such prospectus is no longer valid. Each supplement will be available for viewing on the website of the Luxembourg Stock Exchange at www.bourse.lu.

This Base Prospectus supersedes and replaces in its entirety the Base Prospectus dated 18 June 2019, which expires on 25 June 2020, in respect of the Programme (as described below). This does not affect any Securities issued prior to the date of this Base Prospectus.

When used in this document, "**Prospectus Regulation**" means Regulation (EU) 2017/1129. References in this Base Prospectus to "**Exempt Products**" are to Products for which no prospectus is required to be published, in the EEA or the United Kingdom, under the Prospectus Regulation (or in respect of which a separate prospectus will be published under the Prospectus Regulation).

Approval of the Base Prospectus

This Base Prospectus has been approved by the *Commission de Surveillance du Secteur Financier* (the "**CSSF**"), which is the competent authority for the purpose of the Prospectus Regulation, for the purpose of giving information with regard to the issue of Products (excluding Exempt Products) by Leonteq Securities AG which may also be acting through its Guernsey branch (Leonteq Securities AG, Guernsey Branch) or its Amsterdam branch (Leonteq Securities AG, Amsterdam Branch) (the "**Issuer**") under the Programme during the period of 12 months from the date of this Base Prospectus. The CSSF has only approved this Base Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Pursuant to article 6(4) of the Luxembourg Law dated 16 July 2019 on prospectuses for securities (the "**Luxembourg Prospectus Law**"), by approving this Base Prospectus, the CSSF gives no undertaking as to, and assumes no responsibility for, the economic and financial characteristics of the Products to be issued hereunder or the quality and solvency of the Issuer. Such approval should not be considered as an endorsement of the quality of the Products that are the subject of this Base Prospectus. Investors should make their own assessment as to the suitability of investing in the Products.

The CSSF has neither approved nor reviewed the Form of Pricing Supplement or the information contained therein nor reviewed any information in relation to an admission to trading on SIX Swiss Exchange and offers to the public in Switzerland. In addition, the CSSF has neither approved nor reviewed any information in relation to the Exempt Products.

This Base Prospectus has also been approved by the Luxembourg Stock Exchange for the purpose of giving information with regard to the issue of Exempt Products only by the Issuer under the Programme during the period of 12 months from the date of this Base Prospectus.

What type of products may be issued under this Base Prospectus?

The Issuer may from time to time issue securities in the form of Notes, Certificates or Warrants (all of which are referred to in this Base Prospectus as "**Products**") as part of the European Issuance and Offering Programme for the issuance of Notes, Certificates and Warrants (the "**Programme**") under this Base Prospectus. Products may (a) have any maturity, (b) be listed and traded on a regulated (or other) market, or not listed or traded, (c) be non-interest bearing or bear fixed or floating rate interest or other variable interest, (d) have interest and/or redemption amounts which are dependent on the performance of one or more underlying(s) (as described below), (e) be partially redeemed on partial redemption dates prior to the scheduled final redemption date, (f) be settled by way of cash payment or delivery of the underlying(s) and (g) provide that the scheduled amount payable could be as low as zero or else provide some level of minimum scheduled amount payable at maturity (subject to the credit risk of the Issuer). Products may or may not be subject to mandatory early redemption dependent on the performance of the

underlying(s) and/or have an option to allow early redemption at the discretion of the Issuer prior to scheduled maturity.

The Products are unsecured and unsubordinated general obligations of the Issuer, provided that the Issuer may issue Products with collateral security in the form of TCM Secured Products. The relevant Issue Terms (as described below) will indicate whether or not the Product is a TCM Secured Product.

What type of underlying(s) may determine the interest and/or redemption amount payable (or underlying(s) deliverable) under the Products?

The interest and repayment terms of Products issued under this Base Prospectus may be linked to the performance of one or more of the following types of Underlying(s): share, participation certificate, depositary receipt, index, commodity, currency exchange rate, futures contract, fixed rate instrument, derivative instrument, exchange traded fund share, fund unit, interest rate, reference rate or a basket containing some or all of such types of assets. Investors in Products will have no rights of ownership in the Underlying(s) in respect of such Product.

Who is the Issuer and where do I find information about them?

The Products will be issued by Leonteq Securities AG which may also be acting through its Guernsey branch ("**Leonteq Securities AG, Guernsey Branch**") or its Amsterdam branch ("**Leonteq Securities AG, Amsterdam Branch**") ("**Leonteq**" or the "**Issuer**"). The payment of any amount or delivery of any underlying(s) under the Products is subject to the financial position of the Issuer and the ability of the Issuer to meet its obligations at the relevant time. The Registration Document for the Issuer (as defined in the section of this Base Prospectus entitled '*Information Incorporated by Reference*') which is incorporated by reference into this Base Prospectus, together with other information provided in this Base Prospectus, provides a description of the business activities of the Issuer as well as certain financial information and material risks faced by the Issuer.

The Products (other than the TCM Secured Products) are unsecured and unsubordinated general obligations of the Issuer. The TCM Secured Products are general obligations of the Issuer that are collateralized in accordance with the TCM Security Agreement (as described in more detail below in the section of this Base Prospectus '*Description of TCM ("Triparty Collateral Management") Secured Products*').

How do I use this Base Prospectus?

This Base Prospectus (including the Registration Document and the other information which is incorporated by reference in this Base Prospectus) contains all information which is necessary to enable investors to make an informed decision regarding the financial position and prospects of the Issuer and the rights attaching to the Products. Some of this information is incorporated by reference from other publicly available documents and some of this information is completed in the Issue Terms (as described below). Investors should read each of these documents, before making any decision to invest in a Product.

What are Issue Terms?

"**Issue Terms**" means either (i) if the Products are not Exempt Products, the applicable Final Terms, or (ii) if the Products are Exempt Products, the applicable Pricing Supplement.

What are Final Terms?

The "**Final Terms**" will be prepared in relation to each issuance of Products (other than Exempt Products), and sets out the specific details of the Products. For example, the Final Terms will contain the issue date, the redemption date, the Underlying(s) to which the Products are linked (and the related Underlying Specific Conditions which apply to the Product) and specify the applicable Payout Conditions used to calculate the redemption amount and any interest payments (if applicable) of the Product. Final Terms will be prepared and deposited with the FinSA Prospectus Office in connection with each Swiss Public Offering/FMIA Admission to Trading (via FinSA Prospectus Recognition) (as described in "*Important Legal Information – Offer in Switzerland*" below).

In addition, an issue-specific summary will be annexed to the Final Terms for each issuance of Products (other than Exempt Products) where required under the Prospectus Regulation. Each issue-specific

summary will contain a summary of key information relating to the Issuer, the Products, the risks relating to the Issuer and the Products, and the offer of Products.

What is a Pricing Supplement?

A "**Pricing Supplement**" will be prepared in relation to each issuance of Exempt Products, and sets out the specific details of the Exempt Products. For example, the Pricing Supplement will contain the issue date, the redemption date, the Underlying(s) to which the Products are linked (and the related Underlying Specific Conditions which apply to the Product) and specify the applicable Payout Conditions used to calculate the redemption amount and any interest payments (if applicable) of the Exempt Product.

What are the risks in relation to the Products?

Investing in Products is subject to a number of risks, as described in the section of this Base Prospectus entitled '*Risk Factors*' below, including the section '*Risk Factors*' in the Registration Document incorporated by reference in this Base Prospectus. Products are speculative investments, and returns may at times be volatile and losses may occur quickly and in unanticipated magnitude. Depending on the particular Payout Conditions (as described in this Base Prospectus and as specified in the applicable Issue Terms) of the Product, investors may bear the risk of losing some or up to all of their investment depending on the performance of the Underlying(s) to which the Product is linked. For all Products, if the Issuer becomes insolvent or bankrupt or otherwise fail to make payment or delivery obligations on the Product, investors will lose some or all of their investment (save in respect of TCM Secured Products where investors will have a claim over certain collateral).

Investors should not acquire a Product unless they (whether on their own or in conjunction with a financial adviser) understand the nature of the Product and the extent of the exposure to potential loss on the Product, and any investment in a Product must be consistent with such investor's overall investment strategy. Investors (whether on their own or in conjunction with a financial adviser) should consider carefully whether the Product is suitable for them in the light of their investment objectives, financial capabilities and expertise. Investors should consult their own legal, tax, accountancy, regulatory, investment and other professional advisers as may be required to assist them in determining the suitability of the Product for them as an investment.

IMPORTANT LEGAL INFORMATION

THE AMOUNT PAYABLE OR UNDERLYING(S) DELIVERABLE ON REDEMPTION OF THE PRODUCTS MAY BE LESS THAN THE ORIGINAL INVESTED AMOUNT (AND IN SOME CASES MAY BE ZERO), IN WHICH CASE INVESTORS WILL LOSE SOME OR ALL OF THEIR INVESTMENT.

FOR ALL PRODUCTS, INVESTORS ARE SUBJECT TO THE CREDIT RISK OF THE ISSUER. FOR TCM SECURED PRODUCTS ONLY, INVESTORS WILL ALSO HAVE RECOURSE TO THE RELEVANT COLLATERAL. THE PRODUCTS (OTHER THAN THE TCM SECURED PRODUCTS) ARE UNSECURED OBLIGATIONS OF THE ISSUER. THE PRODUCTS ARE NOT BANK DEPOSITS AND ARE NEITHER INSURED NOR GUARANTEED BY ANY GOVERNMENTAL AGENCY OR DEPOSIT PROTECTION SCHEME IN SWITZERLAND OR IN ANY OTHER JURISDICTION. THEREFORE, IF THE ISSUER FAILS OR ARE OTHERWISE UNABLE TO MEET ITS PAYMENT OR DELIVERY OBLIGATIONS UNDER THE PRODUCTS (OTHER THAN THE TCM SECURED PRODUCTS), INVESTORS WILL LOSE SOME OR ALL OF THEIR INVESTMENT. IN RESPECT OF THE TCM SECURED PRODUCTS, IF THE COLLATERAL IS LIQUIDATED AND THE VALUE OF THE COLLATERAL IS LESS THAN THE VALUE OF THE TCM SECURED PRODUCT, INVESTORS MAY LOSE SOME OF THEIR INVESTMENT.

INVESTING IN PRODUCTS INVOLVES CERTAIN RISKS, AND INVESTORS SHOULD FULLY UNDERSTAND THESE BEFORE THEY INVEST. SEE THE SECTION HEADED '*RISK FACTORS*' BELOW.

EEA and UK Retail Investors

If the Issue Terms in respect of any Products includes a legend entitled 'Prohibition of Sales to EEA and UK Retail Investors', the Products are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**") or in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Products or otherwise making them available to retail investors in the EEA or the UK has been prepared and therefore offering or selling the Products or otherwise making them available to any retail investor in the EEA or the UK may be unlawful under the PRIIPs Regulation.

Offer in Switzerland

If and to the extent the Products will be publicly offered, directly or indirectly, in Switzerland within the meaning of the Financial Services Act of 15 June 2018 ("**FinSA**") or if the Products shall be admitted to trading on a Swiss trading venue pursuant to the Financial Market Infrastructure Act of 19 June 2015 ("**FMIA**"), e.g. on SIX Swiss Exchange, a prospectus in accordance with FinSA would be required as from 1 December 2020. Such requirement may be met on the basis of (i) an automatic recognition of this Base Prospectus in Switzerland under the rules of the FinSA by way of a notification of, and a registration of this Base Prospectus with, a Swiss prospectus office (a "**FinSA Prospectus Office**") pursuant to the rules of the FinSA, as implemented by the relevant FinSA Prospectus Office and (ii) depositing the relevant Final Terms with the FinSA Prospectus Office. Such a registration would be possible for a Base Prospectus that is approved by the CSSF, as competent authority under the Prospectus Regulation. Any such Swiss offering and/or listing and/or admission to trading described in this paragraph and in respect of which the FinSA prospectus requirement is intended to be satisfied in accordance with (i) and (ii) in this paragraph above, is referred to as a "**Swiss Public Offering/FMIA Admission to Trading (via FinSA Prospectus Recognition)**".

Except to the extent the Base Prospectus is registered with the FinSA Prospectus Office under the rules of the FinSA, neither this Base Prospectus nor any other offering or marketing material relating to the Products constitutes a prospectus pursuant to the FinSA, and neither this Base Prospectus nor any other offering or marketing material relating to the Products may be publicly distributed or otherwise made publicly available in Switzerland, unless the requirements of FinSA and Financial Services Ordinance of 6 November 2019 ("**FinSO**") for such public distribution are complied with.

None of the Products constitute a participation in a collective investment scheme within the meaning of the Collective Investment Schemes Act of 23 June 2006 ("**CISA**") and are neither subject to the authorisation nor the supervision by the Swiss Financial Market Supervisory Authority ("**FINMA**") and investors do not benefit from the specific investor protection provided under the CISA.

If and to the extent the Products will be offered, sold or advertised, directly or indirectly to retail clients (*Privatkundinnen und -kunden*) within the meaning of FinSA ("**Retail Clients**") a key investor document (*Basisinformationsblatt*) pursuant to Article 58 et seq. of FinSA relating to the Products (a "**FinSA-KID**") would need to be prepared, unless the Retail Clients shall receive a key information document pursuant to the PRIIPs Regulation instead of a FinSA-KID. Prior to 1 January 2022, the issuer may use a Swiss simplified prospectus in the sense of the CISA ("**Swiss Simplified Prospectus**") instead of a FinSA-KID or a key information document pursuant to the PRIIPs Regulation.

Benchmarks Regulation: Amounts payable under the Products or underlying(s) deliverable under the Products may be calculated or otherwise determined by reference to a reference rate, an index or a price source. Any such reference rate, index or price source may constitute a benchmark for the purposes of Regulation (EU) 2016/1011 (as amended, the "**Benchmarks Regulation**"). If any such reference rate, index or price source does constitute such a benchmark the relevant Issue Terms will indicate whether or not the benchmark is provided by an administrator included in the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to article 36 of the Benchmarks Regulation. Not every reference rate, index or price source will fall within the scope of the Benchmarks Regulation. The registration status of any administrator under the Benchmarks Regulation is a matter of public record and, save where required by applicable law, the Issuer does not intend to update the relevant Issue Terms to reflect any change in the registration status of the administrator.

No investment advice

Neither this Base Prospectus nor any Issue Terms is or purports to be investment advice. Unless expressly agreed otherwise with a particular investor, none of the Issuer or the Lead Manager is acting as an investment adviser, providing advice of any other nature, or assuming any fiduciary obligation to any investor in the Products.

Independent evaluation

Nothing in this Base Prospectus is intended to provide the basis of any credit or other evaluation (except in respect of any purchase of Products described herein) or should be considered as a recommendation by the Issuer or the Lead Manager that any recipient of this Base Prospectus (or any document referred to herein) should purchase any Products.

Investors should not purchase any Products unless they understand the extent of the exposure to potential loss. Investors are urged to read the factors described in the section of this Base Prospectus entitled '*Risk Factors*' below, together with the other information in this Base Prospectus (including any information incorporated by reference), as supplemented from time to time, and the Issue Terms, before investing in the Products.

Investors should note that (i) the risks described in the section in this Base Prospectus entitled '*Risk Factors*' below and (ii) the risks described in the section entitled '*Risk Factors*' of the Registration Document (which is incorporated by reference in this Base Prospectus) are not the only risks that the Issuer faces or that may arise because of the nature of the Products. The Issuer has described only those risks relating to its operations and to the Products that the Issuer considers to be material. There may be additional risks that the Issuer currently considers not to be material or of which it is not currently aware.

Given the nature, complexity and risks inherent in the Products (and investments relating to the type of Underlying(s)), the Products may not be suitable for an investor's investment objectives in the light of their financial circumstances. Investors should consider seeking independent advice to assist them in determining whether the Products are a suitable investment for them and to assist them in evaluating the information contained or incorporated by reference in this Base Prospectus or set out in the Issue Terms.

Investors have sole responsibility for the management of their tax and legal affairs including making any applicable filings and payments and complying with any applicable laws and regulations. None of the Issuer, the Lead Manager, any Agent or any of their respective affiliates will provide investors with tax or legal advice and investors should obtain their own independent tax and legal advice tailored to their individual circumstances. The tax treatment of securities, such as the Products, can be complex and the tax treatment applied to an individual depends on their circumstances. The level and basis of taxation may alter during the term of any Product.

Amounts due to be paid to investors are described on a gross basis, i.e., without calculating any tax liability. The Issuer shall make no deduction for any tax, duty, or other charge unless required by law.

Potential for Discretionary Determinations by the Calculation Agent under the Products

Under the terms and conditions of the Products, following the occurrence of certain events outside of the control of the Issuer, the Lead Manager, the Agents and their respective affiliates, the Calculation Agent may exercise discretion to take one or more of the actions available to it in order to deal with the impact of such event on the Products or (if applicable) the Issuer's hedging arrangements. Any such discretionary determinations could have a material adverse impact on the value of and return on the Products.

Distribution

The distribution or delivery of this Base Prospectus or any Issue Terms and any offer or sale of Products in certain jurisdictions may be restricted by law. This document does not constitute, and may not be used for the purposes of, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such offering or solicitation. Other than as expressly described in this Base Prospectus, no action is being taken to permit an offering of Products or the delivery of this Base Prospectus in any jurisdiction. Persons into whose possession this Base Prospectus or any Issue Terms comes are required by the Issuer to inform themselves about and to observe any such restrictions. Details of selling restrictions for various jurisdictions are set out in the section of this Base Prospectus '*Purchase and Sale*' below and may also be set out in the Issue Terms.

United States selling restrictions

The Products and in certain cases, the Entitlements have not been and will not be registered under the US Securities Act of 1933, as amended (the "**Securities Act**"), or with any securities regulatory authority of any state or other jurisdiction of the United States. Trading in the Products and the Entitlements has not been approved by the US Commodities Futures Trading Commission under the US Commodity Exchange Act of 1936 (the "**Commodity Exchange Act**") and the rules and regulations promulgated thereunder. The Products and in certain cases, the Entitlements, may not be offered and sold within the United States, or to or for the account or benefit of U.S. persons (as defined in Regulation S under the Securities Act ("**Regulation S**") ("**U.S. persons**"), except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws. The Products are being offered and sold outside the United States to non-U.S. persons in reliance on Regulation S.

Products in bearer form may be subject to US tax law requirements (as described below). Subject to certain exceptions, such Products may not be offered, sold or delivered within the United States or its possessions or to, or for the account or benefit of, United States persons (as defined in the US Internal Revenue Code of 1986, as amended, (the "**Code**") and the regulations thereunder).

For a description of these and certain further restrictions on offers, sales and transfers of Products and delivery of this Base Prospectus and any Issue Terms, see '*Purchase and Sale*' herein.

THE PRODUCTS HAVE NOT BEEN AND WILL NOT BE APPROVED OR DISAPPROVED BY THE US SECURITIES AND EXCHANGE COMMISSION, ANY STATE SECURITIES COMMISSION IN THE UNITED STATES OR ANY OTHER US REGULATORY AUTHORITY, NOR HAVE ANY OF THE FOREGOING AUTHORITIES PASSED UPON OR ENDORSED THE

MERITS OF THE OFFERING OF PRODUCTS OR THE ACCURACY OR THE ADEQUACY OF THE OFFERING DOCUMENTS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENCE IN THE UNITED STATES.

Guernsey Regulatory

Neither this Base Prospectus nor any Products offered pursuant to this Base Prospectus have been reviewed or approved by the Guernsey Financial Services Commission and neither the Guernsey Financial Services Commission nor does the States of Guernsey take any responsibility for the financial soundness of the Issuer or its securities, or for the correctness of any of the statements made or opinions expressed with regard to it.

If you are in any doubt about the contents of this Base Prospectus you should consult your accountant, legal or professional adviser or financial adviser.

The directors of the Issuer have taken all reasonable care to ensure that the facts stated in this document are true and accurate in all material respects, and that there are no other facts the omission of which would make misleading any statement in the document, whether of facts or of opinion. All of the directors accept responsibility accordingly.

It should be remembered that the price of products and the income from them can go down as well as up.

Change of circumstances

Neither the delivery of this Base Prospectus (including the Registration Document or any other information incorporated by reference in this Base Prospectus) or any Issue Terms, nor any sale of Products, shall create any impression that information in such documents relating to the Issuer is correct at any time subsequent to the date of the Base Prospectus and the Registration Document or that any other information supplied in connection with the Products or the Programme is correct as of any time subsequent to the date of the relevant document containing the same (the foregoing being without prejudice to the obligations of the Issuer under applicable rules and regulations).

Representations

In connection with the issue and sale of Products, no person has been authorised to give any information or to make any representation not contained in or consistent with the Base Prospectus and Issue Terms and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer. None of the Issuer, the Lead Manager, any Agent or any of their respective affiliates accepts any responsibility for any information not contained in this Base Prospectus and Issue Terms.

Calculations and determinations

All calculations and determinations in respect of the Products shall be made by the Calculation Agent. Unless otherwise specified in the Issue Terms for a particular Product, Leonteq Securities AG will act as the Calculation Agent for all Products (in such capacity, the "**Calculation Agent**"). All calculations and determinations made by the Calculation Agent in respect of the Products shall be final and binding on the Issuer and Investors in the absence of manifest error. No liability shall attach to the Calculation Agent for errors or omissions in respect of any calculation, determination or other exercise of discretion under the Conditions provided that, it has acted in accordance with General Condition 11.2 (*Determinations by the Calculation Agent*).

RISK FACTORS

An investment in Products involves substantial risks and is a riskier investment than an investment in ordinary debt securities. An investment in Products is not equivalent to investing directly in the Underlying(s).

The Issuer believes that the following risk factors are material for the purpose of making an informed investment decision associated with the Products.

Investors should consider the following risk factors and should make any investment decision only on the basis of the Base Prospectus as a whole including the documents incorporated by reference (including the Registration Document), any supplements to the Base Prospectus and the applicable Issue Terms.

Investors should not acquire Products without a thorough understanding of the mechanics of the relevant Products and without being aware of the potential risk of loss. Investors should carefully examine whether an investment in the Products is appropriate given their personal circumstances and financial situation and should consult a financial advisor to discuss any questions.

RISK WARNING

Investors may lose some or all of their investment in the Products where:

- **Minimum scheduled repayment amount less than invested amount:** The terms of the Product may not provide for scheduled minimum payment of the face value or issue price of the Products at maturity (or, if applicable, across the partial redemption dates and at maturity). Depending on the performance of the Underlying(s), investors may lose some or all of their investment.
- **Credit risk of the Issuer:** The payment of any amount or delivery of any underlying(s) due under the Products is dependent upon the Issuer's ability to fulfil its obligations when they fall due. For TCM Secured Products only, investors will also have recourse to the relevant collateral. The Products (other than the TCM Secured Products) are unsecured obligations of the issuer. The Products are not deposits and they are not protected under any deposit protection insurance scheme. Therefore, if the Issuer fails or are otherwise unable to meet its payment or delivery obligations under the Products (other than the TCM Secured Products), investors will lose some or all of their investment. In respect of the TCM Secured Products, if the collateral is liquidated and

the value of the collateral is less than the value of the TCM Secured Product, investors may lose some of their investment.

• **Other circumstances:**

- **The market price of the Products prior to maturity may be significantly lower than the purchase price investors paid for them. Consequently, if investors sell their Products before their scheduled maturity (assuming investors are able to), they may receive less (and potentially substantially less) than their investment.**
- **The Products may be redeemed in certain extraordinary circumstances prior to their scheduled maturity and, in such case, the early redemption amount paid to investors may be less than their investment.**
- **The terms and conditions of the Products may be adjusted by the Issuer and/or Calculation Agent in certain circumstances with the effect that the amount payable or underlying(s) deliverable to investors is less than their investment.**

1. ***Risk factors associated with the Issuer***

Investors bear the credit risk of the Issuer. The Products (other than the TCM Secured Products) are not secured nor guaranteed by any deposit protection fund, any government or any governmental agency

The Products (other than the TCM Secured Products) (the "**Unsecured Products**") issued by the Issuer (i) are unsecured and unsubordinated general obligations of the Issuer, and not of any of its affiliates, (ii) are not savings accounts or deposits of the Issuer and (iii) will rank *pari passu* among themselves and with all other unsecured and unsubordinated indebtedness of the Issuer, except obligations, that are subject to any priorities or preferences by law.

Therefore, if the Issuer fails or is otherwise unable to meet its payment or delivery obligations under the Unsecured Products, investors will lose some or all of their investment.

In the event of the insolvency of the Issuer, investors in the Unsecured Products may lose their claim to repayment of the capital invested by them in whole or in part.

In respect of TCM Secured Products, in the event that the collateral is liquidated and the value of the collateral is less than the value of the TCM Secured Product, investors will be exposed to the credit risk of the Issuer and may lose some of their investment.

None of the Products constitute a participation in a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes ("**CISA**") and are neither subject to the authorisation nor the supervision by the Swiss Financial Market Supervisory Authority ("**FINMA**") and investors do not benefit from the specific investor protection provided under the CISA.

Investors should read the section entitled '*Risk Factors*' in the Registration Document (which is incorporated by reference into this Base Prospectus).

2. ***Risk factors associated with the Products***

2.1 ***Risks associated with the liquidity and value of the Products and the possibility of adjustment or early termination***

- (a) ***The Products may not have an active trading market and an investor must be prepared to hold the Product until its scheduled maturity***

Investors must be prepared to hold the Products until their scheduled maturity.

The Products will have no established trading market when issued, and one may never develop. If a market does develop, it may not be very liquid and investors may not be able to find a buyer. Restrictions in respect of the purchase and/or sale of the Products in

some jurisdictions may also have an impact on the liquidity of the Products. As a result, investors may not be able to sell their Products or, if they can, they may only be able to sell them at a price which is substantially less than the original purchase price.

The Products may be listed on a stock exchange but, in such case, the fact that such Products are listed will not necessarily lead to greater liquidity. If the Products are not listed or traded on any exchange, pricing information for such Products may be more difficult to obtain and they may be more difficult to sell.

The specified size of the offer represents the maximum amount of the Products being offered but does not give any indication as to the volume of the Products being effectively issued. This volume is determined according to the market conditions and may change during the term of the Products, and a significant portion of the issuance of any Products may be held by the Issuer or Lead Manager. Therefore, investors should note that it is not possible to predict the liquidity of the Products in the secondary market based on the specified size of the offer. For these reasons as well, a secondary market for the Products may not develop.

The Issuer is under no obligation to make a market or to repurchase the Products (subject to the next paragraph). The Issuer and/or the Lead Manager may, but are not obliged to, at any time purchase Products at any price in the open market or by tender or private agreement. Any Products so purchased may be held or resold or surrendered for cancellation. If any Products are redeemed in part, then the number of Products outstanding may decrease. Any of these activities may have an adverse effect on the liquidity and/or price of the outstanding Products in the secondary market.

Any of the Issuer and/or the Lead Manager or other party may, as part of its activities as a broker and dealer in fixed income and equity securities and related products or pursuant to stock exchange listing requirements, make a secondary market in relation to any Products and may provide an indicative bid price on a daily basis. Any indicative prices so provided shall be determined by the relevant party in its sole discretion taking into account prevailing market conditions and shall not be a representation by such party that any Products can be purchased or sold at such prices (or at all).

However, any of these parties may suspend or terminate making a market and providing indicative prices without notice, at any time and for any reason. Consequently, there may be no market for the Products and investors should not assume that such a market will exist. Investors may therefore not be able to sell their Product during its term and must be prepared to hold the Product until its scheduled maturity.

Additionally, in special market situations, where the Issuer and/or the Lead Manager is/are unable to enter into hedging transactions or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded in order to limit the economic risks of the Issuer and/or the Lead Manager.

(b) ***Investors in listed Products or in Products linked to one or more listed Underlyings are exposed to the risk that the Product or Underlying(s) could be delisted or suspended from trading, and this might have an adverse effect on the value of the Product***

It is possible that during the lifetime of the Product, an Underlying is de-listed or suspended from trading on the relevant exchange, reference market or quotation system for reasons not attributable to the Issuer.

It is also possible that the Products could be suspended from trading on or de-listed from the relevant exchange or quotation system during the lifetime of the Product. The Issuer is under no obligation to obtain a listing for any Products and, if a listing is obtained, the Issuer is under no obligation to maintain it.

In either case, there could be an adverse impact on the value of and return on the Product.

- (c) ***The secondary market value of the Products will likely be lower than the original issue price of the Products and sale of the Products in a secondary market may result in a loss***

Any secondary market prices of the Products will likely be lower than the original issue price of the Products because, among other things, secondary market prices will likely be reduced by selling commissions, profits and hedging and other costs that are accounted for in the original issue price of the Products. As a result, the price, if any, at which the Lead Manager or any other person would be willing to purchase the Products in secondary market transactions, if at all, is likely to be lower than the original issue price. Accordingly, any sale of the Product by an investor prior to the scheduled redemption date could result in a substantial loss to the investor.

If listed, the Products can be traded on an exchange during their term. However, the price of the Products is not determined according to supply and demand, since if there is a secondary market, it will likely be provided by a market maker (e.g. potentially the Lead Manager or a third party, as the case may be, in such role). Any such market maker will quote independently calculated bid and offer prices for the Products on the secondary market. This price calculation is performed on the basis of customary pricing models of the market maker in which the theoretical value of the Product is basically determined on the basis of the value of the Underlying(s) and other adjustable parameters. The other parameters may include derivative components, expected income from the Underlying(s) (e.g., dividends), interest rates, the term or remaining term of the Product, the volatility of the Underlying(s) and the supply and demand situation for hedging instruments. These or other value-determining parameters may lead to a depreciation in value of the Product, even if during the term the Underlying(s) develop favourably for the investor. Please see also Risk Factor 2.5(a)(vii) "*Conflicts of interest related to market making for the Products*" below.

- (d) ***Fees and other transaction costs will likely reduce the return that an investor would otherwise realise on a Product***

Commission and other transaction costs which are incurred when buying or selling Products may, especially in conjunction with a low contract value, result in cost burdens which may reduce the returns on a Product. Therefore, before purchasing a Product, investors should obtain information regarding all costs arising when purchasing and selling the Product.

- (e) ***In the case of a subscription period the Issuer reserves the right to end the subscription period early or to extend it and that the Issuer is not obliged to accept subscription applications or to issue subscribed Products***

The Final Terms may provide for the Products to be offered during a particular subscription period. Investors should note in this case that the Issuer reserves the right to end the subscription period early or to extend it. In the case of an early ending or an extension of the subscription period, the initial fixing date or any other relevant valuation date, as the case may be, which determines certain characteristics of the Products, may be adjusted along with the Issue Date. The Issuer is not obliged to accept subscription applications. Partial allocations are possible (in particular in the event of oversubscription). The Issuer is not obliged to issue subscribed Products. For these reasons, investors in Products subject to a public offering may receive a Product with different valuation dates than expected and may not receive the Product at all.

- (f) ***Investors are exposed to the risks of adverse foreign exchange rate movements where the Underlying(s) is one or more rates of exchange or because the currency of the Underlying(s) needs to be converted to the currency of the Product and/or where the currency of the Product is different from the currency of the investor's home jurisdiction, and could lose some of their investment or realise a lower return than in the absence of such foreign exchange feature***

If the return on the Product is dependent on one or more rates of foreign exchange – either because the Underlying(s) is one or more rates of exchange or because the currency of the Underlying(s) needs to be converted to the currency of the Product – an investor is exposed to the risk of adverse movements in the value of the relevant foreign currency vs the relevant base currency or currency of the Product.

An investor will also be exposed to the risk of adverse foreign exchange rate movements where the currency of the Product is different from the currency of the investor's home jurisdiction.

Exchange rates are determined by supply and demand factors on international foreign exchange markets, which are subject to economic factors, speculation and actions by governments and central banks (such as currency controls or restrictions) and cannot be predicted. Also, significant movements in exchange rates may not correlate with the performance of the Underlying(s) or other variables such as interest rates, and the timing of such changes may have a negative impact on the value of and return on the Products. This may result in a significant loss of the investor's investment in the Product or the realisation by the investor of a lower return than it would have obtained in the absence of such foreign exchange feature.

(g) ***Changes in tax law or in the tax treatment of the Products could have a negative impact on the value of and the return on the Product to an investor***

Investors should note that it is possible that the tax regime applicable to the Products may be changed in a manner not foreseeable at the time the Products are issued. A risk of changes in the tax treatment of the Products exists for all relevant jurisdictions. The level and basis of taxation on the Products and on the investor depend on the investors individual circumstances and could change at any time and may have an adverse impact on the return received by the investor under the Product.

Any statements made in this Base Prospectus regarding the tax treatment of the Products only relate to the purchase of the Products immediately after the issue (primary purchase). Both in the case of primary purchase and if an investor purchases the Products later, investors should therefore seek advice from a tax advisor about the tax effects in connection with the purchase, holding, exercising or the sale of the Products prior to the purchase. Furthermore, it is possible that the tax authorities may come to a different conclusion than the Issuer regarding tax treatment when interpreting and applying the relevant tax rules to the investor's investment in the Products. Any such tax treatment could have an adverse impact on the return received by the investor under the Product.

(h) ***Payments on the Products may be treated as "substitute dividend equivalent" payments and subject to U.S. withholding tax***

Under section 871(m) of the U.S. Internal Revenue Code of 1986 (the "Code") and regulations thereunder, a payment on a financial instrument that references a US equity or an index that includes a U.S. equity may be treated as a "dividend equivalent" payment. Such payments generally will be subject to U.S. withholding tax at a rate of 30 per cent. If withholding applies, the Issuer will not pay any additional amounts with respect to amounts withheld. The relevant Issue Terms will indicate if the Issuer has determined that a Product is subject to withholding under section 871(m) of the Code. Although the Issuer's determination generally is binding on Investors, it is not binding on the U.S. Internal Revenue Service. The U.S. Internal Revenue Service may successfully argue that payments on a Product are subject to withholding under section 871(m), notwithstanding the Issuer's determination to the contrary. Investors should consult their tax advisors regarding the U.S. federal income tax consequences to them of section 871(m) and regulations thereunder, and whether payments or deemed payments on the Products constitute dividend equivalent payments.

(i) ***In certain circumstances, the Issuer has the right to terminate the Products prior to scheduled maturity and other than on an autocall redemption date. In such case,***

investors will receive the Unscheduled Early Redemption Amount, which amount may be zero

The Issuer has the right to early terminate the Products in certain circumstances set out in the terms and conditions of the Products; for example if an adjustment is not possible or upon occurrence of an Additional Disruption Event. In such case, the Issuer will redeem the Products at the Unscheduled Early Redemption Amount, i.e., in the event of an unscheduled early redemption there will be no right to payment of any amount provided for in the terms and conditions of the Products to be calculated on the basis of a redemption formula at the end of the term. Investors should note that, such amount may be zero in the worst case, i.e., the investor may suffer a total loss of the capital invested.

In the case of an unscheduled early redemption, the investor may only be able to reinvest the amount to be paid by the Issuer on less favourable market terms compared with those existing when the Product was purchased.

Finally, investors bear the risk that their expectations with respect to a potential increase in the value of a Product over its scheduled term will not be realised due to the early termination of the Product.

(j) ***Market disruptions and adjustment measures may negatively affect the value of and return on the Products and lead to payment delays***

Under the terms and conditions of the Products, the Calculation Agent may determine that a Market Disruption Event (as defined in the Underlying Specific Conditions) has occurred or exists at a certain time. Such an event could lead to the postponement of a date on which the Calculation Agent is to establish a valuation of the Underlying (in some cases, potentially up to 60 days) and in certain circumstances lead to the Calculation Agent estimate the relevant price or level of such Underlying and/or to a corresponding delay in the settlement of the Products. No interest shall be payable in respect of any such postponement of the settlement of the Products and any such postponement or estimate of value could have a negative impact on the value of and return on the Products.

Adjustments will be made in accordance with the terms and conditions of the Products. In the event of adjustments relating to the Underlying(s), it is possible that the estimates and/or assumptions on which an adjustment was based turn out to be incorrect and that the adjustment turns out to be unfavourable for the investor and that the adjustment has a negative impact on the value of or return on the Product.

(k) ***The terms and conditions of the Products may be amended by the Issuer without the consent of the Investors in certain circumstances***

The terms and conditions of the Products may be amended by the Issuer without the consent of the Investors in any of the following circumstances:

- to cure a manifest or proven error or omission;
- where such amendment will not materially and adversely affect the interests of Investors;
- to correct or supplement any defective provision;
- where the amendment is of a formal, minor or technical nature;
- to comply with mandatory provisions of law; and
- as a result of certain events in respect of the underlying assets (including, but not limited to, adjustment events, potential adjustment events, extraordinary events and additional disruption events (as specified in the relevant underlying specific conditions)).

For these reasons, in the above circumstances, the terms and conditions of an investor's Product may be amended without the investor's consent and/or against the investor's wishes.

2.2 ***Risks associated with TCM Products and other types of Products***

The following is a description of certain risks associated with TCM Products, Tracker Products and Leverage Products. These descriptions are additional to the other risks that apply to these Products, as described in this section "Risk Factors" (including, without limitation, '2.3 Risks associated with certain features of the Products')

(a) ***Risks associated with TCM Secured Products***

The collateralization in accordance with the terms of the TCM Security Agreement eliminates the Issuer default risk only to the extent that the proceeds from the liquidation of collateral upon occurrence of a Realization Event (less the costs of the Collateral Agent in respect of the liquidation and payout of the liquidation proceeds) are able to meet the Investors' claims. If the current value of the Product is set too low or the value of collateral is set too high prior to liquidation, the collateralization of the Product may be insufficient to satisfy the Investors' claims. If the Conditions provide for a termination right of the Issuer in the event that the TCM Security Agreement is terminated, the Investor bears the reinvestment risk if the Issuer exercises its termination right.

In respect of TCM Secured Products, the Investors bear the following risks (among others): (i) the Collateral Provider is unable to supply the additionally required collateral if the value of the TCM Secured Product rises or the value of the collateral decreases; (ii) in a Realization Event, the collateral cannot be liquidated immediately by the Collateral Agent because of factual hindrances or because the collateral must be handed over to the executory authorities for liquidation; (iii) the market risk associated with the collateral results in insufficient liquidation proceeds or, in extreme circumstances, the collateral might lose its value entirely until the liquidation can take place; (iv) the payment of the pro-rata share of net liquidation proceeds may be made in a currency that is not the settlement currency of the TCM Secured Product; (v) the collateralization is challenged according to the laws governing debt enforcement and bankruptcy, such that the collateral cannot be liquidated according to the terms of the TCM Security Agreement.

The collateralization of the TCM Secured Products does not eliminate the risk that there might not be a buyer for the TCM Secured Product during its lifetime and the Investor may need hold the TCM Secured Product until maturity.

Any costs of the liquidation of the collateral shall be covered out of the proceeds of the liquidation of the collateral.

The payment of the net liquidation proceeds to the Investors may be delayed for factual or legal reasons.

The Collateral Agent is not required to undertake investigations with regard to the occurrence of a Realization Event. In determining the occurrence of a Realization Event, it bases its decision on reliable sources of information only. The Collateral Agent determines with binding effect for the investors whether an incident qualifies as a Realization Event and at what point in time the Realization Event occurred and such a determination may or may not be in the favour of Investors.

The Conditions of the TCM Secured Products may provide for a termination right of the Issuer in the event that (a) the TCM Security Agreement is terminated and (b) due to such termination it is not possible to collateralize the TCM Secured Products in accordance with the provisions of the TCM Security Agreement. If the Issuer exercises its termination right, the Products will be redeemed early and the Investors bear the risk that their expectations with respect to an increase in the value of the TCM Secured Products may no longer be satisfied due to the early redemption. In the case of a

termination, it must also be considered that the Investors bear the reinvestment risk. This means that he or she may possibly only be able to reinvest the early redemption amount paid by the Issuer on more unfavourable market conditions than those existing when the Product was purchased.

(b) ***Risks associated with Tracker Products***

- (i) *The Management Fee Deduction will reduce the return that an investor would otherwise realise*

If 'Management Fee Deduction' is specified to be 'Applicable' in the Issue Terms the value of and return on the Product will be reduced by a management fee. The management fee will be a percentage specified in the Issue Terms and will accrue from the Initial Fixing Date until the Final Fixing Date, therefore the longer the term of the product, the greater the reduction in the value of and return on the Product by the management fee. Before purchasing a Product Investors should understand the effect of the management fee on the value of and return on the Product.

- (ii) *The Accrued Management Fee will reduce the return that an investor would otherwise realise*

If 'Tracker Product Style' is specified to be 'Single Underlying with Composite FX (Notional Units)' or 'Single Underlying with no FX (Notional Units)' in the Issue Terms, the value of and return on the Product will be reduced by an accrued management fee. The accrued management fee is (A) deducted directly from the redemption amount an Investor would otherwise receive and (B) reduces the number of "units" of the underlying used in the calculation of the redemption amount. Before purchasing a Product Investors should understand the effect of the management fee on the value of and return on the Product.

(c) ***Risks associated with Leverage Products***

- (i) *There are risks associated with the leverage feature of all Leverage Products*

Each type of Leverage Product has a 'leverage' feature'. 'Leverage' refers to the use of financial techniques to gain additional exposure to the Underlying. A leverage feature will magnify the impact of the performance of the Underlying to cause a greater or lower return on the Product than would otherwise be the case in the absence of leverage. As such, a leverage feature magnifies losses in adverse market conditions. The inclusion of such a leverage feature means that the Products will be more speculative and riskier than in the absence of such feature, since smaller changes in the performance of the Underlying can reduce (or increase) the return on the Products by more than if the Products did not contain a leverage feature. Investors should be aware that a small movement in the value of the Underlying can have a significant effect on the value of the Products. Products with a leverage feature are more likely to fall for automatic cancellation in accordance with their terms below. In such event, an investor may lose some or all of their investment.

- (ii) *The strike level of the Underlying may take into account the cost of financing exposure to the Underlying*

There are costs associated with financing the 'leveraged' exposure to the Underlying (the "financing costs"). The Issuer may factor in these additional financing costs in the setting of the strike level, and as a result the strike level may be set at a less advantageous level for Investors than if such financing costs were not factored in. A less advantageous strike level will reduce the value of and return on the Products.

- (iii) *Investors may lose all of their investment*

Each type of Leverage Product may be redeemed for a redemption amount equal to zero, and as a result of such a redemption Investors would lose all of their investment.

In respect of all Leverage Products, Investors will lose all of their investment if the level of the Underlying on the final fixing date is either (a) in the case of Call Warrant Products, Call Knock-Out Warrant Products and Bullish Mini Future Products, at or below the strike level of the Underlying or (b) in the case of Put Warrant Products, Put Knock-Out Warrant Products and Bearish Mini Future Products, at or above the strike level of the Underlying.

Investors should note that in respect of Call Warrant Products, Put Warrant Products, Call Knock-Out Warrant Products and Put Knock-Out Warrant Products, if the strike event is specified to be either 'at or above' or 'at or below' (as applicable) then if the final fixing level is equal to the strike level, a strike event will be deemed to have occurred. However, in such a scenario, the redemption amount determined in accordance with the redemption formula shall be zero and investors will lose all of their investment.

- (iv) *There are risks associated with the knock-out feature of Knock-Out Warrant Products*

Investors in Knock-Out Warrant Products will also lose all of their investment if a "knock-out" event has occurred and the Issue Terms does not specify 'Rebate' to be 'Applicable'. A "knock-out event" occurs if the level of the Underlying on a specified date (or in a specified period) is (a) in the case of Call Knock-Out Warrant Products, above or at or above (as specified in the Issue Terms) a predefined "knock-out level", or (b) in the case of Put Knock-Out Warrants, is below or at or below (as specified in the Issue Terms) a predefined "knock-out level".

Investors should note in this context that the price of Knock-Out Warrant Products is reduced disproportionately compared to Warrant Products if the level of the Underlying approaches the relevant "knock-out level".

- (v) *There are risks associated with the stop loss feature of Mini Future Products*

Investors in Mini Future Products bear the risk that the Products automatically redeem early if a "stop loss event" occurs, and in such case, Investors may lose all of their investment. A "stop loss event" occurs if the level of the Underlying in a specified period is (a) in the case of Bullish Mini Future Products, below or at or below (as specified in the Issue Terms) a predefined "stop loss level" or (b) in the case of Bearish Mini Future Products, above or at or above (as specified in the Issue Terms) a predefined "stop loss level". If a "stop loss event" occurs Investors may lose all of their investment if the Issuer (or any of its affiliates) is not able to unwind its hedge positions in relation to the Product at a level that is either (a) in the case of Bullish Mini Future Products, above the strike level or (b) in the case of Bearish Mini Future Products, below the strike level.

Investors should note in this context that the price of the Mini Future Products is reduced disproportionately compared to Warrant Products, if the price of the Underlying approaches the predefined "stop loss level".

No continuous bid and ask prices for Mini Future Products are quoted by the Issuer on the secondary market outside of the trading hours of the Underlying if the Issuer expects a "stop loss event" to occur due to different price indicators than the official price of the Underlying. Investors should note in this context that the Issuer does not commit nor is under any obligation (legal or otherwise) to quote bid and ask prices for the Products and Investors should therefore not rely on being able to purchase or sell the Products at any time.

(d) ***Risks associated with Long/Short Products***

- (i) *The Management Fee Deduction will reduce the return that an investor would otherwise realise*

If 'Long/Short Product Style' is specified to be 'Long/Short Product with Management Fee Deduction' in the Issue Terms the value of and return on the Product will be reduced by a management fee. The management fee will be a percentage specified in the Issue Terms and will accrue from the Initial Fixing Date until the Final Fixing Date, therefore the longer the term of the product, the greater the reduction in the value of and return on the Product by the management fee. Before purchasing a Product Investors should understand the effect of the management fee on the value of and return on the Product.

- (ii) *There are risks associated with the stop loss feature of Long/Short Products*

If 'Stop Loss Early Redemption' is specified to be 'Applicable' in the Issue Terms, Investors in Long/Short Products bear the risk that the Products automatically redeem early if a "stop loss event" occurs, and in such case, Investors will lose some or all of their investment. A "stop loss event" will occur when the market value of the Product (as determined by the Calculation Agent) falls below a certain pre-determined percentage of the initial value of the Product.

2.3 ***Risks associated with certain features of the Products***

- (a) ***There are risks where the Products have a 'leverage' feature***

'Leverage' refers to the use of financial techniques to gain additional exposure to the Underlying(s). A leverage feature will magnify the impact of the performance of the Underlying(s) to cause a greater or lower return on the Product than would otherwise be the case in the absence of leverage. As such, a leverage feature magnifies losses in adverse market conditions. In the terms of the Products, the leverage feature may be referred to variously as 'Participation', or other term and the Products will have 'leverage' where any of these factors is equal to more than 100 per cent (or 1.00). The inclusion of such a leverage feature in the Products means that the Products will be more speculative and riskier than in the absence of such feature, since smaller changes in the performance of the Underlying(s) can reduce (or increase) the return on the Products by more than if the Products did not contain a leverage feature. Investors should be aware that a small movement in the value of the Underlying(s) can have a significant effect on the value of the Products. Products with a leverage feature are more likely to fall for automatic cancellation in accordance with their terms below. In such event, an investor may lose some or all of their investment.

- (b) ***There are risks in relation to Products linked to the 'worst performing' Underlying in a basket***

Where the Conditions of the Products include a 'worst-of' feature, investors will be exposed to the performance of the Underlying which has the worst performance, rather than the basket as a whole.

This means that, regardless of how the other Underlying(s) perform, if the worst performing Underlying Asset in the basket fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, investors might receive no interest payments or return on their initial investment and they could lose some or all of their investment.

- (c) ***There are risks where the Products include a cap***

Where the terms and conditions of the Products provide that the amount payable or underlying(s) deliverable is subject to a pre-defined cap, the investor's ability to participate in any positive change in the value of the Underlying(s) will be limited, no matter how much the level, price or other value of the Underlying(s) rises above the cap level over the

life of the Products. Accordingly, the value of or return on the Products may be significantly less than if the investor had purchased the Underlying(s) directly.

(d) ***There are risks where the Products have a 'conditional' feature***

If the Products include a 'conditional' feature, then coupon will only be paid if the level, price or other applicable value of the Underlying(s) on the relevant valuation date(s) either reaches or crosses one or more specific barrier(s). It is possible that such level, price or other applicable value of the Underlying(s) on the relevant valuation date(s) will not either reach or cross the barrier(s) (as applicable), and therefore, no coupon will be payable on the relevant coupon payment date. This means that the amount of coupon payable to an investor over the term of the Products will vary and may be zero.

(e) ***There are risks where the Products have a 'memory coupon' feature***

If the Products include a 'memory coupon' feature, the payment of coupon will be conditional on the value or performance of the Underlying(s). The coupon amount payable will be zero on a coupon payment date if the Underlying(s) does not perform in accordance with the terms of the Products although such payment will be deferred to the next coupon payment date. If the Underlying(s) meets the performance criteria, the coupon payable will be an amount for the current coupon payment date plus any amounts deferred from previous coupon payment dates where coupon was not paid. Investors will not be paid any coupon or other allowance for the deferred payments of coupon and it is possible that the Underlying(s) never meets the performance criteria, meaning that investors will not receive any coupon at all for the lifetime of the Products.

(f) ***There are risks where the Products are open-ended***

If the Products are 'open-ended' - meaning that they do not provide for an expiration date or maturity date but may continue indefinitely until either the investor exercises its right to put the Products or the Issuer exercises its right to call the Products – the investor is subject to certain risks, including:

- (i) **exercise of an Issuer call option or investor put option:** the yields received upon cancellation following a call by the Issuer or the investor's exercise of the investor put may be lower than expected, and the amount received by the investor may be lower than the initial price the investor paid for the Products and may be zero; and
- (ii) **automatic early redemption of open-ended Products:** the terms and conditions of the Products may provide that the Products will automatically be redeemed early in certain extraordinary circumstances. In such event, the Issuer will redeem the Products at the "Unscheduled Early Redemption Amount" which may be substantially less than the value of the Products. In such circumstances an investor is likely to receive less than the amount it invested and could receive zero.

(g) ***There are risks where the Product has an Issuer Call Option (Fixed Term) or Investor Put Option (Fixed Term)***

Where the terms and conditions of the relevant Product provides either Issuer Call Option (Fixed Term) or Investor Put Option (Fixed Term) to be applicable, the yields received upon cancellation following a call by the Issuer or the investor's exercise of the investor put may be lower than expected, and the amount received by the investor may be lower than the initial price the investor paid for the Products and may be zero.

(h) ***There are risks where the Products have a 'barrier' feature***

If the calculation of coupon or the calculation of any redemption amount depends on the level, value or price of the Underlying(s) reaching or crossing a 'barrier' during a specified period or specified dates during the term of the Products, such coupon or redemption amount may alter dramatically depending on whether the barrier is reached or crossed (as applicable). This means that the investor may receive less (or, in certain

cases, more) if the level, value or price of the Underlying(s) crosses or reaches (as applicable) a barrier, than if it comes close to the barrier but does not reach or cross it (as applicable), and in certain cases the investor might receive no interest payments and/or could lose some or all of its investment.

(i) ***There are risks where the redemption of the Products depends only on the final performance***

If the Products determine the redemption amount based on the performance of the Underlying(s) as at the final valuation date only (rather than in respect of multiple periods throughout the term of the Products) then the investor may not benefit from any movement in level, value or price of the Underlying(s) during the term of the Products that is not reflected in the final performance.

(j) ***There are risks in relation to Products where the 'strike level' is predetermined***

In respect of Products for which 'Predetermined Strike Level' is specified to be 'Applicable' in the Issue Terms, notwithstanding that the strike level is specified as a percentage of the Initial Fixing Level in the Issue Terms, the strike level was determined on a date prior to the date on which the Initial Fixing Level is determined. As a result the strike level will not reflect current market prices of the Underlying. The probability of the occurrence of any events, along with any amounts due to investors, that are determined by reference to the strike level(s) of the Underlyings will be different than if such amount or events were determined by reference to current market prices of the Underlying(s).

(k) ***There are risks in relation to Products linked to a basket of Underlyings***

Where Products are linked to a basket of Underlying(s), investors will be exposed to the performance of each Underlying in the basket and investors should refer to the relevant risk factors in the section relating to each of the asset classes represented. Investors should also consider the level of interdependence or 'correlation' between each of the basket constituents with respect to the performance of the basket. If the Underlying(s) are correlated, the performance of the Underlying(s) in the basket can be expected to move in the same direction (and vice versa) and investors should consider the impact of this 'correlation' on the performance of the Products.

Investors should be aware that the performance of a basket with fewer constituents will be more affected by changes in the values of any particular basket constituent than a basket with a greater number of basket constituents.

The performance of basket constituents may be moderated or offset by one another. This means that, even in the case of a positive performance of one or more constituents, the performance of the basket as a whole may be negative if the performance of the other constituents is negative to a greater extent.

If the Underlyings in the basket have different weights, investors should consider that the lower the weighting of the Underlying, the lower the impact of the performance of such Underlying on the performance of the entire basket.

(l) ***There are risks in relation to Products that may be settled by way of delivery of the relevant Underlying(s) at maturity***

If the relevant Product is to be settled by way of delivery of the relevant Underlying(s), upon maturity of the Products the delivery of the relevant Underlying may be made instead of the payment of a monetary amount. In such case, since investors will be exposed to the specific issuer and securities risks associated with the relevant Underlying to be delivered, when purchasing the Products investors should consider all Underlyings which could potentially be delivered. Investors should not assume that the Underlying to be delivered after redemption of the Products can be sold at a specific price, in particular not at a price equivalent to the capital used to purchase the Products. In certain circumstances the delivered underlying may only have a very low value or may in fact

be worthless. In this case, investors run the risk of losing all of their capital used to purchase the Products.

Investors should therefore consider that any fluctuations in the price of the Underlying after the end of the term of the Products will be borne by them until the respective actual delivery. Losses in the value of the Underlying to be delivered may occur after the end of the term and are to be borne by investors. This means that the actual gain or loss can only be determined after delivery of the Underlying.

If the Underlying to be delivered is a registered share, investors should consider that the rights associated with the shares (e.g., participation in the general meeting, exercise of voting rights, etc.) can generally only be exercised by shareholders who are registered in the share register or a comparable official list of shareholders of the company. The obligation of the Issuer to deliver shares is limited to provision of the shares effected with the characteristics and in the form that allow delivery via an exchange and does not cover registration in the share register or list of shareholders. Any claims due to non-fulfilment, in particular rescission or damage claims, are excluded in such cases.

Further, if delivery of the Underlying, for whatever reason, is economically or actually impeded or not possible, the Issuer shall have the right to pay a compensation amount in lieu of delivery of the Underlying.

(m) ***There are risks where the Products have an 'autocall' feature***

Where the terms and conditions of the Products include an 'autocall' feature it should be noted that the level of the Redemption Amount and the time for redemption of the Products depend on whether an Autocall Event specified in the terms and conditions has occurred on an Autocall Observation Date. If such event occurs, the term of the Products ends early and the Products are redeemed early in accordance with the terms and conditions. In the case of such early redemption, the future price performance of the Underlying(s) is irrelevant to the investor.

(n) ***There are risks where the Products have a 'capital protection at maturity' feature***

For Products which offer a capital protection at maturity date, the investor may, however, lose part or all of the initially invested amount if the Products are sold by the investor before the maturity date (since the value of the Products during their lifetime may be lower than the amount of the capital protection due to market fluctuations).

2.4 ***Risks associated with Products linked to one or more Underlyings***

(a) ***General***

(i) ***Investors have no claim against or interest in any Underlying(s)***

The Issuer has no obligation to hold the Underlying(s). Investors will not have any legal or beneficial rights of ownership in the Underlying(s). For example, where the Underlying(s) is a share, investors will have no voting rights, no rights to receive dividends or other distributions or any other rights with respect to the Underlying(s). In addition, investors will have no claim against any share issuer, index sponsor, fund issuer, fund sponsor or any other third party in relation to an Underlying(s); such parties have no obligation to act in investors' interests. Accordingly, investors in the Products may receive a lower return on the Products than they would have received had they invested directly in the Underlying(s).

(ii) ***The value of and return on the Products will depend on the performance of the Underlying(s), but such performance is not possible to predict and the economic relationship between the value of and return on the Products will depend on the performance of the Underlying(s) may not be clear and may change over time and be affected by other matters***

The calculation of the redemption amount payable or, in the case of Products with redemption by delivery of the relevant Underlying(s), the number of the Underlyings to be delivered at maturity and, if and to the extent that the Products have a variable interest rate, the coupon amounts, may depend on the performance of one or more Underlying(s) during the term. This means that there is a connection between the economic value of the Products and the economic value of the Underlying(s) to which the Product is linked.

However, investors should be aware that there may not be a direct relationship between the market value of the Products and the current price of the relevant Underlying(s) since the market value of the Products may also be affected by factors other than the current price of the relevant Underlying(s), such as volatility of such Underlying(s), dividend payments or movements in the general interest rates etc. Therefore, positive changes in the price of the relevant Underlying(s) do not necessarily lead to a change in the market value of the Product which is positive for the investor. A depreciation of the Product moreover may even occur if the relevant price of the relevant Underlying(s) remains constant. Investors should note that changes in the price of the relevant Underlying(s) (or even a situation where an expected price change does not occur) can reduce the value of the Products to a disproportionately high extent and even render them worthless, unless the Products provide for payment of a scheduled minimum redemption amount (or for partial redemption amounts). In particular, investors should not assume that the price of the Products will recover in time in view of the limited life of the Products.

Depending on the performance of the Underlying(s) and the Product, investors may lose some of their investment.

(b) ***Risks associated with Products linked to Underlying(s) which are shares***

(i) *Variable unpredictable factors may affect the performance of shares*

The performance of the relevant share cannot be predicted and is determined by macroeconomic factors, for example interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy. Any one or a combination of such factors could adversely affect the performance of the Underlying(s) which, in turn, would have an adverse effect on the value of and return on the Products.

(ii) *Investors will not be able to participate in dividends or other distribution on the shares*

Investors in Products linked to shares will not have any voting rights or rights to dividends or interest payments or other distributions or other rights relating to the share. Therefore, the return on the Products may be lower than holding such Underlying(s) directly.

(iii) *Actions by the issuer of a share may negatively affect the Products*

The issuer of common shares of a company will not have participated in the offering and issuance of the Products and none of the Issuer or the Lead Manager will have made any investigation or enquiry in relation to the share issuer for the purposes of the Products. Therefore, there can be no assurance that all events occurring prior to the issue date of the Products that would affect the trading price of the relevant share(s) will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning the share issuer could affect the trading price of the share and therefore the trading price of the Products. Also, investors should be aware that the issuer of any common shares may or may not take actions in respect of common shares

without regard to the interests of investors in Products and any of these actions could have a negative effect on the value of and return on the Products.

(c) ***Risks associated with Products linked to Underlying(s) which are participation certificates***

(i) *Variable unpredictable factors may affect the performance of participation certificates*

The performance of the relevant participation certificate cannot be predicted and is determined by macroeconomic factors, for example interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation and distribution policy. Any one or a combination of such factors could adversely affect the performance of the Underlying(s) which, in turn, would have an adverse effect on the value of and return on the Products.

(ii) *Investors will not be able to participate in distributions on the participation certificates*

Investors in Products linked to participation certificates will not have any rights to distributions or other rights relating to the participation certificate. Therefore, the return on the Products may be lower than holding such Underlying(s) directly.

(iii) *Actions by the issuer of the participation certificate may negatively affect the Products*

The issuer of participation certificate will not have participated in the offering and issuance of the Products and none of the Issuer or the Lead Manager will have made any investigation or enquiry in relation to the participation certificate issuer for the purposes of the Products. Therefore, there can be no assurance that all events occurring prior to the issue date of the Products that would affect the trading price of the relevant participation certificate(s) will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning the participation certificate issuer could affect the trading price of the participation certificate and therefore the trading price of the Products. Also, investors should be aware that the issuer of any participation certificate may or may not take actions in respect of participation certificate without regard to the interests of investors in Products and any of these actions could have a negative effect on the value of and return on the Products.

(d) ***Risks associated with Products linked to Underlying(s) which are depositary receipts***

Products linked to securities representing shares or depositary receipts ("**Depositary Receipts**") may carry additional risks compared to Products linked to shares.

Each Depositary Receipt represents one or more underlying shares or a fraction of the security of a non-domestic stock corporation. The legal owner of the underlying shares is, for both types of Depositary Receipts, the depositary, which is also the issuing agent of the Depositary Receipts. Depending on the jurisdiction under which the Depositary Receipts have been issued and under which the depositary agreement is governed, it cannot be ruled out that the jurisdiction will not accept the holder of the Depositary Receipts as the actual beneficial owner of the underlying shares. In particular in the event that the depositary becomes insolvent or is subject to foreclosure, it is possible that a restraint on disposal of the underlying shares of the Depositary Receipts will be imposed or that such shares will be disposed of in the context of a foreclosure against the depositary. In this case, the holder of the Depositary Receipts will lose the rights over the underlying shares which are certified in the Depositary Receipt. The Depositary Receipt as the underlying of the Products and therefore the Products relating to such Depositary Receipt will become worthless.

In such a scenario the Investor is exposed to the risk of the value of the redemption of such Products being less than the capital invested for the Product (including related transaction costs) or zero.

Any fees and costs that the custodian bank – generally having its registered office in the home country of the issuer of the underlying shares – or the depositary incur can have a negative impact on the value of the Depositary Receipts and thus on the value of the Products.

(e) ***Risks associated with Products linked to Underlying(s) which are indices***

In the case of Products linked to indices, the redemption amount depends on the performance of the index and thus of the components contained in the index. During the term, the market value of the Products can, however, also deviate from the performance of the index or components contained in the index since other factors such as the correlation, volatilities, interest level and (if applicable) the reinvestment of any dividend payments relating to the components contained in the index, may have an impact on the performance of the Products.

In the case of a 'price index' as an underlying, investors should note that dividend payments are in principle not taken into account (whereas in the case of a 'performance index' the calculation of such index takes into account all dividend payments). Therefore, investors should note that they will not participate in any dividend payments with regard to the components contained in the underlying.

Investors should note that the index sponsor or the person responsible for the composition of the Index as well as the Issuer may be subject to new regulatory requirements with regard to the publication and the use of an index during the term of the Products which may require an admission or a registration of the respective index and an index modification in order to comply with the statutory provisions. Therefore, it cannot be excluded that an index will be modified, cancelled or may no longer be used. In each of these cases the Issuer and/or the Calculation Agent is entitled to make adjustments pursuant to the Conditions and to make determinations with respect to the price of the index in its discretion in order to calculate the amount owed at the end of the term of the Product and/or after an exercise or in the case of a termination of the Products.

The index sponsor may, in its reasonable discretion, either (i) on a regular basis and, as the case may be, on non-predetermined dates or (ii) upon the occurrence of extraordinary events, remove or replace or add new components to such an Index or make other changes to the methodology. A new component may perform significantly better or worse than the replaced component, which in turn may affect the payments to be made by the Issuer to the investor. The index sponsor or the person responsible for the composition of the Index may also change, discontinue or suspend the calculation or distribution of the Index and there can be no assurance that such decisions will be beneficial to the performance of the Index. The index sponsor of an Index may take any action in relation to the Index without regard to the interests of the investor and any such action may adversely affect the market value of the Products.

The rules of the Index may provide, where applicable, that an Index fee shall be charged by the index sponsor or by the Index calculation agent or by the person responsible for the composition of the Index which reduces the level of the Index. This will particularly be the case if there is a discretion of the index sponsor or the index calculation agent or the person responsible for the composition of the index regarding the selection of the index components. Accordingly, there is a risk that the Index does not reflect the performance of the Index components or does so only partially. In the case of indices whose start date is close to or shortly before the Initial Fixing Date or the Fixing Period of the Products, historical information on the performance of the Index is missing or is only available to a limited extent.

(f) ***Risks associated with Products linked to Underlying(s) which are futures contracts***

There is generally a close correlation between the price movement of an underlying for the relevant futures contract on a spot market and on the corresponding futures market. However, futures contracts are generally traded at a premium or discount compared with the spot price of the underlying of the futures contract. This difference between the spot and futures prices, called the 'basis' in futures exchange terminology, on the one hand is the result of taking into account the costs customarily arising in connection with spot transactions (warehousing, delivery, insurance, etc.) and/or the income customarily arising in connection with spot transactions (interest, dividends, etc.), and on the other hand the different methods used to evaluate general market factors affecting the spot and the futures market. Furthermore, depending on the relevant underlying, there can be significant differences in the liquidity of the spot and respective futures market.

As the Products are linked to the market price of the futures contracts specified in the Issue Terms, investors should understand how futures transactions work and are valued in addition to knowing about the market in the underlying of the relevant futures contract to be able to properly assess the risks inherent in purchasing the Products.

Since futures contracts as an underlying of the Products may have a fixed expiry date, the current futures contract is replaced by the Issuer, at the time specified in the Issue Terms, with a futures contract that has the same contract specifications as that futures contract except for the expiry date which is more distant than that of the current futures contract (referred to as "roll-over").

(g) ***Risk associated with whole-day trading of currencies and commodities***

If any amounts due under the Products are determined on the basis of currencies or commodities, investors should consider that those are traded 24 hours a day as a result of the time zones of Australia, Asia, Europe and United States of America. For this reason it is possible that an event that is material in accordance with the Conditions or a factor relevant for the determination of any right granted by the Product may occur or be determined outside the business hours of the place where the Products are offered and/or traded.

(h) ***Risks associated with Products linked to Underlying(s) which are currency exchange rates***

Currency exchange rates indicate the relationship between one particular currency and another currency. For example the exchange rate 'EUR/USD 1.11823' indicates that USD 1.11823 has to be paid to purchase one euro. An increase in this currency exchange rate therefore means an increase in the value of the euro against the US dollar. The currency exchange rate 'USD/EUR 0.89416', on the other hand, indicates that EUR 0.89416 has to be paid to purchase one US dollar. An increase in this currency exchange rate therefore means an increase in the value of the US dollar against the euro.

A country's currency may appreciate, for example, as a result of an increase in a country's key interest rate, demand for such country's government bonds normally rises. Conversely, a country's currency may depreciate if the key interest rate falls. Generally, exchange rates are determined by supply and demand for currencies on the international money markets which are, among other things, subject to economic factors, speculation and actions taken by governments and central banks (e.g., exchange controls or restrictions).

Currency exchange rates are influenced by a wide variety of factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and the safety of making financial investments in the currency concerned. Apart from these assessable factors there may be factors that are almost impossible to predict, for instance factors of a psychological nature such as a loss of faith in the political leadership of a country, which can also have a major impact on the value of the currency concerned.

(i) ***Risks associated with Products linked to Underlying(s) which are commodities***

The price risks involved in commodities are often complex. Commodity prices are more volatile than other investment categories and, in particular, commodity markets are less liquid than bond, currency or stock markets. This means that changes in the supply and demand have a larger impact on prices and volatility, making commodities investments riskier and more complex than other investments.

The factors that influence commodity prices are both numerous and complex. The following are examples of some typical factors affecting commodities prices.

- (i) The planning and management of commodities supplies are very time-consuming. This means that the scope for action on the supply side is limited and it is not always possible to adjust production swiftly to take account of demand. Demand can also vary on a regional basis. Transport costs for commodities in regions where these are needed also affect their prices. The fact that some commodities take a cyclical pattern, such as agricultural products which are only produced at certain times of the year, can also result in major price fluctuations.
- (ii) Direct investments in commodities involve costs related to storage, insurance and tax. Moreover, no interest or dividends are paid on commodities. The total returns from commodities investments are therefore influenced by these factors.
- (iii) Not all commodities markets are liquid and able to quickly and adequately react to changes in supply and demand. The fact that there are only a few market participants on the commodities markets means that speculative investments can have negative consequences and may distort prices.
- (iv) Unfavourable weather conditions can influence the supply of certain commodities for the entire year. This kind of supply crisis can lead to severe and unpredictable price fluctuations. Diseases and epidemics can also influence the prices for agricultural commodities.
- (v) Commodities are often produced in emerging market countries, with demand coming principally from industrialised nations. However, the political and economic situation of emerging markets is often far less stable than in industrialised nations. They are generally much more susceptible to the risks of rapid political change and economic setbacks. Political crises can affect investor confidence, which can as a consequence influence commodity prices. Armed conflicts can also have impact on the supply and demand for certain commodities. It is also possible for industrialised nations to impose embargos on imports and exports of goods and services. This can directly and indirectly impact commodity prices. Furthermore, numerous commodity producers have joined forces to establish organisations or cartels in order to regulate supply and influence prices.
- (vi) Changes in tax rates and customs duties may have a positive or a negative impact on the profitability margins for commodities producers. If these costs are passed on to buyers, these changes will affect the prices of the relevant commodities.

Additionally, the legal and regulatory regime in relation to commodities is subject to change in ways that could affect the Issuer's obligations in respect of any underlying or hedging transactions in relation to the Products.

Changes to these legal and regulatory regimes may negatively affect the value of the Products.

Such changes to the legal and regulatory regime in relation to commodities may also adversely impact the Issuer's obligations in respect of any underlying or hedging transactions in relation to the Products, or may make it unlawful or unfeasible in whole or in part for any reason for the Issuer to access commodity markets for the purpose of managing commodity market risk. This, in turn, may lead to adjustment to or early redemption of the Products.

In the event that there is an early redemption of the Products, any early redemption amount may be less than the initial investment, and could even be zero. Additionally, the investor may not be able to reinvest the early redemption proceeds at an effective interest rate as high as the interest rate or yield on its Products.

(j) ***Risks associated with Products linked to Underlying(s) which are funds***

Factors affecting the performance of the Fund (being either (i) an exchange traded fund ("ETF"), which is an open ended or other fund traded like a share on an exchange, or (ii) a fund, in each case that tracks or is linked to the performance of a portfolio of assets) may adversely affect the market value of, and the return (if any) on, the Products linked to such Fund.

The performance of a Fund is dependent upon the macroeconomic factors affecting the performance of such assets which may include, among other things, interest and price levels on the capital markets, commodity prices, currency developments, political factors and, in the case of shares, company specific factors, such as earnings position, market position, risk situation, shareholder structure and distribution policy. These factors affecting the performance of the Fund(s) may adversely affect the market value of, and the return (if any) on, the Products linked to such Funds.

(i) *Exposure to the risk that the return on the Product does not reflect the return on a direct investment in the fund units or ETF shares or the assets included in the portfolio of the Fund(s)*

An investor's return on Products linked to Fund(s) may not reflect the return such investor would realise if he or she actually owned the relevant fund units, ETF shares or assets included in the portfolio(s) of the Fund(s). For example, if the portfolio of the Fund(s) includes shares or a share index, investors in the Products linked to such Fund will not receive any dividends paid on such shares or the shares included in such share index and will not benefit from those dividends unless such Fund takes such dividends into account for purposes of calculating the value of such Fund. Similarly, investors in Products linked to Fund(s) will not have any voting rights in the shares or other assets that are included in the portfolio(s) of the Fund(s). Accordingly, an investor in Products linked to Fund(s) may receive a lower payment (if any) upon redemption of such Products than such investor would have received, if he or she had directly invested in the fund units, ETF shares or assets included in the portfolio of such Fund(s).

(ii) *A change in the composition or discontinuance of the Fund(s) could adversely affect the market value of, and return (if any) on, Products linked thereto*

In principle, the Issuer and the Calculation Agent have no influence on the composition or performance of any Fund or any index that such Fund is intended to replicate. The Management Company or the licensor/sponsor, as applicable, of an underlying index can add, delete or substitute the assets included in such index, respectively, or make methodological changes that could affect the value of such Fund or of such underlying index, respectively. The substitution of assets included in the portfolio of a Fund or in an underlying index, respectively, may affect the value of such Fund, as a newly added asset may perform significantly worse or better than the asset it replaces, which in turn may affect the market value of, or payments (or other benefits to be received) under, the Products. The Management Company or licensor/sponsor of any underlying index may also alter, discontinue or suspend calculation or dissemination of information on such Fund or such underlying index, respectively. The Management Company and licensor/sponsor of such underlying index are not involved in the offer and sale of the Products and have no obligation to invest therein. The Management Company and licensor/sponsor of such underlying index may take any actions in respect of such Fund or such underlying index, respectively, without regard to the interests of the investors in Products, and any of these actions could adversely affect the market value of (or amount payable under) such Products. In particular,

no assurance can be given that the performance of a Fund will be identical to the performance of the assets included in the portfolio of the Fund(s) or which the Fund intends to replicate, respectively, due to many factors.

(iii) *Risks in relation to market price*

The market price of interests in the Fund that are traded on an exchange may, due to the forces of supply and demand, as well as liquidity and scale of trading spread in the secondary market, diverge from their net asset value, i.e., the market price per interest in the Fund could be higher or lower than its net asset value, and will fluctuate during the trading day.

The performance of Fund(s) with a portfolio of assets that are concentrated in the assets of a particular industry or group of industries could be more volatile than the performance of Funds with portfolios of more diverse assets.

(iv) *Risks in relation to costs of Funds*

A Fund's performance will be affected by the fees and expenses which it incurs, as described in its offering documents. Such fees and expenses may include the investment management fees, performance fees and operating expenses typically incurred in connection with any direct investment in a Fund. A Fund will assess fees and incur costs and expenses regardless of its performance. High levels of trading could cause a Fund to incur increased trading costs. Investors of Products linked to Fund(s) will be exposed to a *pro rata* share of the fees and expenses of the relevant Fund(s).

(v) *Valuation risk in relation to a Fund*

The Calculation Agent will rely on the calculation and publication of the net asset value per Fund Unit by the relevant Fund itself (or another entity on its behalf). Any delay, suspension or inaccuracy in the calculation and publication of the net asset value per Fund Unit will impact on the calculation of the return on the Products. The value of and return on the Products may also be reduced if a Fund delays payments in respect of fund share redemptions.

The Fund Units and/or the investments made by a Fund may be valued only by administrators, custodians or other service provider of the Fund and may not be verified by an independent third party on a regular or timely basis. There is a risk that (i) the determinations of the Calculation Agent may not reflect the true value of the Fund Units at a specific time which could result in losses or inaccurate pricing and/or (ii) relevant values may not be available on a relevant date which could result in the Fund Units of the Fund being determined by the Calculation Agent in its discretion.

(vi) *Risk that strategies of a Fund may not be successful in achieving its investment objective*

No assurance can be given that the investment strategy of a Fund will be successful or that the investment objective of such Fund will be achieved, or that any analytical model used by the relevant management company will prove to be correct or that any assessments of the short-term or long-term prospects, volatility and correlation of the types of investments in which such Fund has invested or will invest will prove accurate. The analytical models utilised by a management company of a Fund and upon which investment decisions are based may be developed from historical analysis of the performance or correlation of historical analysis of the performance or correlations of certain companies, securities, industries, countries or markets. There can be no assurance that the historical performance that is used to determine such analytical models will be a good indicator of future performance, and if the future performance of a Fund varies

significantly, the management company of such Fund may not achieve its intended investment performance.

No assurance can be given that the strategies to be used by a Fund will be successful under all or any market conditions. A Fund may utilise financial instruments such as derivatives for investment purposes and/or seek to hedge against fluctuations in the relative values of the Fund's portfolio positions as a result of changes in exchange rates, interest rates, equity prices and levels of yields and prices of other securities. Such hedging transactions may not always achieve the intended outcome and can also limit potential gains.

The management of a Fund may have broad discretion over its investment strategy, within specified parameters. A Fund could, for example, alter its investment focus within a prescribed market. Any shift in strategy could bear adverse consequences to a Fund's investment performance. Further, a Fund may have difficulty realising on any strategy initiatives that it undertakes. It may not sometimes be clear whether the Fund fulfils the investment criteria set out in its investment guidelines.

(k) ***Risks associated with Products linked to Underlying(s) which are reference rates (including interest rates)***

Reference rates are mainly dependent upon the supply and demand for credit in the money market, i.e., the rates of interest paid on investments, determined by the interaction of supply of and demand for funds in the money market. The supply and demand in the money market on the other hand is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments and political factors, or upon other factors, depending on the specific type of reference rate. Such factors affecting the performance of a reference rate may adversely affect the market value of, and return (if any) on, Products linked thereto.

In principle, the Issuer and/or the Calculation Agent (as the case may be) have no influence on the determination of the reference rate(s). Reference rates are generally calculated by an independent organization or a governmental authority, often based on information provided by market participants. The entity publishing an interest rate or reference rate can modify the calculation method for determining such reference rate or make other methodological changes that could affect the value of the interest rate or reference rate. The calculation or dissemination of such reference rate may also be altered, discontinued or suspended. The entity publishing a reference rate is not involved in the offer and sale of the Products and has no obligation to invest therein. The entity publishing a reference rate may take any actions in respect of such reference rate without regard to the interests of the investors in Products and any of these actions could adversely affect the market value of such Products.

(l) ***Risks associated with Products linked to Derivative Instruments or Fixed Rate Instruments (each an "Instrument")***

(i) *There are risks in relation to each type of Instrument*

Instruments may be linked to different types of underlying assets, including, but not limited to, indices and shares. Risks in relation to each type of underlying asset are described in the section entitled "*Risks associated with certain types of Underlying*".

(ii) *Following the occurrence of certain events in relation to the Instruments, the Instruments may be substituted or the Products may be redeemed early at the non-scheduled early repayment amount*

In the event that an Instrument is terminated or redeemed early or in the event of changes to the terms and conditions of the Instrument, the Instruments may be replaced with another instrument or the Products may be redeemed early at the

unscheduled early redemption amount, which may be zero in the worst case, i.e. the investor may suffer a total loss of the capital invested.

(m) ***Risks associated with Products linked to Underlying(s) which are emerging markets Underlyings***

Investments in so-called emerging markets contain further risk factors in addition to the risks normally associated with the investment in the respective underlying. These include the unstable economic situation, high inflation, increased currency risks as well as political and legal risks. The political and economic structures in emerging markets are sometimes subject to considerable transitions and rapid developments and these countries often lack social, political and economic stability if compared with more industrialised nations. Of particular importance is the increased risk of currency fluctuations. Instability in these countries can also be caused by authoritarian governments or military interference in political and economic decision making. This also includes anti-constitutional (attempted) regime change, civil unrest relating to demands for improved political, economic and social conditions, hostile relations with neighbouring countries or conflicts based on ethnic, religious or racial reasons.

There is also the possibility of restrictions being imposed on foreign investors, expropriation of assets, confiscatory taxation, confiscation or nationalisation of foreign bank deposits or other assets, the introduction of currency controls or other detrimental developments which may adversely affect the success of investments in such countries. Such adverse effects can, under certain circumstances, last for long periods of time, i.e., months or years. Each of these adverse effects may cause what is known as a market disruption in relation to the Products and one of the results of this may be that during this period no prices will be quoted for the Products affected by the market disruption.

The small size and lack of experience on the securities markets in certain countries as well as the limited trading volume of securities can cause an underlying to be less liquid and/or considerably more volatile than underlyings in more established markets. It is possible that very little financial information is available on local issuers, which can make it difficult to assess the value of and/or prospects of the underlying.

In addition, if the underlyings of the Products are quoted in local currency, i.e., not hedged against the currency of the Products, there is an increased foreign exchange risk. Experience shows that the currency exchange rates in emerging markets are subject to particularly high fluctuations. This may result in a considerable negative performance of the Product, even though the performance of the underlying during the term of the Product has essentially remained unchanged or even risen. This may mean that some or all of the total performance of the underlying may be eroded by currency losses and that the performance of the underlying even may become negative.

(n) ***The regulation and reform of certain published rates, indices, and other values or "benchmarks" may adversely affect the value of and return on the Products linked to such values or benchmarks***

A number of major interest rates, other rates, indices and other published values or benchmarks are the subject of national and international regulatory reforms. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on the value of and return on Products linked to any such value or benchmark.

The Benchmark Regulation

The EU Regulation on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the "**Benchmark Regulation**") is a key element of ongoing regulatory reform in the EU and has applied, subject to certain transitional provisions, since 1 January 2018. In addition to so-called "critical benchmarks" such as LIBOR and EURIBOR, other interest rates, foreign

exchange rates, and indices, including equity, commodity and "proprietary" indices or strategies, will in most cases be within scope of the Benchmark Regulation as "benchmarks" where they are used to determine the amount payable under, or the value of, certain financial instruments (including Products listed on an EU regulated market or EU multilateral trading facility (MTF)), and in a number of other circumstances.

The Benchmark Regulation applies to the contribution of input data to a benchmark, the administration of a benchmark, and the use of a benchmark in the EU. Amongst other things, the Benchmark Regulation requires EU benchmark administrators to be authorised or registered as such and to comply with extensive requirements relating to benchmark administration. It also prohibits certain uses by EU supervised entities of (a) benchmarks provided by EU administrators which are not authorised or registered in accordance with the Benchmark Regulation and (b) benchmarks provided by non-EU administrators where (i) the administrator's regulatory regime has not been determined to be "equivalent" to that of the EU, (ii) the administrator has not been recognised in accordance with the Benchmark Regulation, and (iii) the benchmark has not been endorsed in accordance with the Benchmark Regulation.

The Benchmark Regulation could have a material impact on Products linked to a 'benchmark'. For example:

- a rate or index which is a 'benchmark' may not be used in certain ways by an EU supervised entity if (subject to applicable transitional provisions) its administrator does not obtain authorisation or registration (or, if a non-EU entity, does not satisfy the 'equivalence' conditions and is not 'recognised' pending an equivalence decision); and
- the methodology or other terms of the benchmark could be changed in order to comply with the terms of the Benchmark Regulation, and such changes could reduce or increase the rate or level or affect the volatility of the published rate or level, and (depending on the terms of the particular Products) could lead to adjustments to the terms of the Products, including potentially determination by the Calculation Agent of the rate or level in its discretion.

Reform and replacement of Interbank Offered Rates

Amongst other developments, relevant authorities are strongly encouraging the transition away from Interbank Offered Rates ("**IBORs**"), such as LIBOR and EURIBOR, and have identified "risk free rates" to eventually take the place of such IBORs as primary benchmarks. This includes (i) for sterling LIBOR, a reformed Sterling Overnight Index Average ("**SONIA**"), so that SONIA may be established as the primary sterling interest rate benchmark by the end of 2021, (ii) for EONIA and EURIBOR, a new Euro Short-Term Rate (€STR) as the new euro risk-free rate, and (iii) for USD LIBOR, the Secured Overnight Financing Rate ("**SOFR**") to be eventually established as the primary US dollar interest rate benchmark. The risk free rates have a different methodology and other important differences from the IBORs they will eventually replace and have little, if any, historical track record. It is not known whether certain IBORs will continue long-term in their current form.

The reforms and eventual replacement of IBORs with risk free rates may cause the relevant IBOR to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. The replacement risk free rate may have little, if any, historical track record and may be subject to changes in its methodology. Any of these developments could have a material adverse effect on the value of and return on Products linked to any such rates.

- (o) ***Risks associated with Products linked to an Underlying(s) denominated in renminbi***
 - (i) *Renminbi is subject to the People's Republic of China exchange control policies*

Renminbi is not freely convertible and is subject to exchange control policies and restrictions of the People's Republic of China government. As a result of restrictions imposed by the People's Republic of China government on cross-border renminbi fund flows, the availability of renminbi outside the People's Republic of China is limited, which may adversely affect the liquidity of renminbi outside the People's Republic of China, which in turn may adversely affect the market value, and the potential return, of Products linked to or denominated in renminbi.

(ii) *Risks relating to renminbi exchange rate and interest rate*

If specified in the Issue Terms, the Product will be denominated and settled in renminbi outside the People's Republic of China. The exchange rate of, and interest rate for, renminbi outside the People's Republic of China may be different from the same in the People's Republic of China. The value of renminbi against Hong Kong dollar and other foreign currencies fluctuates and is affected by changes in the People's Republic of China and international political, economic and market conditions and by many other factors. There is no guarantee that renminbi will not depreciate and any devaluation of renminbi could adversely affect the market value of the Product. In addition, interest rates for renminbi in the People's Republic of China government are controlled. The People's Republic of China government may further liberalise the regulation of interest rates for renminbi in the People's Republic of China which may increase interest rate volatility for renminbi outside the People's Republic of China. Any fluctuation in interest rates for renminbi outside the People's Republic of China may adversely affect the market value, and the potential return, of the Product.

(iii) *Risks relating to renminbi payment risk*

If the Settlement Currency or Investment Currency of the Product is renminbi, and FX Disruption Event is 'Applicable' in the Issue Terms and has occurred and is continuing on, a scheduled date of payment, payment may be made in the Specified Currency on the postponed payment date if a Specified Currency is chosen in the Issue Terms. In such case, there may be a delay in payments under the Product and no interest will be payable for any such delay. Investors may also suffer a loss in Specified Currency terms if renminbi depreciates against the Specified Currency following the occurrence of an FX Disruption Event.

2.5 ***Risks associated with conflicts of interest of Leonteq AG as Issuer, Lead Manager and Calculation Agent and its subsidiaries and of the discretionary powers of the Issuer and Calculation Agent***

(a) ***Conflicts of interest***

(i) *Conflicts of interest related to the Underlying(s)*

Each of the Issuer, Lead Manager and Calculation Agent and other companies in the Leonteq Group deal in the Underlying(s) or in components of the Underlying(s) or in options or futures contracts relating to the Underlying(s) or components thereof in their normal course of business and from time to time may participate in transactions connected to the Products for their own account or on behalf of others. Companies in the Leonteq Group can also hold interests in individual Underlyings or in the companies contained in these Underlyings, meaning that conflicts of interest can arise in connection with the Products which conflicts could have an impact (including a material adverse impact) on the value of, and return on, the Products.

(ii) *Conflicts of interest related to the performance of another function*

Leonteq Securities AG (or another company in the Leonteq Group) may, in addition to its capacity as Issuer, exercise another function in relation to the

relevant Products or Underlying(s) or components thereof, such as issuing agent, calculation agent, paying agent and/or administrative agent. Therefore, there can be conflicts of interest regarding the duties when determining the prices of the Products and other determinations related thereto among Leonteq Group and the investors. Furthermore, the Issuer, Lead Manager and Calculation Agent and other companies in the Leonteq Group may act as members of a consortium, financial advisor or sponsor in connection with future offers of the relevant Underlying(s) or components thereof; activities of this kind can also entail conflicts of interest and could have an impact (including a material adverse impact) on the value of, and return on, the Products.

(iii) *Conflicts of interest related to the performance of hedging transactions*

The Issuer can use parts or all of the proceeds from the sale of the Products for hedging transactions. These hedging transactions can influence the price of the underlyings or the components of the underlying that is determined on the market. Fluctuations in the price of the Underlying(s) and consequently the Products may among other things be attributed to the fact that the Lead Manager (or any of its affiliate(s) or any entity (or entities) acting on behalf of the Lead Manager) conduct significant volumes of hedging or other types of large transactions in or relating to the Underlying(s). Investors should also note in this respect that, especially in unfavourable conditions (e.g., low liquidity of the Underlying(s)), such transactions can have a significant impact on the value of the Underlying(s) and/or of the components contained therein and thus on the price of the Products, the level of any redemption amount as well as – in the case of Products which may stipulate a redemption by way of delivery – on the type of redemption and possibly lead to certain barrier levels stipulated in the terms and conditions being exceeded or fallen short of.

The hedging entity is entitled to suspend or to stop entirely its trading activities in or related to an Underlying. This market conduct of the hedging entity as well as the limitation of its trading or hedging activities in or related to the Underlying(s) could have an impact (including a material adverse impact) on the value of, and return on, the Products.

(iv) *Conflicts of interest related to the issuance of additional products*

The Issuer and its subsidiaries, the Lead Manager and the Calculation Agent can issue additional products in relation to the Underlying(s) or components of the Underlying(s), including those that have the same or similar features as the Products. The introduction of products that are in competition with the Products can have an impact on the price of the Underlying(s) or components of the Underlying(s) and therefore have an impact on the value of, and return on, the Products.

(v) *Conflicts of interest related to information specific to the Underlying(s)*

The Issuer and its subsidiaries, the Lead Manager and the Calculation Agent can receive non-public information regarding the underlying or components of the Underlying(s), but are not obliged to pass such information on to the investors in the Products. Furthermore, the Issuer and its subsidiaries, the Lead Manager and the Calculation Agent can publish research reports on the underlying or components of the underlying. These activities can give rise to specific conflicts of interest and therefore could have an impact (including a material adverse impact) on the value of, and return on, the Products.

(vi) *Conflicts of interest related to the determination of the selling price of the Products and commission payments*

The selling price of the Products, where appropriate in addition to fixed issue surcharges, management fees or other fees, may contain surcharges that are not

transparent to the investor on the initial mathematical 'fair' value of the Products (the "**margin**"). This margin will be determined by the Issuer in its reasonable discretion and can differ from surcharges that other issuers impose on comparable Products.

The selling price of the Products may contain commission which is charged by the Lead Manager for the issue or which is passed on to distribution partners as payment for distribution services. This may give rise to a difference between the fair value of the Product and the bid and offer prices quoted by any market maker (as described below). Any commission contained in the Products affects the investor's potential rate of return. Furthermore, conflicts of interest detrimental to the investor may arise due to payment of such commission to distribution partners, since it could create an incentive for the partner to sell its customers products with higher commission. Therefore, investors should consult with their principal bank or financial advisor about such conflicts of interest.

(vii) *Conflicts of interest related to market making for the Products*

Under normal market conditions the Lead Manager or, if applicable, a third party (the "**Market Maker**") may quote bid and offer prices for each issue of Products. However, no legal obligations are assumed with respect to the amount or the realisation of such quotations. Investors should note that it may not be possible to sell the Products during their term at a particular point in time or at a particular price.

Furthermore, bid and offer prices for the Products quoted by the Market Maker (if any) will be calculated on the basis of customary pricing models for the sector that are used by the Market Maker and other traders and which determine the theoretical value of the Products by taking into account various factors influencing prices.

Such circumstances on which the Market Maker bases its determination of the bid and offer prices on the secondary market include, in particular, the theoretical value of the Products, which among other things depends on the value of the underlying and the spread between bid and offer prices desired by the Market Maker. In addition, an issue surcharge that is originally imposed on the Products and any fees or costs that are deducted from the redemption amount at maturity, such as commission, administrative fees, transaction costs or comparable costs, will generally be considered. Furthermore, the margin contained in the selling price of the Products, for example, has an impact on pricing in the secondary market or other returns, such as paid or expected dividends or any other returns on the Underlying or its components if the Issuer is entitled to these due to the features of the Products.

Certain costs such as any administrative fees charged are often during pricing not spread equally over the term of the Products (*pro rata temporis*), thereby reducing the price, but instead are deducted in full from the theoretical value of the Products at an earlier point in time determined at the discretion of the Market Maker. The same applies for the margin, if any, contained in the selling price of the Products as well as for dividends and other returns on the underlying if the Issuer is entitled to these due to the features of the Products. These are often not only deducted from the price when the underlying or its components are traded 'ex dividend', but are deducted at an earlier point during the term on the basis of the expected dividends for the whole term or a particular period. The speed of the deduction depends among other things on the amount of any net return flow from the Products to the Market Maker. The prices quoted by the Market Maker can therefore deviate considerably from the theoretical value or value of the Products to be expected based on the above mentioned factors at the relevant point in time. Furthermore, the Market Maker can change the methodology by which the prices are determined at any time, e.g., by increasing or decreasing the spread. The result of such deviation from the theoretical value of the Products can be that bid and

offer prices quoted by other traders for the Products deviate significantly (both upwards and downwards) from the prices quoted by the Market Maker.

(b) ***Discretionary powers of the Issuer and the Calculation Agent, including in relation to the Issuer's hedging arrangements***

There are certain events – relating to the Issuer, the Issuer's hedging arrangements, the Underlying(s), taxation, the relevant currency or other matters – the occurrence of which may give rise to discretionary powers of the Issuer or the Calculation Agent under the terms and conditions of the Products.

In relation to the Underlying(s), a key investment objective of the Products is to allow investors to gain an economic exposure to the Underlying(s). If an Underlying is materially impacted by an unexpected event (for example, a company merges and the original stock that formed an Underlying is restructured or changed, or the rules of an index that is an Underlying are materially modified) or the relevant price, level or value can no longer be calculated, then it may not be possible to achieve the investment objective of the Products based on their original terms. In that case, the Calculation Agent may have discretionary powers under the terms and conditions of the Products to (i) adjust the terms and conditions of the Products, (ii) in certain cases, substitute the Underlying(s) for another, (iii) calculate the relevant price, level or value itself, (iv) postpone payment, (v) redeem the Products early, or (vi) apply some combination thereof.

In relation to the Issuer or the Calculation Agent's hedging arrangements, investors should be aware that (i) in exercising its discretionary powers under the terms and conditions of the Products, each of the Issuer and the Calculation Agent may take into account such factors as it determines appropriate in each case, which may include, in particular, any circumstances or events which have or may have a material impact on the Issuer or the Calculation Agent's hedging arrangements in respect of the Products, and (ii) unless the terms and conditions of the Products provide that certain hedge disruption events do not apply, certain events which affect the Issuer's hedging arrangements can give rise to discretionary powers on the part of the Issuer and the Calculation Agent.

Hedging arrangements are the transactions (if any) entered into by the Issuer or Calculation Agent to seek to cover the Issuer's exposure to the relevant cash amounts to be paid or assets to be delivered under the Products as these fall due. This may involve investing directly in the Underlying(s) or entering into derivative contracts referencing the Underlying(s) or other techniques. The particular hedging arrangements (if any) undertaken by the Issuer or the Calculation Agent, and their cost, will likely be a significant determinant of the issue price and/or economic terms of the Products. Accordingly, if an event occurs which negatively impacts the Issuer or Calculation Agent's hedging arrangements, the Issuer or the Calculation Agent may have options available to it under the terms and conditions of the Products which it may select in its discretion in order to deal with the impact of the event on such hedging arrangements. These options may include adjustment of the terms and conditions of the Products or early redemption of the Products. In the event of early redemption, the early redemption amount may be less than an investor's investment and, therefore, investors could lose some or all of their money.

GENERAL CONDITIONS

1. *Introduction*

The following text comprises the general terms and conditions of the Products (the "**General Conditions**") that, together with the applicable Payout Conditions, the relevant Underlying Specific Conditions and subject to election and completion (and, in the case of Exempt Products, if applicable, amendment) in the Issue Terms (as defined below) (together, the "**Conditions**"), shall be applicable to each Series.

The "**Issue Terms**" mean either (a) where the Products relate to a tranche that are not Exempt Products, the issue specific details will be set out in a final terms document (the "**Final Terms**") or (b) where the Products relate to a tranche of Products that are neither admitted to trading on a regulated market in the European Economic Area or United Kingdom nor offered in the European Economic Area or the United Kingdom in circumstances where a prospectus is required under the Prospectus Regulation (or will be of (or in respect of which a separate prospectus other than the base prospectus under the Programme will be published under the Prospectus Regulation) ("**Exempt Products**"), the issue specific details will be set out in a pricing supplement document (the "**Pricing Supplement**") which may specify other terms and conditions which shall, to the extent so specified or to the extent inconsistent with these General Conditions and/or the applicable Payout Conditions and/or the relevant Underlying Specific Conditions, replace or modify such conditions for the purposes of such Exempt Products, and references to Issue Terms should be construed accordingly.

All capitalised terms that are not defined in these General Conditions have the meanings given to them in the applicable Payout Conditions, the relevant Underlying Specific Conditions or the Issue Terms.

References in these General Conditions to 'Products' are to the Products of one Series only, not to all Products that may be issued pursuant to the European issuance and offering programme established by the Issuer (the "**Programme**").

The Products are issued as a Series of notes ("**Notes**") or certificates ("**Certificates**") by the Issuer and references to 'Products' shall be construed as a reference to each Series accordingly. Certain Products which are in the form of Certificates may be entitled "Warrants" pursuant to the Payout Conditions.

One or more Euroclear Sweden Securities may be transferred in accordance with the Relevant Rules. In the case of an exercise of option resulting in Euroclear Sweden Securities of the same holding having different terms, separate notes registered with the Euroclear Sweden Register shall be issued in respect of those Euroclear Sweden Securities of that holding having the same terms. Such Euroclear Sweden Securities shall only be issued against surrender of the existing Euroclear Sweden Securities in accordance with the Relevant Rules. If the Issue Terms specifies 'FX Disruption Event' to be 'Applicable', upon the occurrence of an FX Disruption Event, the Issuer may take any one or more of the following actions:

- (a) deduct from any payments to be made in respect of the Products an amount calculated by the Calculation Agent as representing a cost, expense, charge and/or deduction arising

in connection with such FX Disruption Event or under any other adjustment with respect thereto; and/or

- (b) make payment of any amount payable by the Issuer pursuant to the Conditions in the Specified Currency instead of the Settlement Currency, the amount payable in the Specified Currency being determined by the Calculation Agent; and/or
- (c) postpone or adjust any Underlying Valuation Date or the relevant Payment Date for any amount payable by the Issuer pursuant to the Conditions until, in the determination of the Calculation Agent, an FX Disruption Event is no longer subsisting; and/or
- (d) (in the case of a Price Source Disruption) specify and adopt:
 - (i) an appropriate alternative fallback or alternative price or rate source or method of determination selected by the Calculation Agent (which may (or may not) be by reference to a Dealer Poll or such other publication page or service as may replace the relevant page or service for the purpose of displaying a foreign exchange rate comparable or equivalent); or
 - (ii) a replacement of any one or more relevant currencies, as the case may be; and/or
- (e) determine whether any other appropriate adjustment can be made to the Conditions and/or any other provisions relating to the Products to account for the economic effect of such FX Disruption Event on the Products which would produce a commercially reasonable result and preserve substantially the economic effect to the Investors of a holding of the relevant Product. If the Calculation Agent determines that an appropriate adjustment or adjustments can be made, the Issuer shall determine the effective date of such adjustment(s), notify the Investors of such adjustment(s) and take the necessary steps to effect such adjustment(s). An Investor will not be charged any costs by or on behalf of the Issuer to make such adjustment(s),

PROVIDED THAT if the Calculation Agent determines that no action that could be made pursuant to paragraphs (a) to (e) above would produce a commercially reasonable result and preserve substantially the economic effect to the Investors of a holding of the relevant Product, the Calculation Agent will notify the Issuer of such determination. In such event, the Issuer may, on giving irrevocable notice to the Investors in accordance with General Condition 15 (*Notices*), redeem all of the Products of the relevant Series on the Unscheduled Early Redemption Date and pay to each Investor, in respect of each Product held by it, an amount equal to the Unscheduled Early Redemption Amount on such date (provided that the Issuer may also, prior to such redemption of the Products, make any adjustment(s) to the Conditions or any other provisions relating to the Products as appropriate in order to (when considered together with the redemption of the Products) account for the effect of such FX Disruption Event on the Products).

Upon the occurrence of an FX Disruption Event, the Issuer shall give notice as soon as practicable to the Investors, stating the occurrence of the FX Disruption Event, giving details thereof and the action proposed to be taken in relation thereto.

7.2 **CNY FX Disruption Event**

If the relevant Issue Terms specifies that 'CNY FX Disruption Event' to be 'Applicable', then the Issuer may, on giving not less than five days' and not more than 30 days' irrevocable notice in accordance with General Condition 16 (*Notices*) to Investors prior to the relevant affected Payment Date, make payment of any amount payable by the Issuer pursuant to the Conditions in the Specified Currency instead of the Settlement Currency, the amount payable in the Specified Currency being determined by the Calculation Agent, on the relevant affected Payment Date in full and final settlement of its obligations to pay such amounts.

8. ***Indicative Amounts***

If the Final Terms provides that the Products are being offered by way of a Public Offer, the Final Terms may specify an indicative amount, subject to a minimum amount and/or a maximum amount, or any combination of the foregoing, as applicable, in relation to any Specified Product

Value which is not fixed or determined at the commencement of the Offer Period. If so specified in the Final Terms, references in these Conditions to such Specified Product Value shall be construed as the amount, level, percentage, price, rate or value (as applicable) determined based on market conditions by the Issuer on or around the end of the Offer Period, and is expected to be the indicative amount specified in the Final Terms (if so specified) but may be different from such indicative amount, and:

- (a) if a minimum amount is provided in the Final Terms, the Specified Product Value will not be less than such minimum amount (but may be equal to such minimum amount); or
- (b) if a maximum amount is provided in the Final Terms, the Specified Product Value will not be more than such maximum amount (but may be equal to such maximum amount); or
- (c) if both a minimum amount and a maximum amount is provided in the Final Terms, the Specified Product Value will not be less than such *minimum* amount and will not be more than such maximum amount (but may be equal to either such minimum amount or such maximum amount).

Notice of the relevant Specified Product Value will be published prior to the Issue Date when such Specified Product Value is fixed or determined by the Issuer on or around the end of the Offer Period and the relevant amount, level, percentage, price, rate or value specified in such notice will be deemed to be the Specified Product Value.

For these purposes, "**Specified Product Value**" means any amount, level, percentage, price, rate or value which is specified in the Conditions as the amount, level, percentage, price, rate or value (as applicable) to be provided in the Final Terms (or phrases of similar import).

9. ***Effect of Adjustments***

All determinations made by the Calculation Agent pursuant to the Conditions shall be conclusive and binding on the Investors, the Paying Agent and the Issuer, except in the case of manifest error.

10. ***Events of Default***

- (a) ***Events of Default:*** Events of Default means any of the following (each, an "**Event of Default**"):
 - (i) the Issuer does not pay any material amount in respect of the Products when such amount is due and payable and such failure continues for 30 calendar days; or
 - (ii) the Issuer fails to deliver any Entitlement on the due date for delivery and such failure to deliver has not been remedied within 30 calendar days of notice of such failure having been given to the Issuer by any Investor, provided that an Event of Default shall not occur under this General Condition 10 if (i) any of the conditions to settlement to be satisfied by the Investor have not been so satisfied as at the due date for delivery or (ii) the Issuer has elected to pay the Settlement Disruption Amount; or
 - (iii) an order is made or an effective resolution is passed for the winding-up of the Issuer (other than in connection with a merger or an amalgamation) or the Swiss Financial Market Supervisory Authority (FINMA) (i) initiates bankruptcy proceedings with respect to the Issuer, (ii) initiates re-organisation measures affecting rights of creditors generally with respect to the Issuer or (iii) takes protective measures with respect to the Issuer to the effect of prohibiting it to make or receive payments or settle securities transactions, terminating its business operations or granting a payment moratorium.
- (b) ***Consequences of Event of Default:*** If an Event of Default with respect to any Product of a Series at the time outstanding occurs and is continuing, then in every such case, unless the principal of all of the Products of such Series shall have already become due and

payable, the Investors of at least 25 per cent. in principal amount of the outstanding Products of that Series may declare the principal amount of all of Products of that Series to be due and payable immediately, by a notice in writing to the Issuer, and upon any such declaration, the Unscheduled Early Repayment Amount, together with the premium, if any, accrued and unpaid interest, if any, and any additional amount in respect of principal which may be payable under General Condition 5 (*Payments and Deliveries*), shall become immediately due and payable. For the purposes of calculating any Unscheduled Early Redemption Amount at any time following an Event of Default, the Calculation Agent will ignore the effect of such Event of Default upon the market value of the Products.

At any time after such a declaration of acceleration with respect to Products of any Series has been made and before a judgment or decree for payment of the money due has been obtained, Investors of at least a majority in principal amount of outstanding securities of that Series, by written notice to the Issuer and the relevant Paying Agent, may rescind and annul such declaration and its consequences if the Issuer, has paid or deposited with the relevant Paying Agent, a sum sufficient to pay in the Specified Currency in which the Products of such Series are payable:

- (i) all overdue interest, if any, on all Products of that Series;
- (ii) the principal of Products of that Series which have become due otherwise than by such declaration of acceleration and interest thereon at the Rate of Interest, as the case may be, applicable to that Series; and
- (iii) all Events of Default with respect to Products of that Series, other than the non-payment of the principal of Products of that Series, which have become due solely by such declaration of acceleration, have been cured or waived as provided below. No such rescission shall affect any subsequent default or impair any right consequent thereon.

The Investors of at least a majority in principal amount of the outstanding securities of any Series of Euroclear Sweden Securities may on behalf of the Investors of all the Euroclear Sweden Securities of such Series waive any past default hereunder with respect to such Series and its consequences, except a default in the payment of the principal of or interest, if any, on any Products of such Series, or in the payment of any sinking fund instalment or analogous obligation with respect to the Products of such Series. Upon any such waiver, such default shall cease to exist, and any Event of Default arising therefrom shall be deemed to have been cured, for every purpose of the Products of such Series, but no such waiver shall extend to any subsequent or other default or impair any right consequent thereon.

11. **Agents**

11.1 **Appointment of Agents**

Pursuant to the terms of each agency agreement entered into after 16 June 2020 in relation to the issuance of any Products under this Programme, the Agents act solely as agents of the Issuer. In respect of all Products other than SIX SIS Securities, in all circumstances the Calculation Agent shall make such determinations and calculations in good faith and in a commercially reasonable manner, and (save in the case of manifest or proven error) such determinations and calculations shall be final and binding on the Issuer, the Paying Agent and the Investors. In respect of all SIX SIS Securities, in all circumstances the Calculation Agent shall make such determinations and calculations in accordance with the standard of duly exercised discretion, and (save in the case of manifest or proven error) such determinations and calculations shall be final and binding on the Issuer, the Paying Agent and the Investors.

Where the Issuer or the Paying Agent is prevented from effecting payment or delivery due to such event, payment or delivery may be postponed until the time the event or circumstance impeding payment has ceased, and shall have no obligation to pay or deliver any additional amounts in respect of such postponement.

12. Taxation

The Issuer is not liable for, or otherwise obliged to pay amounts in respect of, any Taxes borne by an Investor. An Investor must pay all Taxes arising from or payable in connection with all payments relating to the Products and all payments in respect of the Products shall be made free and clear of, and without withholding or deduction for, any present or future Taxes of whatever nature imposed, levied, collected, withheld or assessed by or within the Issuer Jurisdiction (or

any authority or political subdivision thereof or therein having power to tax) unless such withholding or deduction is required by law or in connection with FATCA.

In that event, the appropriate withholding or deduction shall be made and the Issuer shall pay such additional amounts as may be necessary in order that the net amounts receivable by the relevant Investor shall equal the respective amounts that would have been receivable by such Investor in the absence of such withholding or deduction. Notwithstanding the above, no additional amounts shall be payable with respect to any Product:

- (a) to, or to a third party on behalf of, an Investor who is liable for such Taxes in respect of such Products by reason of them having a connection with the Issuer Jurisdiction other than the mere holding of the relevant Product or Coupon;

13. ***Prescription***

Claims for payment of principal shall become void unless made within ten years and claims for interest shall become void unless made within five years of the appropriate Relevant Date.

14. ***Early Redemption for Unlawfulness or Impracticability***

effective and binding obligations of the New Issuer have been initiated, fulfilled and performed and are, without limitation, legally valid and effective,

In the event of any such substitution, any reference in the Conditions to the Issuer shall be construed as a reference to the New Issuer. Such amount shall be paid to Investors via SIX SIS AG on a delivery versus payment basis.

No further Investors' claims exist against the Collateral Agent, SIX SIS AG or other persons which are involved in the collateralisation service for the TCM Secured Product under the terms of the TCM Security Agreement.

If the same event is deemed to constitute both a Realization Event and an Event of Default, the provisions of this General Condition 12.1 shall prevail.

(b) *Taxes, fees or other duties*

All taxes, fees and other duties incurred in connection with the payment of the TCM Secured Product Early Redemption Amount shall be borne and paid by the Investor. SHARE LINKED CONDITIONS

The provisions of these Share Linked Conditions shall apply to Share Linked Products in respect of each Underlying which is a Share.

1. *Consequences of Disrupted Days*

1.1 **Single Share and Underlying Valuation Dates**

Where the Products relate to a single Share (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the Share on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the Share in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.1(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Individual Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of a Basket Component, then the Underlying Valuation Date in respect of the relevant Basket Component shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of the relevant Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of the relevant Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and

2.1 **Consequences of a Potential Adjustment Event**

If the Calculation Agent determines that a Potential Adjustment Event has occurred in relation to a Share, the Calculation Agent will determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of such Share and, if so, the Issuer and/or Calculation Agent may (but is not obliged to):

- (a) (i) make the corresponding adjustment(s), if appropriate, to the Conditions as the Calculation Agent determines appropriate to account for that diluting or concentrative effect; and

- (ii) determine the effective date(s) of the adjustment(s). In such case, such adjustments shall be deemed to be so made from such date(s). The Issuer and/or Calculation Agent may (but need not) perform the appropriate adjustment(s) by reference to the adjustment(s) in respect of such Potential Adjustment Event made by the Related Exchange(s); or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

- (ii) in respect of a Nationalisation, Insolvency or Delisting, on or after the date of the occurrence of the Nationalisation, Insolvency and/or Delisting, as determined by the Calculation Agent, the Issuer and/or Calculation Agent may (A) make such adjustment to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of the relevant event, (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Share), which may, but need not, be determined by reference to the adjustment(s) made in respect of a Nationalisation, Insolvency or Delisting by the Related Exchange(s) to options on the Share traded thereon and (B) determine the effective date of that adjustment; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the

Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products); or

- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement, as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.4 **Notice of Adjustments**

Upon making any such adjustment pursuant to this Share Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Share). Upon making any such adjustment, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

4. ***Correction of Prices***

In the event that a Relevant Underlying Price is subsequently corrected and the correction (the "**Corrected Price**") is published by the Exchange on or before the Business Day prior to the next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Underlying Price, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Price, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms

of the Products to account for such Corrected Price. Any such determination or adjustment and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

1.1 Single Participation Certificate and Underlying Valuation Dates

Where the Products relate to a single Participation Certificate (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and

In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15 (*Notices*).

In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Participation Certificates in the basket (each such Participation Certificate an "**Affected Participation Certificate**" in respect of such Underlying Valuation Date);
- (b) in respect of each Participation Certificate in the basket that is not an Affected Participation Certificate, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and

2. **Potential Adjustment Events and Extraordinary Events**

2.1 **Consequences of a Potential Adjustment Event**

If the Calculation Agent determines that a Potential Adjustment Event has occurred in relation to a Participation Certificate, the Calculation Agent will determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of such

Participation Certificate and if so, the Issuer and/or Calculation Agent may (but is not obliged to):

- (a) (i) make the corresponding adjustment(s), if appropriate, to the Conditions as the Calculation Agent determines appropriate to account for that diluting or concentrative effect; and
- (ii) determine the effective date(s) of the adjustment(s). In such case, such adjustments shall be deemed to be so made from such date(s). The Issuer and/or Calculation Agent may (but need not) perform the appropriate adjustment(s) by reference to the adjustment(s) in respect of such Potential Adjustment Event made by the Related Exchange(s); or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. - (ii) in respect of a Nationalisation, Insolvency or Delisting, on or after the date of the occurrence of the Nationalisation, Insolvency and/or Delisting, as determined by the Calculation Agent, the Issuer and/or Calculation Agent may (A) make such adjustment to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of the relevant event, (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Participation Certificate), which may, but need not, be determined by reference to the adjustment(s) made in respect of a Nationalisation, Insolvency or Delisting by the Related Exchange(s) to options on the Participation Certificate traded thereon and (B) determine the effective date of that adjustment; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products); or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.4 **Notice of Adjustments**

Upon making any such adjustment pursuant to this Participation Certificate (*Genussscheine*) Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Participation Certificate); or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

4. ***Correction of Prices***

In the event that a Relevant Underlying Price is subsequently corrected and the correction (the "**Corrected Price**") is published by the Exchange on or before the Business Day prior to the

next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Underlying Price, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Price, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Price. Any such determination or adjustment and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.1(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.2 **Basket of Underlyings and Underlying Valuation Dates – Individual Postponement of Underlying Valuation Dates**

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Individual Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of a Basket Component, then the Underlying Valuation Date in respect of the relevant Basket Component shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of the relevant Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of the relevant Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.2 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for the relevant Basket Component may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Basket Component or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.2(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.3 Basket of Underlyings and Underlying Valuation Dates – Common Postponement of Underlying Valuation Dates

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Common Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of any Basket Component, then the Underlying Valuation Date in respect of all Basket Components shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of any Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of any Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Indices in the basket (each such Index an "**Affected Index**" in respect of such Underlying Valuation Date);
- (b) in respect of each Index in the basket that is not an Affected Index, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and
- (c) in respect of each Affected Index, the Calculation Agent shall determine its estimate of the relevant level of such Basket Component(s) on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of such Affected Index(ices) in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.3 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for each Affected Index may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Affected Index or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.3(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

2. Successor Index Sponsor, Successor Index and Index Adjustment Events

2.1 Successor Index Sponsor and Successor Index

- (a) If an Index is (i) not calculated and announced by the Index Sponsor but is calculated and announced by a successor to the Index Sponsor (a "**Successor Index Sponsor**") acceptable to the Calculation Agent; or (ii) replaced by a successor index using, in the determination of the Calculation Agent, the same or a substantially similar formula for, and method of, calculation as used in the calculation of such Index, then in each case that index (the "**Successor Index**") will be deemed to be the Index.
- (b) If either of the events described in (a) above have occurred, the Issuer and/or Calculation Agent may make such adjustment(s) that it determines to be appropriate, if any, to any variable, calculation methodology, valuation, settlement, payment terms or any other

terms of the Products to account for such Successor Index. Upon making any such adjustment the Issuer and/or Calculation Agent shall give notice to the Investors, giving details of the adjustment, in accordance with General Condition 15 (*Notices*).

- (c) If the Calculation Agent determines that no adjustment as described in (b) above (or in paragraph 2.3 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.2 Index Adjustment Events

- (a) If, in respect of an Index, the Calculation Agent determines that an Index Adjustment Event has occurred, the Calculation Agent shall determine if such event has a material effect on the Products and, if so, shall calculate the relevant amount using, in lieu of a published level for the Index, the level for the Index as at the relevant date as determined by the Calculation Agent in accordance with the formula for and method of calculating the Index last in effect prior to that change, failure or cancellation, but using only those securities that comprised the Index immediately prior to that event and shall notify the Investors thereof (in accordance with General Condition 15 (*Notices*)). None of the Issuer and/or Calculation Agent or the Paying Agent shall have any responsibility in respect of any error or omission or subsequent correction made in the calculation or publication of an index, whether caused by negligence or otherwise.
- (b) If the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.3 Additional Adjustments in respect of a Basket of Underlyings

Where the Products relate to a basket of Underlyings, if in relation to a Basket Component an adjustment (as described in Index Linked Condition 2.1 or 2.2) is necessary, the Issuer and/or Calculation Agent shall (in addition to the adjustments pursuant to such Index Linked Conditions in relation to each such Basket Component (an "**Affected Basket Component**")) be entitled, but not obliged to either:

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products);
or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed

to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.4 **Notice of Adjustments**

Upon making any such adjustment pursuant to this Index Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15, stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

3. ***Consequences of an Additional Disruption Event***

If the Calculation Agent determines that an Additional Disruption Event has occurred, the Issuer and/or Calculation Agent may:

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

4. ***Correction of Levels***

In the event that a Relevant Level is subsequently corrected and the correction (the "**Corrected Level**") is published by the Index Sponsor on or before the Business Day prior to the next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Level, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Level, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Level. Any such determination or adjustment and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

DEPOSITORY RECEIPT LINKED CONDITIONS

The provisions of these Depository Receipt Linked Conditions shall apply to Depository Receipt Linked Products in respect of each Underlying which is a Depository Receipt.

1. *Consequences of Disrupted Days*

1.1 **Single Depository Receipt and Underlying Valuation Dates**

Where the Products relate to a single Depository Receipt (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the Depository Receipt on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the Depository Receipt in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph (a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.2 **Basket of Underlyings and Underlying Valuation Dates – Individual Postponement of Underlying Valuation Dates**

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Individual Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of a Basket Component, then the Underlying Valuation Date in respect of the relevant Basket Component shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of the relevant Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of the relevant Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.2 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for the relevant Basket Component may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Basket Component or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.2(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.3 Basket of Underlyings and Underlying Valuation Dates – Common Postponement of Underlying Valuation Dates

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Common Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of any Basket Component, then the Underlying Valuation Date in respect of all Basket Components shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of any Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of any Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Depository Receipts in the basket (each such Depository Receipt an "**Affected Depository Receipt**" in respect of such Underlying Valuation Date);
- (b) in respect of each Depository Receipt in the basket that is not an Affected Depository Receipt, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and
- (c) in respect of each Affected Depository Receipt, the Calculation Agent shall determine its estimate of the relevant level of such Basket Component(s) on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of such Affected Depository Receipt(s) in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.3 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for each Affected Depository Receipt may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Affected Depository Receipt or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph (a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

2. Adjustments

2.1 Consequences of a Potential Adjustment Event

If the terms of the Deposit Agreement are amended or supplemented following a Potential Adjustment Event (as determined by the Calculation Agent) in relation to the relevant Depository Receipt, the Calculation Agent will determine whether such Potential Adjustment

Event has a diluting or concentrative effect on the theoretical value of such Depository Receipt and, if so, the Issuer and/or Calculation Agent may (but is not obliged to):

- (a) (i) make the corresponding adjustment(s), if appropriate, to the Conditions as the Calculation Agent determines appropriate to account for that diluting or concentrative effect; and
- (ii) determine the effective date(s) of the adjustment(s). In such case, such adjustments shall be deemed to be so made from such date(s). The Issuer and/or Calculation Agent may (but need not) perform the appropriate adjustment(s) by reference to the adjustment(s) in respect of such Potential Adjustment Event made by the Related Exchange(s); or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.4) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.2 Consequences of an Extraordinary Event

If the Calculation Agent determines that an Extraordinary Event has occurred in respect of a Depository Receipt, the following will apply:

- (a) (i) in respect of a Merger Event or Tender Offer, on or after the relevant Merger Date or Tender Offer Date (or such other date as the Calculation Agent deems relevant), the Issuer and/or Calculation Agent may (A) make such adjustment to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Merger Event or Tender Offer (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Underlying Share or to the Depository Receipt), which may, but need not, be determined by reference to the adjustment(s) made in respect of such Merger Event or Tender Offer by the Related Exchange(s) to options on the relevant Underlying Share or on the Depository Receipt traded thereon and (B) determine the effective date of that adjustment; or
- (ii) in respect of a Nationalisation, Insolvency or Delisting, on or after the date of the occurrence of the Nationalisation, Insolvency and/or Delisting, as determined by the Calculation Agent, the Issuer and/or Calculation Agent may (A) make such adjustment to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of the relevant event, (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Underlying Share or the Depository Receipt), which may, but need not, be determined by reference to the adjustment(s) made in respect of a Nationalisation, Insolvency or Delisting by the Related Exchange(s) to options on the Underlying Share or on the Depository Receipt traded thereon and (B) determine the effective date of that adjustment; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.4) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.3 Consequences of a termination of the Deposit Agreement

If the Deposit Agreement is terminated, then on or after the date of such termination:

- (a) both:
 - (i) references to the Depository Receipt shall be replaced by references to the Underlying Shares; and
 - (ii) the Issuer and/or Calculation Agent may adjust any relevant terms and will determine the effective date of such replacement and adjustments; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.4 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.4 Additional Adjustments in respect of a basket of Underlyings

Where the Products relate to a basket of Underlyings, if in relation to a Basket Component an adjustment (as described in Depository Receipt Linked Condition 2.1 to 2.3) is necessary, the Issuer and/or Calculation Agent shall (in addition to the adjustments pursuant to such Depository Receipt Linked Conditions in relation to each such Basket Component (an "**Affected Depository Receipt**")) be entitled, but not obliged to, either:

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products); or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event (including adjustments to account for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Underlying Share or Depository Receipt); or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

4. ***Correction of Prices***

In the event that a Relevant Underlying Price is subsequently corrected and the correction (the "**Corrected Price**") is published by the Exchange on or before the Business Day prior to the next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Underlying Price, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Price, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Price. The provisions of these Commodity Linked Conditions shall apply to Commodity Linked Products in respect of each Underlying which is a Commodity.

1. *Consequences of Disrupted Days*

1.1 **Single Commodity and Underlying Valuation Dates**

Where the Products relate to a single Commodity (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the Commodity on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the Commodity in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.1(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.2 **Basket of Underlyings and Underlying Valuation Dates – Individual Postponement of Underlying Valuation Dates**

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Individual Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of a Basket Component, then the Underlying Valuation Date in respect of the relevant Basket Component shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of the relevant Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of the relevant Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15.

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.2 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for the relevant Basket Component may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Basket Component or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.2(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.3 **Basket of Underlyings and Underlying Valuation Dates – Common Postponement of Underlying Valuation Dates**

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Common Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of any Basket Component, then the Underlying Valuation Date in respect of all Basket Components shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of any Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of any Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Commodities in the basket (each such Commodity an "**Affected Commodity**" in respect of such Underlying Valuation Date);
- (b) in respect of each Commodity in the basket that is not an Affected Commodity, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and
- (c) in respect of each Affected Commodity, the Calculation Agent shall determine its estimate of the relevant level of such Basket Component(s) on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of such Affected Commodity(ies) in accordance with General Condition 15 (*Notices*).

2. **Adjustments**

2.1 **Substitution of Reference Market and/or Price Source**

- (a) If the quotation of or trading in the Commodity on the Reference Market or the publication of the relevant price of the Commodity by the Price Source is permanently discontinued while concurrently the quotation or trading is maintained or is commenced on another reference market (the "**Substitute Reference Market**") or if the relevant price of the Commodity is published by another price source (the "**Substitute Price Source**"), the Calculation Agent shall be entitled to stipulate the Substitute Reference Market as the new Reference Market and/or the Substitute Price Source as the Price Source through publication in accordance with General Condition 15 (*Notices*).

In the case of such a substitution, any reference in the Conditions to the Reference Market and/or Price Source thereafter shall be deemed to refer to the Substitute Reference Market and/or Substitute Price Source.

- (b) If the Calculation Agent determines that no substitution as described in (a) above would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15, in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.2 Changes in the Commodity

- (a) If at any time the Commodity is terminated and/or replaced by another value or if the Commodity is traded in a different quality, in a different consistency (e.g., with a different degree of purity or a different point of origin) or in a different standard measuring unit, the Issuer and/or Calculation Agent are entitled to make an adjustment to the Conditions, which in the assessment of the Calculation Agent is appropriate to reflect the amendments and/or to replace the Commodity with a successor commodity (the "**Successor Commodity**") which is economically equivalent to the original relevant concept of the Commodity.

The Issuer and/or Calculation Agent will multiply the relevant price of the Commodity by an adjustment factor in order to ensure the continuity of the development of the reference value(s) underlying the Products. The Successor Commodity and the date of its initial application shall be published in accordance General Condition 15 (*Notices*). Any reference in the Conditions to the Commodity shall, to the extent appropriate, be deemed to refer to the Successor Commodity.

- (b) If the Calculation Agent determines that no adjustment as described in (a) above would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2.3 Additional Adjustments in respect of a basket of Underlyings

Where the Products relate to a basket of Underlyings, if in relation to a Basket Component an adjustment (as described in Commodity Linked Condition 2.1 and 2.2) is necessary, the Issuer and/or Calculation Agent shall (in addition to the adjustments pursuant to such Commodity Linked Conditions in relation to each such Basket Component (an "**Affected Commodity**")) be entitled, but not obliged to, either:

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products);
or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket

Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.4 **Notice of Adjustments**

Upon making any such adjustment pursuant to this Commodity Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

3. ***Consequences of an Additional Disruption Event***

If the Calculation Agent determines that an Additional Disruption Event has occurred, the Issuer and/or Calculation Agent may:

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event; or
- (b) if the Calculation Agent determines that no adjustment as described in (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

4. ***Correction of Prices***

In the event that a Relevant Underlying Price is subsequently corrected and the correction (the "**Corrected Price**") is displayed on the relevant Price Source and/or published by the Reference Market on or before the Business Day prior to the next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Underlying Price, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Price, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Price. Any such determination or adjustment and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

CURRENCY EXCHANGE RATE LINKED CONDITIONS

The provisions of these Currency Exchange Rate Linked Conditions shall apply to Currency Exchange Rate Linked Products in respect of each Underlying which is a Currency Exchange Rate.

1. *Consequences of Disrupted Days*

1.1 **Single Currency Exchange Rate and Underlying Valuation Dates**

Where the Securities relate to a single Currency Exchange Rate (and if the Issue Terms specify that this provision shall apply to particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the Currency Exchange Rate on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the Currency Exchange Rate in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.1(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.2 **Basket of Underlyings and Underlying Valuation Dates – Individual Postponement of Underlying Valuation Dates**

Where the Securities relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Individual Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of a Basket Component, then the Underlying Valuation Date in respect of the relevant Basket Component shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of the relevant Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of the relevant Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.2 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for the relevant Basket Component may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Basket Component or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.2(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.3 Basket of Underlyings and Underlying Valuation Dates – Common Postponement of the Underlying Valuation Dates

Where the Securities relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Common Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of any Basket Component, then the Underlying Valuation Date in respect of all Basket Components shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of any Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of any Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Currency Exchange Rates in the basket (each such Currency Exchange Rate an "**Affected Currency Exchange Rate**" in respect of such Underlying Valuation Date);
- (b) in respect of each Currency Exchange Rate in the basket that is not an Affected Currency Exchange Rate, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and
- (c) in respect of each Affected Currency Exchange Rate, the Calculation Agent shall determine its estimate of the relevant level of such Basket Component(s) on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of such Affected Currency Exchange Rate(s) in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.3 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for each Affected Currency Exchange Rate may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Affected Currency Exchange Rate or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.3(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

2. Adjustment Events

2.1 Adjustments for changes in the market conditions on the Reference Market

If the Calculation Agent determines that a material change in the market conditions has occurred on the Reference Market, the Issuer and/or Calculation Agent shall be entitled to effect adjustments to the Conditions to account for these changed market conditions.

2.2 Adjustments for changes in the calculation of the Currency Exchange Rate

Any changes in the calculation (including corrections) of the Currency Exchange Rate or in the composition or weighting of the price or other reference parameters upon which the Currency

Exchange Rate is based on (as compared to the Issue Date) shall not lead to an adjustment unless the Calculation Agent determines that, as a result of the changes (including corrections), the underlying concept and calculation of the Currency Exchange Rate are no longer comparable to the underlying concept or calculation of the Currency Exchange Rate applicable prior to such change. Adjustments may also be made as a result of the removal of the Currency Exchange Rate and/or its substitution by another underlying.

For the purpose of making any adjustments, the Calculation Agent shall determine an adjusted value per unit of the Currency Exchange Rate which shall be used for the determination of the relevant price of the Currency Exchange Rate for the Products and which in its economic result shall correspond to the provisions prior to this change. The Calculation Agent shall also determine the day on which the adjusted value per unit of the Currency Exchange Rate shall apply for the first time, taking into account the time the change occurred. The adjusted value per unit of the Currency Exchange Rate and the date of its first application shall be published pursuant to General Condition 15.

2.3 **Adjustments for changes in the currency used in connection with the Currency Exchange Rate**

If any Relevant Currency (the "**Affected Currency**") in its function as legal tender in the country(ies) or jurisdiction(s) maintaining the authority, institution or other body which issues such currency is replaced by another currency or merged with another currency to become a common currency (in each case, the "**Successor Currency**"), the Affected Currency shall be replaced, for the purposes of these Conditions, by the Successor Currency provided that, if applicable, the appropriate adjustments according to paragraph 2.2 above have been made. The Successor Currency and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

In this case, any reference in these Conditions to the Affected Currency shall, to the extent appropriate, be deemed to refer to the Successor Currency.

2.4 **Adjustments for replacement of the Reference Market**

If the quotation of or trading in any Relevant Currency on the Reference Market is permanently discontinued while a quotation or trading is concurrently started up or maintained on another market (the "**Substitute Reference Market**"), the Calculation Agent shall be entitled to stipulate the Substitute Reference Market as the relevant Reference Market via publication in accordance with General Condition 15 (*Notices*), provided that the Issuer has not terminated the Products in accordance with these Currency Exchange Rate Linked Conditions.

In the case of such a substitution, any reference in these Conditions to the Reference Market thereafter shall be deemed to refer to the Substitute Reference Market.

The adjustment described above shall be published in accordance with General Condition 15 (*Notices*) within the three-month period following the permanent discontinuation of the quotation of or trading in such Relevant Currency on the Reference Market.

2.5 **Additional Adjustments in respect of a Basket of Underlyings**

Where the Products relate to a basket of Underlyings, if, in relation to a Basket Component, an adjustment (as described in this Currency Exchange Rate Linked Condition 2) is necessary, the Issuer and/or Calculation Agent shall (in addition to the adjustments pursuant to such Currency Exchange Rate Linked Condition in relation to each such Basket Component (an "**Affected Basket Component**")) be entitled, but not obliged to, either:

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products);
or

- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.6 **Notice of Adjustments**

Upon making any such adjustment pursuant to this Currency Exchange Rate Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

2.7 **Early Termination due to an Adjustment Event**

If the Calculation Agent determines that no adjustment as described in paragraph 2.1 to 2.5 above would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15, in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15.

3. ***Consequences of an Additional Disruption Event***

If the Calculation Agent determines that an *Additional Disruption Event* has occurred, the Issuer and/or Calculation Agent may:

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such *Additional Disruption Event* (including adjustments to account for changes in volatility relevant to the *Currency Exchange Rate*); or
- (b) if the Calculation Agent determines that no adjustment as described in paragraph (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

4. ***Correction of Rates***

In the event that a *Relevant Rate* is subsequently corrected and the correction (the "*Corrected Rate*") is displayed on the relevant *Price Source* on or before the *Business Day* prior to the next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the *Relevant Rate*, then the Calculation Agent shall be entitled to determine the amount payable or *Entitlement deliverable* or make any such determination in

connection with the Products after taking into account such Corrected Rate, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Rate. Any such determination or adjustment and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.2 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for the relevant Basket Component may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Basket Component or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.2(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.3 **Basket of Underlyings and Underlying Valuation Dates – Common Postponement of the Underlying Valuation Dates**

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Common Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of any Basket Component, then the Underlying Valuation Date in respect of all Basket Components shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of any Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of any Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Futures Contracts in the basket (each such Futures Contract an "**Affected Futures Contract**" in respect of such Underlying Valuation Date);
- (b) in respect of each Futures Contract in the basket that is not an Affected Futures Contract, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and
- (c) in respect of each Affected Futures Contract, the Calculation Agent shall determine its estimate of the relevant level of such Basket Component(s) on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of such Affected Futures Contract(s) in accordance with General Condition 15 (*Notices*).

2. ***Adjustment Events***

2.1 **Substitution of Reference Market and/or Price Source**

If the quotation of or trading in a Futures Contract on the Reference Market or the publication of the relevant price of such Futures Contract by the Price Source is permanently discontinued while the quotation or trading is concurrently maintained or is commenced on another reference market (the "**Substitute Reference Market**") or if the relevant price of such Futures Contract is published by another price source (the "**Substitute Price Source**"), the Calculation Agent shall be entitled to stipulate such Substitute Reference Market as the new Reference Market and/or such Substitute Price Source as the new Price Source through publication in accordance

with General Condition 15 (*Notices*). In the case of such a substitution, any reference in the Conditions to the Reference Market and/or Price Source thereafter shall be deemed to refer to the Substitute Reference Market and/or Substitute Price Source.

2.2 Changes in the Futures Contract

If at any time (a) a Futures Contract is terminated and/or replaced by another value or (b) the relevant contract characteristics and/or conditions of such Futures Contract or the value underlying such Futures Contract are changed, the Issuer and/or Calculation Agent may, but are not obliged to, make an adjustment to the Conditions, which in the assessment of the Calculation Agent is appropriate to reflect the events described in (a) and (b) of this paragraph 2.2 and/or to replace such Futures Contract with a successor futures contract (the "**Successor Futures Contract**") which is economically equivalent to the original concept of such Futures Contract.

As the case may be, the Issuer and/or Calculation Agent will multiply the relevant price of the Futures Contract by an adjustment factor in order to ensure the continuity of the development of the reference value(s) underlying the Products.

The Successor Futures Contract and the date of its initial application shall be published in accordance with General Condition 15. Any reference in the Conditions to the Futures Contract shall, to the extent appropriate, be deemed to refer to the Successor Futures Contract.

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products); or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.4 Notice of Adjustments

Upon making any such adjustment pursuant to this Futures Contract Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

2.5 **Early Termination due to an Adjustment Event**

If the Calculation Agent determines that no adjustment as described in paragraph 2.1 or 2.2 above would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

3. ***Consequences of an Additional Disruption Event***

If the Calculation Agent determines that an Additional Disruption Event has occurred, the Issuer and/or Calculation Agent may:

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event; or
- (b) if the Calculation Agent determines that no adjustment as described in paragraph (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15.

4. ***Correction of Prices***

In the event that a Relevant Underlying Price is subsequently corrected and the correction (the "Corrected Price") is displayed on the relevant Price Source on or before the Business Day prior to the next date on which any relevant payment or delivery may have to be made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Underlying Price, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Price, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Price. 1. Consequences of Disrupted Days**1.1 Single Fund and Underlying Valuation Dates**

Where the Products relate to a single ETF Share (and if the Issue Terms specify that this provision shall apply to particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the ETF Share on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the ETF Share in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.1(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15 (*Notices*).

2. **Potential Adjustment Events and Extraordinary Events**

2.1 **Consequences of a Potential Adjustment Event**

If the Calculation Agent determines that a Potential Adjustment Event has occurred or is likely to occur and such Potential Adjustment Event Adjustment has a diluting or concentrative effect on the theoretical value of an ETF Share, the Issuer and/or Calculation Agent may (but is not obliged to):

- (a) (i) make the corresponding adjustment(s), if appropriate, to the Conditions as the Calculation Agent determines appropriate to account for that diluting or concentrative effect; and
- (ii) determine the effective date(s) of the adjustment(s). In such case, such adjustments shall be deemed to be so made from such date(s). The Issuer and/or

Calculation Agent may (but need not) perform the appropriate adjustment(s) by reference to the adjustment(s) in respect of such Potential Adjustment Event and exchange contracts on the ETF Shares that are traded on such Related Exchange; or

- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*.  - (ii) if the Calculation Agent determines that no adjustment that it could make pursuant to paragraph 2.2(a)(i) above leads to a commercially reasonable result, then the Calculation Agent may select:
 - (A) another fund that is in the same currency and has the same investment objective as the relevant Fund (the "**Replacement Fund**"); and
 - (B) the applicable day (the "**Fund Replacement Date**") for the replacement of the relevant Fund with the Replacement Fund (for the avoidance of doubt, the Calculation Agent may set the Fund Replacement Date as any date, including any date before the occurrence of the relevant Extraordinary Event or the Issue Date),

in which case, (I) the Replacement Fund replaces the Relevant Fund on the Fund Replacement Date, (II) references herein to the Fund are deemed, from the Fund Replacement Date, to be references to the Replacement Fund and (III) the Issuer and/or Calculation Agent in its reasonable discretion undertakes the appropriate adjustments to variables that it considers to be appropriate, as the case may be, regarding the calculation methods, the valuation, settlement or payment terms in respect of the Products to account for such substitution; or

- (b) if the Calculation Agent determines that no adjustment as described in (a) above (or in paragraph 2.3 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the *Unscheduled Early Redemption Amount*. - (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products); or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

- (b) if the Calculation Agent determines that no adjustment as described in paragraph (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

Any adjustment made by the Issuer and/or Calculation Agent pursuant to this ETF Linked Condition 3 shall be notified to Investors, stating the relevant adjustment and the effective date of such adjustment, in accordance with General Condition 15 (*Notices*).

FUND LINKED CONDITIONS

The provisions of these Fund Linked Conditions shall apply to Fund Linked Products in respect of each Underlying which is a Fund Unit.

1. *Consequences of Disrupted Days*

1.1 **Single Fund and Underlying Valuation Dates**

Where the Products relate to a single Fund Unit (and if the Issue Terms specify that this provision shall apply to particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day, then the Underlying Valuation Date shall be the next following Scheduled Trading Day that is not a Disrupted Day, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the Fund Unit on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the Fund Unit in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.1 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.1(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.2 **Basket of Underlyings and Underlying Valuation Dates – Individual Postponement of Underlying Valuation Dates**

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Individual Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of a Basket Component, then the Underlying Valuation Date in respect of the relevant Basket Component shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of the relevant Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of the relevant Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for the relevant Basket Component, notwithstanding the fact that such day is a Disrupted Day; and
- (b) the Calculation Agent shall determine its estimate of the relevant level of the relevant Basket Component on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of the relevant Basket Component in accordance with General Condition 15 (*Notices*).

PROVIDED THAT, if the Underlying Valuation Date is postponed in accordance with this paragraph 1.2 due to the occurrence of an Illiquidity Event, notwithstanding the Maximum Days of Disruption, the Underlying Valuation Date for the relevant Basket Component may be postponed until the earlier of (a) the first Scheduled Trading Day on which no Illiquidity Event is in existence in respect of such Basket Component or (b) the day that is 60 calendar days following the Scheduled Trading Day determined in accordance with paragraph 1.2(a) above (or if such day is not a Scheduled Trading Day, the first Scheduled Trading Day following such day).

1.3 Basket of Underlyings and Underlying Valuation Dates – Common Postponement of Underlying Valuation Dates

Where the Products relate to a basket of Underlyings and where 'Underlying Valuation Dates – Adjustments for Disrupted Days' is specified as 'Common Adjustment' in respect of the basket of Underlyings in the Issue Terms (and if the Issue Terms specify that this provision shall apply to one or more particular Underlying Valuation Dates, then this condition shall apply to such Underlying Valuation Dates only), if the Calculation Agent determines that an Underlying Valuation Date is a Disrupted Day in respect of any Basket Component, then the Underlying Valuation Date in respect of all Basket Components shall be the next following Scheduled Trading Day that is not a Disrupted Day in respect of any Basket Component, unless the Calculation Agent determines that each of the consecutive Scheduled Trading Days equal in number to the Maximum Days of Disruption immediately following the Scheduled Underlying Valuation Date is a Disrupted Day in respect of any Basket Component. In that case:

- (a) the last consecutive Scheduled Trading Day shall be deemed to be the relevant Underlying Valuation Date for all Basket Components, notwithstanding the fact that such day is a Disrupted Day for one or more Fund Units in the basket (each such Fund Unit an "**Affected Fund Unit**" in respect of such Underlying Valuation Date);
- (b) in respect of each Fund Unit in the basket that is not an Affected Fund Unit, the relevant Level shall be determined in accordance with the definition of Level on such last consecutive Scheduled Trading Day; and
- (c) in respect of each Affected Fund Unit, the Calculation Agent shall determine its estimate of the relevant level of such Basket Component(s) on that last consecutive Scheduled Trading Day in its reasonable discretion, taking into account the market circumstances prevailing on such day. The Issuer and/or Calculation Agent shall publish the determined level of such Affected Fund Unit(s) in accordance with General Condition 15 (*Notices*).

2. Adjustments

2.1 Consequences of a Potential Adjustment Event

- (a) If the Calculation Agent determines that a Potential Adjustment Event has occurred or is likely to occur, the Issuer and/or Calculation Agent may (but is not obliged to), if the Calculation Agent determines in its reasonable discretion, that such event is material and adversely affects the relevant Fund Unit or the calculation of the NAV of such Fund Unit:
 - (i) make any adjustments to any calculation methods, values or terms in respect of the Products that they determine at their reasonable discretion to be necessary to account for such Potential Adjustment Event; and/or

- (ii) select, by using reasonable efforts for a period of no longer than five (5) Business Days, one or more suitable alternative funds with reasonably similar investment mandates (each a "**Replacement Fund**") and replace the Fund by such Replacement Fund, subject to the satisfaction of all of the following suitability criteria:
 - (A) the relevant fund management company(ies) and fund manager(s) are willing to allow the fund to be referenced in the Products;
 - (B) the Issuer and/or Calculation Agent can trade at net asset value or at bid price in the fund with no direct or indirect fee, levy or other charge whatsoever, including subscription or redemption penalties applicable, or potentially applicable, to any such trading or any interest so acquired;
 - (C) the fund (or a relevant manager) publishes the fund's net asset value or bid price on a daily basis; and
 - (D) the Hedging Entity is able to fully hedge its position with respect to the Replacement Fund as at the date on which the Issuer and/or Calculation Agent elects to replace the Fund with the Replacement Fund; or
- (b) if the Calculation Agent determines that no adjustment as described in paragraph (a) above (and paragraph 2.2 below) would be possible or would achieve a commercially reasonable result, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

If the Issuer and/or Calculation Agent elects to replace a Fund with a Replacement Fund, any reference to such Fund in these Fund Linked Conditions shall, to the extent appropriate, be deemed to refer to such Replacement Fund.

Any adjustment made by the Issuer and/or Calculation Agent pursuant to this Fund Linked Condition 2 shall be notified to Investors, stating the relevant adjustment and the effective date of such adjustment, in accordance with General Condition 15 (*Notices*).

2.2 **Additional Adjustments in respect of a Basket of Underlyings**

Where the Products relate to a basket of Underlyings, if, in relation to a Basket Component, an adjustment (as described in Fund Linked Condition 2) is necessary, the Issuer and/or Calculation Agent shall (in addition to the adjustments pursuant to such Fund Linked Condition in relation to each such Basket Component (an "**Affected Basket Component**")) be entitled, but not obliged to either:

- (a) remove the Affected Basket Component(s) from the basket of Underlyings without replacement (and in such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the removal of the Affected Basket Component(s) and the economic effect thereof on the Products); or
- (b) replace the Affected Basket Component(s) in whole or in part by a new Basket Component (which may be a cash amount in the Underlying Currency representing the value of the Affected Basket Component at the time of such replacement as calculated by the Calculation Agent in its reasonable discretion) (the "**Successor Basket Component**"). In such case, the Calculation Agent may make such amendments to the Conditions as it reasonably determines are appropriate to take into account the replacement of the Affected Basket Component(s) with the Successor Basket

Component. The Successor Basket Component(s) will be selected by the Calculation Agent in its reasonable discretion and the relevant characteristics thereof shall be as similar to the Affected Basket Component being replaced as far as reasonably practicable. Upon such replacement, the Successor Basket Component will be deemed to be the Basket Component and any reference in the Conditions to the Affected Basket Component, to the extent permitted by the context, shall be deemed to refer to the Successor Basket Component.

2.3 **Notice of Adjustments**

Upon making any such adjustment pursuant to this Fund Linked Condition 2, the Issuer and/or Calculation Agent shall give notice to the Investors in accordance with General Condition 15 (*Notices*), stating the relevant adjustment and giving brief details of the relevant event in respect of which such adjustment was made, provided that any failure to give such notice shall not affect the validity of the relevant event or any action taken.

3. ***Correction of Values***

In the event that a Relevant Value is subsequently corrected and such correction (the "**Corrected Value**") is published on behalf of such Fund on or before the Business Day prior to the next date on which any relevant payment or delivery may have been made by the Issuer or in respect of which any relevant determination in respect of the Products may have to be made, which, in each case, would require the Relevant Value, then the Calculation Agent shall be entitled to determine the amount payable or Entitlement deliverable or make any such determination in connection with the Products after taking into account such Corrected Value, and, to the extent necessary, the Issuer and/or Calculation Agent may adjust any relevant terms of the Products to account for such Corrected Value. The adjustment and the date of its first application shall be published in accordance with General Condition 15 (*Notices*).

4. ***Consequences of an Additional Disruption Event***

If the Calculation Agent determines that an Additional Disruption Event has occurred, the Issuer and/or Calculation Agent may:

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event; or
- (b) if the Calculation Agent determines that no adjustment as described in paragraph (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. 1. *Determination of the Reference Rate*

The relevant level of the Reference Rate in respect of any Underlying Valuation Date will be determined by the Calculation Agent in its reasonable discretion on the following basis:

- (a) the Calculation Agent will, in its reasonable discretion, determine the relevant level of the respective Reference Rate which appears on the relevant Screen Page as of the Relevant Time on the relevant Underlying Valuation Date;
- (b) if, in respect of an Underlying Valuation Date, the Calculation Agent determines that the relevant level of the Reference Rate does not appear on the relevant Screen Page or the relevant Screen Page is unavailable, the Calculation Agent will:
 - (i) request the principal Relevant Financial Centre office of each of the Reference Banks to provide a quotation of such Reference Rate at approximately the Relevant Time on such Underlying Valuation Date to prime banks in the Relevant Financial Centre interbank market in an amount that is representative for a single transaction in that market at that time; and
 - (ii) determine the arithmetic mean of such quotations (rounded upward or downwards, if necessary, to the Quotation Rounding),

provided that if fewer than two such quotations are provided as requested under paragraph 1(a) above, then the Calculation Agent shall determine its estimate of the relevant level of the Reference Rate in respect of such Underlying Valuation Date in its reasonable discretion, taking into account the market circumstances prevailing on such day (any such determination made pursuant to this Reference Rate Linked Condition 1 shall be notified to Investors in accordance with General Condition 15 (*Notices*)); or

- (c) if the Calculation Agent has determined, in its reasonable discretion, that an Underlying Event has occurred, notwithstanding the provisions above in paragraphs 1(a) and (b) above, it is entitled:
 - (i) if a successor reference rate has been determined for the respective Reference Rate by a public announcement issued by the administrator of the respective Reference Rate, the competent central bank or a regulatory and/or supervisory authority or a successor administrator, to set such rate as the successor reference rate (the "**Successor Reference Rate**") and to use it instead of the respective Reference Rate on the relevant Underlying Valuation Date and on any subsequent Underlying Valuation Date for the Products;
 - (ii) if a Successor Reference Rate has not been determined by such announcement, to set as the successor reference rate a rate which is comparable to the respective Reference Rate at its reasonable discretion and taking into account market practices (the "**Successor Reference Rate**") and to use such Successor Reference Rate on the relevant Underlying Valuation Date and any subsequent Underlying Valuation Date for the Products, where, if the Calculation Agent determines that an appropriate rate exists which is generally accepted in the financial sector as the Successor Reference Rate for the respective Underlying and/or Basket Component, it will set such rate as the Successor Reference Rate for the Products and will use that Successor Reference Rate for the Products on the relevant Underlying Valuation Date and any subsequent Underlying Valuation Date,

provided that, in the event that a Successor Reference Rate is determined by the Calculation Agent pursuant to subparagraphs (i) or (ii) above, the Calculation Agent shall be entitled to determine in its reasonable discretion the method for periodically determining the amount of the Successor Reference Rate and, if necessary, to make

adjustments to the provisions of the Conditions on which the Products are based with respect to the calculation of the Successor Reference Rate and the Coupon and the redemption of the Products in general, provided that only such adjustments are made that do not result in an economic disadvantage to the Investor. The determination of a Successor Reference Rate and any adjustments to the Conditions on which the Products are based pursuant to the preceding paragraphs as well as the respective effective dates thereof shall be announced by the Calculation Agent in accordance with General Condition 15 (*Notices*).

- (d) if the Calculation Agent determines that (i) no determination as described in (a) above would be possible or would achieve a commercially reasonable result; or (b) in the case of an Underlying Event, it is not possible to determine a Successor Reference Rate, the Calculation Agent may determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. The termination shall become valid on the day of the notice in accordance with General Condition 15 (*Notices*).

2. ***Consequences of an Additional Disruption Event***

If the Calculation Agent determines that an Additional Disruption Event has occurred, the Issuer and/or Calculation Agent may:

- (a) make such adjustment(s) to the Conditions as the Calculation Agent determines appropriate to account for the economic effect on the Products of such Additional Disruption Event; or
- (b) if the Calculation Agent determines that no determination as described in (a) above would be possible or would achieve a commercially reasonable result, determine that the Issuer shall redeem the Products by giving not less than ten (10) nor more than thirty (30) Business Days' irrevocable notice in accordance with General Condition 15 (*Notices*), in which case the Issuer shall redeem the Products and cause to be paid to each Investor in respect of each Product held by it an amount equal to the Unscheduled Early Redemption Amount. a taxing authority), the Calculation Agent determines in good faith that (i) it has become illegal to hold, acquire or dispose of positions, contracts, instruments or arrangements in relation to a Reference Rate, or (ii) the Hedging Entity will incur a materially increased cost in performing its obligations arising from the Products (including, without limitation, due to any increase in tax liability, decrease in tax benefit or other adverse effect on its tax position).

**DESCRIPTION OF TCM
("TRIPARTY COLLATERAL MANAGEMENT") SECURED PRODUCTS**

1. ***Introduction***

Each TCM Secured Product is secured by collateral (the "**Collateral**") provided by Leonteq Securities AG (in such capacity, the "**Collateral Provider**") in accordance with the terms of the TCM Security Agreement (as defined below under the heading '*Documentation*'). The Collateral Provider undertakes to secure the value of the TCM Secured Products at any given time.

Each Investor in a TCM Secured Product is a "**Collateral Taker**" in respect of such TCM Secured Product and are represented by SIX Repo AG as the "**Collateral Agent**" (as described in detail below under the heading '*Documentation*'). Each Collateral Taker has a security interest in the sense of Art. 25 FISA regarding intermediated securities and a lien according to article 899 et seq. of the Swiss Civil Code regarding the cash, each as provided as Collateral to secure the TCM Secured Product. In respect of each TCM Secured Product, the Collateral is booked to an account of the Collateral Provider with SIX SIS AG (such account, the "**Collateral Account**"). SIX SIS AG, acting as an independent third party, manages both the Collateral Account and the collateral assignment for the relevant TCM Secured Product.

The Collateral Provider has no right to dispose of the Collateral in the Collateral Account or to close or transfer the Collateral Account. The Collateral is valued by SIX SIS AG several times on each day banks are open for business in Zurich (a "Business Day").

The Collateral required for the TCM Secured Products is determined by SIX SIS AG on the basis of the price information (a) provided by the Issuer and (b) published in the market information system of SIX Financial Information AG. The Collateral Provider shall be obliged to adjust the Collateral to account for any changes in value of the TCM Secured Product (for further detail please refer to the section below under the heading '*Collateralization Method*'). Permitted types of collateral shall be selected by SIX SIS AG on an ongoing basis. At the date of this Base Prospectus, the TCM Security Agreement provides that the following are permitted types of collateral: cash deposits in specified currencies (e.g. in CHF, EUR, USD, GBP, or JPY) and certain types of securities (e.g., securities that directly or indirectly aggregate to the value of the relevant TCM Secured Product). Securities may only be used as collateral if the price is not older than four Business Days. The Collateral Provider shall, upon request at any given time, inform Investors about the Collateral that is eligible. The costs for the collateralisation of the TCM Secured Products will be included in the issue price and will not be billed separately to investors.

2. ***Documentation***

The collateralization in favour of the Collateral Taker with regard to the TCM Secured Product issued by the Issuer is based on the security agreement between the Issuer (who is also the Collateral Provider), the Collateral Taker (represented by the Collateral Agent) and SIX SIS AG dated 12 December 2013 as amended (the "**TCM Security Agreement**"). The Issuer shall, upon request, provide a copy of the TCM Security Agreement to investors free of charge. The TCM Security Agreement may be obtained from Issuer at Europaallee 39, CH-8004 Zurich, via telephone (+4158 800 1111), via fax (+4158 800 1010) or via e-mail (termsheet@leonteq.com).

Under the terms of the TCM Security Agreement, the Issuer is responsible for issuing and pricing the TCM Secured Product. The Issuer is, at the same time, the Collateral Provider and, to that extent, is responsible for selecting the Collateral available for a deposit from the permitted types of collateral. Furthermore, the Collateral Provider provides collateral to the SIX SIS AG as custodian (the "**Custodian**"), and grants a lien in favour of the Collateral Taker with regard to the Collateral.

The Collateral Taker is the Investor in the TCM Secured Product under the TCM Security Agreement. The Collateral Taker is the beneficiary for any proceeds from the sale of the Collateral provided as security for a TCM Secured Product if a Realization Event occurs. By purchasing a TCM Secured Product, the Collateral Taker agrees to exercise its rights under the TCM Security Agreement solely through the Collateral Agent. The acquisition of a TCM

Secured Product by an Investor is automatically accompanied by a declaration to the Collateral Agent, as its representative, that the Collateral Agent may exercise the Investor's rights under the TCM Security Agreement in the event of a Realization Event. Investors are bound by the provisions of the TCM Security Agreement and particularly the choice of Swiss law and the exclusive jurisdiction of the courts of the Canton of Zurich (Switzerland) vis-à-vis the Collateral Agent and SIX SIS AG.

The Collateral Agent acts in accordance with the TCM Security Agreement as the direct representative of the Collateral Taker and acts on behalf of and in the Collateral Taker's name. In the case of a Realization Event, the Collateral Agent will use the collateral in favour of the Collateral Taker (see below under the heading '*Liquidation of Collateral*').

SIX SIS AG acts as Custodian under the TCM Security Agreement, and is responsible for the administration of the Collateral Account on which the Collateral is booked. SIX SIS AG acts, in this regard, as a neutral and independent service provider and is not subject to the directions of the Collateral Provider as the account holder. Furthermore, SIX SIS AG shall act as an administrator under the TCM Security Agreement (the "**Administrator**") and will monitor and manage the Collateral assigned to the individual TCM Secured Product. The Administrator calculates the collateral requirements for a TCM Secured Product several times throughout each Business Day, and automatically assigns additional assets held by the Collateral Provider with the Custodian in a pool account ("Pool Account") to the Collateral Account, if necessary. If the assets held on the Pool Account are not sufficient, the Administrator informs the Issuer that additional Collateral must be provided. Furthermore, the Collateral Provider will inform the Collateral Agent if Realization Event has occurred.

3. ***Collateralization Method***

The collateral that must be furnished by the Collateral Provider is determined by the value of the TCM Secured Product at any given time (the "**Current Value**"). The Current Value of the TCM Secured Product is calculated exclusively by, and with full responsibility of, the Collateral Provider in accordance with acknowledged accounting principles. Neither the Collateral Agent, nor SIX SIS AG nor SIX Financial Information AG recalculates or otherwise reviews the calculation of the Current Value. The Current Value is communicated by the Collateral Provider to SIX Financial Information AG who will then publish the Current Value. SIX SIS AG calculates whether the coverage requirements for the Collateral on the basis of the Current Value as published by SIX Financial Information AG are met. Neither the Collateral Agent, nor SIX SIS AG nor SIX Financial Information AG shall be liable for any losses or damages suffered by any Collateral Taker as a consequence of an inaccurate calculation of the Current Value or of an inaccurate communication of such value to SIX Financial Information AG. The calculation method shall be determined for each TCM Secured Product upon its issuance and shall remain unchanged for its entire term. The Collateral provided for a Product will not secure any other TCM Secured Product.

4. ***Liquidation of Collateral***

A "**Realization Event**" will be deemed to have occurred if (i) the Collateral Provider fails to furnish the required collateral or fails to do so in due time, unless this is remedied within five (5) Business Days; (ii) the Issuer fails to pay the principal amount under the TCM Secured Product (but not any amount of interest, coupon or other intermediate payment) according to the Conditions when due, unless this is remedied within five (5) Business Days; or (iii) the Swiss Financial Market Supervisory Authority ("**FINMA**") orders protective measures with regard to the Issuer or the Collateral Provider under article 26 paragraph 1 letter (f) or (h) of the Federal Act on Banks and Savings Banks (the "**Banking Act**"), or restructuring proceedings under article 28 et seq. of Banking Act or liquidation (winding-up proceedings) under article 33 et seq. of the Banking Act (each such event a "**Realization Event**"). The TCM Security Agreement provides for the exact time at which each Realization Event occurs. The remedy of a Realization Event is not possible.

5. **Determination of a Realization Event**

The Collateral Agent is not required to undertake investigations with regard to the occurrence of a Realization Event. In determining the occurrence of a Realization Event, it bases its decision on reliable sources of information only. The Collateral Agent determines with binding effect for the Investors whether an incident qualifies as a Realization Event and at what point in time the Realization Event occurred.

6. ***Procedure in case of a Realization Event***

If a Realization Event occurs, the Collateral Agent is at its discretion entitled: (i) to make public the occurrence of a Realization Event immediately or at a later stage in suitable form; as well as (ii) to liquidate immediately or at a later stage – without regard to the amount of unsatisfied claims – all existing Collateral on a private basis, provided the applicable legal regulations or regulatory orders do not prohibit such private liquidation (and, if a private liquidation is not possible, hand the collateral over to the competent person for liquidation).

7. ***Maturity of the TCM Secured Product as well as investor claims against the Issuer***

The Collateral Taker shall have a security interest in accordance with article 25 of the Swiss Federal Intermediated Securities Act ("**FISA**") over the intermediated securities and a lien according to article 899 et seq. of the Swiss Civil Code over the cash, each as provided as Collateral to secure the TCM Secured Product. The Realization Event with regard to a TCM Secured Product will only trigger the consequences of a Realization Event for this particular TCM Secured Product (and not other TCM Secured Products of the Issuer). If a Realization Event with regard to a TCM Secured Product has occurred, the Collateral Agent will determine as the "**Liquidation Value**" of such TCM Secured Product the latest Current Value available prior to the occurrence of the Realization Event. This Liquidation Value shall be binding on the Collateral Provider and the Investors. Investors' claims against the Issuer will be based on this Liquidation Value when the TCM Secured Products mature in accordance with the TCM Security Agreement.

8. ***Costs of liquidation and payout for the benefit of the investors***

Any costs of the Collateral Agent, including in connection with the liquidation of the Collateral (including fees, taxes and duties that arise in conjunction with liquidation) shall, in advance, be covered out of the proceeds of the liquidation of the Collateral (the "**Liquidation Proceeds**"). In addition, the Collateral Agent shall be entitled to satisfy, in advance and out of the Liquidation Proceeds, any outstanding claims it holds against the Collateral Provider under the terms of the TCM Security Agreement. The remaining Liquidation Proceeds are available for payout to the Investors in the relevant TCM Secured Product. Each Investor's pro-rata share of the net Liquidation Proceeds will be paid to Investors via SIX SIS AG on a delivery versus payment basis. Once this payment has been made the Collateral Agent is released from all further obligations. The claim of the Investors is non-interest-bearing. Payment to Investors following the occurrence of a Realization Event may be only occur upon completion of the liquidation of the Collateral in accordance with the terms of the TCM Security Agreement. If the payment is delayed for any reason, the Collateral Agent and SIX SIS AG are not liable to pay either default interest or damages. Each TCM Secured Product will only be secured by the Collateral assigned on the Collateral Account to the respective TCM Secured Product. The Investors' claims against the Issuer in respect of the TCM Secured Product are reduced by the amount of the payment of the Net Liquidation Proceeds. No further Investors' claims exist against the Collateral Agent, SIX SIS AG or other persons which are involved in the collateralisation service for the TCM Secured Product under the terms of the TCM Security Agreement.

TAXATION

Investors should be aware that the tax legislation of the country in which the investor is resident and of the Issuer's country of incorporation may have an impact on the income received from the Products.

The level and basis of taxation on the Products and on the investor depend on the investors individual circumstances and could change at any time and may have an adverse impact on the return received by the investor under the Product.

1. *General taxation information*

The information provided below does not purport to be a complete overview of tax law and practice currently applicable to the Products. Transactions involving Products (including purchases, transfers and/or redemptions), the accrual or receipt of any interest or premium payable on the Products, the delivery of any entitlement and the death of a holder of any Product may have tax consequences for investors which may depend, amongst other things, upon the tax residence and/or status of the investor, the terms and conditions of the particular Product and the relevant law and practice of taxation authorities in relevant jurisdictions. Investors are therefore advised to consult their own tax advisers as to the tax consequences of transactions involving Products and the effect of any tax laws in any jurisdiction in which they may be tax resident or otherwise liable to tax. In particular, no representation is made as to the manner in which payments under the Products would be characterised by any relevant taxing authority.

The following overviews do not consider the tax treatment of payments or deliveries in respect of the relevant Underlying(s). The taxation provisions applicable to such items may be different (and in some cases significantly different) from those described in the overview below.

Purchasers and/or sellers of Products may be required to pay stamp taxes and other charges in addition to the issue price or purchase price (if different) of the Products and in connection with the transfer or delivery of any Underlying.

Investors are referred to General Condition 5.6 (*Taxes, Settlement Expenses and conditions to settlement*) and General Condition 6 (*Redemption and Settlement*).

Terms defined in the sections below are defined for the purpose of the relevant section only.

2. *Czech Republic Taxation*

The summary herein provides general information regarding tax obligations in respect of any transaction involving the Products, including but not limited to holding of the Products, pursuant to the Act No. 586/1992 Coll., on Income Tax, as amended (the "**Czech ITA**").

There is no Czech withholding tax pursuant to the Czech ITA arising in connection with the Products. It is assumed that the Issuer of the Products is not a resident of the Czech Republic for Czech tax purposes, has not a permanent establishment in the territory of the Czech Republic and has not employed its employees here for more than 183 days, except for cases of providing services.

This summary does not define the exact tax implications for prospective purchasers with tax residency in the Czech Republic and it does not consider any specific double taxation treaty. Income derived from holding (interest payments) or disposal (transfer) of Products may have tax implications for prospective purchasers. Prospective purchasers of any Products should consult their own tax advisers in the Czech Republic about the tax implications of holding any Product and of any transaction involving any Product.

3. *Dutch Taxation*

General

The following summary outlines the principal Netherlands tax consequences of the acquisition, holding, settlement, redemption and disposal of the Products, but does not purport to be a comprehensive description of all Netherlands tax considerations in relation thereto. For purposes of Netherlands tax law, a holder of Products may include an individual or entity who does not have the legal title of these Products, but to whom nevertheless the Products or the income thereof is attributed based on specific statutory provisions or on the basis of such individual or entity having an interest in the Products or the income thereof. This summary is intended as general information only and each prospective investor should consult a professional tax adviser with respect to the tax consequences of an investment in the Products.

This summary is based on tax legislation, published case law, treaties, regulations and published policy, in each case as in force as of the date of this Base Prospectus, and does not take into account any developments or amendments thereof after that date whether or not such developments or amendments have retroactive effect.

This summary does not address the Netherlands tax consequences for:

- (a) holders of Products holding a substantial interest (aanmerkelijk belang) or deemed substantial interest (fictief aanmerkelijk belang) in the Issuer and holders of Products of whom a certain related person holds a substantial interest in the Issuer. Generally speaking, a substantial interest in the Issuer arises if a person, alone or, where such person is an individual, together with his or her partner (statutory defined term), directly or indirectly, holds or is deemed to hold (i) an interest of 5% or more of the total issued capital of the Issuer or of 5% or more of the issued capital of a certain class of shares of the Issuer, (ii) rights to acquire, directly or indirectly, such interest or (iii) certain profit sharing rights in the Issuer;
- (b) investment institutions (fiscale beleggingsinstellingen);
- (c) pension funds, exempt investment institutions (vrijgestelde beleggingsinstellingen) or other entities that are exempt from Netherlands corporate income tax;
- (d) persons to whom the Products and the income from the Products are attributed based on the separated private assets (afgezonderd particulier vermogen) provisions of the Netherlands income tax Act 2001 (Wet inkomstenbelasting 2001) and the Netherlands gift and inheritance tax Act (Successiewet 1956);
- (e) entities which are a resident of Aruba, Curacao or Sint Maarten that have an enterprise which is carried on through a permanent establishment or a permanent representative on Bonaire, Sint Eustatius or Saba, to which permanent establishment or permanent representative the Products are attributable; and
- (f) individuals to whom Products or the income therefrom are attributable to employment activities which are taxed as employment income in the Netherlands.

Where this summary refers to the Netherlands, such reference is restricted to the part of the Kingdom of the Netherlands that is situated in Europe and the legislation applicable in that part of the Kingdom.

(1) *Withholding Tax*

All payments made by the Issuer under the Products may be made free of withholding or deduction for any taxes of whatsoever nature imposed, levied, withheld or assessed by the Netherlands or any political subdivision or taxing authority thereof or therein.

(2) *Corporate and Individual Income Tax*

Residents of the Netherlands

If a holder is a resident or deemed to be a resident of the Netherlands for Netherlands tax purposes and is fully subject to Netherlands corporate income tax or is only subject to Netherlands corporate income tax in respect of an enterprise to which the Products are attributable, income derived from the Products and gains realised upon the redemption, settlement or disposal of the Products are generally taxable in the Netherlands (at up to a maximum rate of 25%).

If an individual is a resident or deemed to be a resident of the Netherlands for Netherlands tax purposes, income derived from the Products and gains realised upon the redemption, settlement or disposal of the Products are taxable at the progressive rates (up to 49.50 per cent. in 2020) under the Netherlands income tax act 2001, if:

- (a) the individual is an entrepreneur (ondernemer) and has an enterprise to which the Products are attributable or the individual has, other than as a shareholder, a co-entitlement to the net worth of an enterprise (medegerechtigde), to which enterprise the Products are attributable; or
- (b) such income or gains qualify as income from miscellaneous activities (resultaat uit overige werkzaamheden), which include the performance of activities with respect to the Products that exceed regular, active portfolio management (normaal, actief vermogensbeheer).

If neither condition (a) nor condition (b) applies, an individual that holds the Products, must determine taxable income with regard to the Products on the basis of a deemed return on income from savings and investments (sparen en beleggen), rather than on the basis of income actually received or gains actually realised. For 2020, the deemed return ranges from 1.79 per cent. to 5.28 per cent of the value of the individual's net assets as at the beginning of the relevant fiscal year (including the Products). The applicable rates will be updated annually on the basis of historic market yields. Subject to application of certain allowances, the deemed return will be taxed at the prevailing statutory rate (30 per cent. in 2020).

Non-residents of the Netherlands

If a person is not a resident nor is deemed to be a resident of the Netherlands for Netherlands tax purposes, such holder is not liable to Netherlands income tax in respect of income derived from the Products and gains realised upon the settlement, redemption or disposal of the Products, unless:

- (a) the person is not an individual and such person (i) has an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which permanent establishment or permanent representative the Products are attributable, or (ii) is (other than by way of Products) entitled to a share in the profits of an enterprise or a co-entitlement to the net worth of an enterprise, which is effectively managed in the Netherlands and to which enterprise the Products are attributable.

This income is subject to Netherlands corporate income tax at up to a maximum rate of 25%.

- (b) the person is an individual and such individual (i) has an enterprise or an interest in an enterprise that is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands to which permanent establishment or permanent representative the Products are attributable, or (ii) realises income or gains with respect to the Products that qualify as income from miscellaneous activities (resultaat uit overige werkzaamheden) in the Netherlands, which activities include the performance of activities in the Netherlands with respect to the Products which exceed regular, active portfolio management (normaal, actief vermogensbeheer), or (iii) is (other than by way of Products) entitled to a share in the profits of an enterprise which is effectively managed in the Netherlands and to which enterprise the Products are attributable.

(3) *Gift and Inheritance Tax*

Netherlands gift or inheritance taxes will not be levied on the occasion of the transfer of a Product by way of gift by, or on the death of, a holder of a Product, unless:

- (a) the holder of a Product is, or is deemed to be, resident in the Netherlands for the purpose of the relevant provisions; or
- (b) the transfer is construed as an inheritance or gift made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident in the Netherlands for the purpose of the relevant provisions.

For the purpose of Dutch gift and inheritance tax, an individual who has the Dutch nationality will be deemed to be a resident of the Netherlands at the date of the gift or the date of his death, if he has been a resident of the Netherlands at any time during the ten years preceding the date of the gift or the date of his death.

For the purposes of Dutch gift tax, an individual who does not have the Dutch nationality will be deemed to be a resident of the Netherlands at the date of the gift, if he or she has been a resident of the Netherlands at any time during the twelve months preceding the date of the gift.

(4) *Value Added Tax*

In general, no value added tax will arise in respect of payments in consideration for the issue of the Products or in respect of a cash payment made under the Products, or in respect of a transfer of Products.

(5) *Other Taxes and Duties*

No registration tax, customs duty, transfer tax, stamp duty or any other similar documentary tax or duty will be payable in the Netherlands by a holder in respect of or in connection with the subscription, issue, placement, allotment, delivery or transfer of the Products

4. ***Finnish Taxation***

The following overview relates only to Finnish withholding tax issues for payments made in respect of the Products to persons who are generally liable to tax in Finland (i.e. persons that are Finnish residents for tax purposes). The overview does not deal with any other Finnish tax implications of acquiring, holding or disposing of the Products. Investors are advised to seek professional advice relating to other tax implications in respect of acquiring, holding or disposing of the Products.

On the basis that the Issuers are not resident in Finland for tax purposes and are not operating through a branch office, permanent establishment or other fixed place of business in Finland in connection with the Products, there is no Finnish withholding tax (Fi. lähdevero) applicable to the payments made by the Issuer in respect of the Products.

However, Finland operates a system of preliminary taxation (Fi. ennakonpidätysjärjestelmä) to secure payment of taxes in certain circumstances. In the context of the Products, a tax of 30 per cent. will be deducted and withheld from all payments (including redemption proceeds/premium) that are treated as interest or as compensation comparable to interest, when such payments are made by a Finnish Paying Agent to individuals. Any preliminary tax (Fi. ennakonpidätys) will be used for the payment of the individual's final taxes (which means that they are credited against the individual's final tax liability).

If, however, the Products are regarded as warrants or certificates for Finnish tax purposes, any profits on warrants or certificates would, based on current Finnish court practice, be considered a capital gain (as opposed to interest or compensation comparable to interest). Therefore, any payments made in respect of Products that are regarded as warrants or certificates may be made without deduction or withholding for or on account of Finnish tax and should, accordingly, not be subject to any preliminary taxation (Fi. ennakonpidätys) by a Finnish Paying Agent.

5. *German Taxation*

The following explanations take into account only the taxation of German tax residents whose residence, habitual abode, statutory seat or effective place of management and control is located in Germany ("**German tax residents**").

In case of German tax residents being individuals who hold the Products as private assets interest payments and capital returns from the sale or repayment or exercise of the Products for cash settlement are subject to a German withholding tax, if the Products are kept or managed in an investment portfolio in a domestic credit or financial services institution (including a domestic branch office of a foreign credit or financial services institution) or in a domestic trading company or domestic trading bank, or if the sale is carried out through these institutions and the payment of interest or capital returns is paid out or credited by the respective institution ("**paying office**").

In principle, the basis for calculation is the interest amount or the difference between the income from the sale or repayment after deduction of expenses that are directly related to the sale transaction or the repayment, and the acquisition costs. In the case of transactions that are not conducted in euros, the income must be converted into euros at the time of sale and the cost of purchase into euros at the time of purchase.

Certain Products provide for a physical delivery of securities instead of a cash settlement according to the relevant Conditions of such Products. In this case, the acquisition costs of the initial Products would be deemed to be the acquisition costs of the delivered securities if certain requirements are met so that under certain circumstances the conversion would be treated as tax neutral. However, capital gains realized upon an on-sale of the received securities would be taxable.

The withholding tax rate is 26.375% (including the solidarity surcharge, plus church tax if applicable).

In the course of determining the annual investment income, an annual exemption of EUR 801 for individual tax payers or EUR 1,602 for tax payers who are assessed jointly, is deducted as a lump sum (*Sparer-Pauchbetrag*). Subject to specific requirements the investment income is not subject to German withholding tax. This is the case if a withholding tax exemption certificate (*Freistellungsauftrag*) is issued or if a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) is submitted. A withholding tax exemption certificate needs to be submitted to the paying office and leads to an exemption equaling the lump sum deduction amount at the maximum. A certificate of non-assessment is issued by the local tax office being competent for the Product Investor and needs to be submitted to the paying office.

In principle, the income tax is covered with respect to these revenues with the deduction of the withholding tax (so called final withholding tax). The actual expenses in connection with the capital gains are not deductible for tax purposes. For individuals subject to church tax an electronic information system for church withholding tax purposes applies in relation to investment income, with the effect that church tax will be collected automatically by the paying office by way of withholding unless the Product Investor has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*) in which case the Product Investor will be assessed to church tax.

If the capital returns are not paid out by a paying office and if, therefore, no withholding tax is due, the income is subject to a tax rate of 26.375% (including the solidarity surcharge, plus church tax if applicable).

A general assessment at the individual personal tax rate is possible if the personal marginal tax rate of the taxpayer does not exceed 25%. (*Günstigerprüfung*). However, also within this assessment procedure, no deduction of income-related expenses is possible.

In case the Products of German tax residents are held as business assets, the aforementioned considerations generally apply *mutatis mutandis*. However, German withholding tax levied, if any, is not final but will be credited as prepayments against the German personal income or

corporate income tax (plus solidarity surcharge). Amounts over withheld will generally entitle the Product Investor to a refund. The lump sum deduction procedures (*Sparer-Pauschbetrag*) are not applicable. Instead actual expenses incurred can generally be deducted. The investment income is additionally subject to German trade tax, as the case may be. Subject to specific requirements capital gains from the sale or repayment or exercise of the Products for cash settlement are not subject to German withholding tax.

It should be noted that the coalition agreement of the 19th legislative period stipulates the partial abolition of the final withholding tax, in particular, on private investment income such as interest income. Such income will then be subject to the personal tax rate. Furthermore, the solidarity surcharge shall be abolished for a certain number of taxpayers.

The gratuitous transfer of a Product by a Product Holder as a gift or by reason of the death of the Product Investor is subject to German gift or inheritance tax if the Product Investor or the recipient is resident or deemed to be resident in Germany under German law at the time of the transfer. If neither the Product Investor nor the recipient is resident, or deemed to be resident, in Germany at the time of the transfer no German gift or inheritance tax is levied unless the Products form part of the business property for which a permanent establishment or fixed base is maintained in Germany by the Product Investor.

Implementation of the OECD Common Reporting Standard and the amended Mutual Assistance Directive in Germany

In Germany, the amended EU Mutual Assistance Directive and the OECD Common Reporting Standard were implemented by the Act on the Exchange of Financial Accounts Information (*Finanzkonten-Informationsaustauschgesetz – FKAustG*) which became effective as of 31 December 2015. The main content of the act is a common reporting standard for automatic information exchange on financial accounts. In principle, the FKAustG imposes an obligation on financial institutes to transmit the necessary information to the German Federal Central Tax Office (*Bundeszentralamt für Steuern*) starting on 31 July 2017 for the tax year 2016 and for the following tax years on 31 July of the respective subsequent year. For instance, necessary information are the name, the address, the member state/s of residence and the tax identification number(s).

6. ***Ireland Taxation***

This has been prepared to contain the minimal level of detail required to be disclosed under the Prospectus Regulation. It does not describe generally how Irish investors in any of the Products would be taxed.

The following comments are of a general nature, relating only to the position of persons who are absolute beneficial owners of the Products and is based on Irish law and what is understood to be the current practice of the Irish Revenue Commissioners, in each case at the date of this Base Prospectus, which may change at any time, possibly with retrospective effect. The following is a general overview only of the Irish withholding taxation treatment at the date hereof in relation to income payments in respect of the Products and certain provisions allowing the Revenue Commissioners to obtain and exchange information. The comments are not exhaustive, and do not deal with other Irish tax aspects of acquiring, holding, disposing of or abandoning the Products.

Interest payments

Interest will only be subject to a deduction on account of Irish income tax if it has an Irish source in which case it may fall to be paid under deduction of Irish income tax at the basic rate (currently 20 per cent.) subject to such relief as may be available under the provisions of any applicable double taxation treaty or to any other exemption which may apply.

The location of the source of a payment is a complex matter. It is necessary to have regard to case law and the practice of the Irish Revenue Commissioners. The most important factors in determining the source of a payment are where the Issuer does business and where its assets are located, since these influence where a creditor would sue for payment. Depending on the

circumstances, other relevant factors may include the place of performance of the contract, the method of payment, the proper law of contract, the competent jurisdiction for any legal action and the location of any security for the debt although, other factors may also be relevant.

Where interest has an Irish source, any payment of interest may nonetheless be made without withholding or deduction for or on account of Irish income tax where any of the following conditions are satisfied:

- (i) if the Products are and continue to be "quoted Eurobonds" as defined in section 64 of the Taxes Consolidation Act, 1997. The Products will constitute "quoted Eurobonds" if they carry a right to interest and are and continue to be listed on a recognised stock exchange and are held in a recognised clearing system within the meaning of section 64; or
- (ii) if the relevant interest is paid on Products with a maturity date of less than one year from the date of issue and which are not issued under arrangements the effect of which is to render such Products part of a borrowing with a total term of a year or more.

The references to "interest" above mean "interest" as understood in Irish tax law and in particular any premium element of the redemption amount of any Products redeemable at a premium may constitute a payment of interest subject to the withholding tax provisions discussed above and reporting requirements as outlined below. The statements above do not take any account of any different definitions of "interest" or "principal" which may prevail under any other law or which may be created by the terms and conditions of the Products or any related documentation.

Other payments

Payments under the Products which do not amount to interest or annual payments for the purposes of Irish tax will normally not be subject to Irish withholding tax.

Information Exchange

The Irish Revenue Commissioners have powers, in certain circumstances, to obtain information. The persons from whom the Irish Revenue Commissioners can obtain information include: a person who receives (or is entitled to receive) a payment derived from Products; a person who makes such a payment (received from, or paid on behalf of another person); a person by or through whom interest is paid or credited; a person who effects or is a party to transactions in respect of Products (which includes an issue of Products) on behalf of others; registrars or administrators in respect of transactions in respect of Products; and each registered or inscribed Investors. The information the Revenue Commissioners can obtain includes: details of the beneficial owner of the Products; details of the person for whom the Products are held, or the person to whom the payment is to be made (and, if more than one, their respective interests) and information and documents relating to transactions in the Products.

In certain circumstances the information which the Revenue Commissioners have obtained using these powers may be exchanged with tax authorities in other jurisdictions.

7. *Italian Taxation*

The statements herein regarding taxation are based on the laws in force in Italy as at the date of this Base Prospectus and are subject to any changes in law occurring after such date, which could be made on a retroactive basis. The following overview does not purport to be a comprehensive description of all the tax considerations which may be relevant to a decision to subscribe for, purchase, own or dispose of the Products and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities or commodities) may be subject to special rules. Investors in the Products are advised to consult their own tax advisers concerning the overall tax consequences of their ownership of the Products. The following analysis is an overview of certain material Italian tax considerations relating to (i) Products issued by the Issuer where the investor is tax resident in Italy or the investment is related to an Italian permanent establishment or (ii) Products are deposited with or any payment of interest and proceeds is made through a Paying Agent, custodian or intermediary located in Italy.

This summary does not describe the tax consequences for an investor with respect to Products that will be redeemed by physical delivery.

As clarified by the Italian tax authorities in resolution No. 72/E of 12 July 2010, the Italian tax consequences of the purchase, ownership and disposal of the Products may be different depending on whether:

- (i) *they represent a securitised debt claim, implying a static "use of capital" (impiego di capitale), through which the subscriber of the Products transfers to the Issuer a certain amount of capital for the purpose of obtaining a remuneration on the same capital and subject to the right to obtain its (partial or entire) reimbursement at maturity; or*
- (ii) *they represent a securitised derivative financial instrument or bundle of derivative financial instruments not entailing a "use of capital", through which the subscriber of the Products invests indirectly in underlying financial instruments for the purpose of obtaining a profit deriving from the negotiation of such underlying financial instruments.*

The content of this section of the Base Prospectus assumes that the Issuer is neither resident for tax purposes in Italy, nor it has a permanent establishment located in Italy.

- (i) *Products characterising as "bonds or debentures similar to bonds"*

Legislative Decree No. 239 of 1 April 1996 ("**Decree 239**"), as subsequently amended, provides for the applicable regime with respect to the tax treatment of interest, premium and other income (including the difference between the redemption amount and the issue price) from Products falling in the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) issued, inter alia, by a non-Italian resident issuer. For this purpose, bonds and debentures similar to bonds are securities that incorporate an unconditional obligation to pay, at redemption, an amount not lower than their nominal value and which do not grant the holder any direct or indirect right of participation in (or of control of) management of the Issuer.

Italian resident Investors

Where the Italian resident Investor of the Products is (i) an individual not engaged in an entrepreneurial activity to which the Products are connected (unless he has opted for the application of the *risparmio gestito* regime – see "*Capital Gains Tax*" below), (ii) a non-commercial partnership, (iii) a non-commercial private or public institution, or (iv) an investor exempt from Italian corporate income taxation, interest, premium and other income relating to the Products, accrued during the relevant holding period, are subject to a withholding tax, referred to as *imposta sostitutiva*, levied at the rate of 26 per cent. In the event that the Investors described under (i) and (iii) above are engaged in an entrepreneurial activity to which the Products are connected, the *imposta sostitutiva* applies as a provisional tax.

Where an Italian resident Investor of the Products is a company or similar commercial entity or a permanent establishment in Italy of a foreign company to which the Products are effectively connected and the Products are deposited with an authorised intermediary, interest, premium and other income from the Products will not be subject to *imposta sostitutiva*, but must be included in the relevant Investor's income tax return and are therefore subject to general Italian corporate income taxation ("**TRES**") (and, in certain circumstances, depending on the "status" of the Investor, also to the regional tax on productive activities ("**IRAP**")).

Under the current regime provided by Law Decree No. 351 of 25 September 2001, converted into law with amendments by Law No. 410 of 23 November 2001 ("**Decree 351**"), Law Decree No. 78 of 31 May 2010 converted into Law No. 122 of 30 July 2010 and Legislative Decree No. 44 of 4 March 2014, all as amended, payments of interest in respect of the Products made to Italian resident real estate investment funds established pursuant to Article 37 of Legislative Decree No. 58 of 24 February 1998, as amended and supplemented, and Article 14-bis of Law No. 86 of 25 January 1994 and Italian real estate investment companies with fixed capital ("**Real Estate SICAFs**", and, together with the Italian resident real estate investment funds, the "**Real Estate Funds**") are subject neither to substitute tax nor to any other income tax in the hands of a Real Estate Fund, but subsequent distributions made in favour of unitholders or shareholders

will be subject, in certain circumstances, to a withholding tax of 26 per cent., subject to certain conditions, depending on the status of the investor and percentage of participation, income of the Real Estate Fund is subject to taxation in the hands of the unitholder or shareholder regardless of distribution.

If the investor is resident in Italy and is an open-ended or closed-ended investment fund, an Italian investment company with fixed capital ("**SICAF**") or an Italian investment company with variable capital ("**SICAV**") established in Italy (together the "**Fund**") and either (i) the Fund or (ii) its manager is subject to the supervision of a regulatory authority, and the relevant Products are held by an authorised intermediary, interest, premium and other income accrued during the holding period on the Products will not be subject to *imposta sostitutiva*, but must be included in the management results of the Fund. The Fund will not be subject to taxation on such results but a substitute tax of 26 per cent. (the "**Collective Investment Fund Tax**") will apply, in certain circumstances, to distributions made in favour of unitholders or shareholders.

Where an Italian resident Investor of the Products is a pension fund (subject to the regime provided for by Article 17 of the Legislative Decree No. 252 of 5 December 2005) and the Products are deposited with an authorised intermediary, interest, premium and other income relating to the Products and accrued during the holding period will not be subject to *imposta sostitutiva*, but must be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to a 20 per cent. substitute tax.

Pursuant to Decree 239, *imposta sostitutiva* is applied by banks, Italian investment companies (*società di intermediazione mobiliare*) (SIMs), fiduciary companies, Italian asset management companies (*società di gestione del risparmio*) (SGRs), stockbrokers and other entities identified by a decree of the Ministry of Economics and Finance (each an "**Intermediary**").

An Intermediary must (i) be resident in Italy or be a permanent establishment in Italy of a non-Italian resident financial intermediary and (ii) intervene, in any way, in the collection of interest or in the transfer of the Products. For the purpose of the application of the *imposta sostitutiva*, a transfer of Products includes any assignment or other act, either with or without consideration, which results in a change of the ownership of the relevant Products or in a change of the Intermediary with which the Products are deposited.

Where the Products are not deposited with an Intermediary, the *imposta sostitutiva* is applied and withheld by any Italian financial intermediary paying interest to an Investor of a Product. If interest and other proceeds on the Products are not collected through an Intermediary or any entity paying the income and as such no *imposta sostitutiva* is levied, Italian resident beneficial owners will be required to include interest and other proceeds in their yearly income tax return and subject them to a final substitute tax at a rate of 26%. The Italian individual investor may elect instead to pay ordinary personal income tax ("**IRPEF**") at the applicable progressive rates in respect of the payments; if so, the investor should generally benefit from a tax credit for withholding taxes applied outside of Italy, if any.

Non-Italian Resident Investors

No Italian *imposta sostitutiva* is applied on payments to a non-Italian resident Investor of Products of interest or premium relating to the Products provided that, if the Products are deposited with an Intermediary in Italy, the non-Italian resident Investor of Products declares itself to be a non-Italian resident according to Italian tax regulations.

(ii) *Taxation of Products not guaranteeing the full repayment of principal*

The Products – when they do not represent a debt instrument implying a "use of capital" (*impiego di capitale*), through which the Investor transfers to the Issuer a certain amount of capital, for the economic exploitation of the same, subject to the unconditional right to obtain the entire reimbursement of such amount at maturity - may be subject to different tax regimes depending on whether:

- (a) they represent derivative financial instruments; or

(b) they represent a debt instrument implying a "use of capital" (impiego di capitale), through which the Investor transfers to the Issuer a certain amount of capital, for the economic exploitation of the same, and qualifying as atypical securities according to Article 8 of Law Decree N° 512 of 30 September 1983.

(a) *Products representing derivative financial instruments*

Provided that the Products qualify broadly as derivative instruments for the purposes of Italian tax law, the following consequences apply to an Investor pursuant to Article 67 of Presidential Decree No. 917 of 22 December 1986, as subsequently amended ("**TUIR**").

Pursuant to Legislative Decree No. 461 of 21 November 1997, as subsequently amended, where the Italian resident investor is (i) an individual not engaged in an entrepreneurial activity to which the Products are connected, (ii) a non-commercial partnership, (iii) a non-commercial private or public institution, or (iv) an investor exempt from Italian corporate income taxation, any income deriving from the Products is subject to a 26 per cent. substitute tax (imposta sostitutiva). The recipient may opt for the three different taxation criteria, regime della dichiarazione, risparmio amministrato and risparmio gestito, described in the "Capital Gains Tax" paragraph below.

Where an Italian resident investor is a company or similar commercial entity, or the Italian permanent establishment of a foreign commercial entity to which the Products are effectively connected, income arising from the Products will not be subject to imposta sostitutiva, but must be included in the relevant investor's income tax return and are therefore subject to Italian corporate tax and, in certain circumstances, depending on the "status" of the investors also as a part of the net value of production for IRAP purposes.

Where (i) an Italian resident investor is a Fund, (ii) the relevant Products are deposited with an authorised intermediary, and (iii) the Fund realises a taxable income, such income will be included in the result of the relevant portfolio accrued at the end of the tax period. The Fund will not be subject to taxation on such results but subsequent distributions in favour of unitholders or shareholders may be subject to the Collective Investment Fund Tax.

Income realised by an Italian resident Investor which is an Italian pension fund (subject to the regime provided by Article 17 of the Legislative Decree No. 252 of 5 December 2005) will be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20 per cent. ad hoc substitute tax.

Any income realised by an Italian Real Estate Fund will be subject neither to imposta sostitutiva nor to any other income tax at the level of the Real Estate Fund.

Any income deriving from the Products by non-Italian resident Investors without a permanent establishment in the Republic of Italy to which the Products are effectively connected are not subject to Italian taxation, provided that the Products are held outside Italy or the income derive from transactions executed in regulated markets.

Income realised by non-Italian resident Investors on Products not traded on regulated markets and deposited with a bank, a SIM or certain authorised financial intermediary in Italy are not subject to the imposta sostitutiva, provided that the effective beneficiary: (a) is resident in a country which allows for a satisfactory exchange of information with Italy, is resident in a country which allows for a satisfactory exchange of information with Italy as listed in the Italian Ministerial Decree of 4 September 1996, as amended by Ministerial Decree of 23 April 2017 and possibly further amended by future decrees issued pursuant to Article 11(4)(c) of Decree 239 (the "White List"); (b) is an international entity or body set up in accordance with international agreements which have entered into force in Italy; (c) is a Central Bank or an entity which manages, inter alia, the official reserves of a foreign State; or (d) is an institutional investor which

is resident in a country which is included in the White List, even if not subject to tax in its own country of residence.

In order to benefit from the tax exemption, non-resident investors who deposited the Products with a bank, a SIM or certain authorised financial intermediaries in Italy must withdraw from the so-called risparmio amministrato regime - which provides for the application of an imposta sostitutiva separately on capital gains realised on each sale or redemption of the relevant Products - and file with the relevant depository a statement in which the Investor declares to be eligible to benefit from the applicable exemption from imposta sostitutiva. Such statement, which is not requested for international bodies or entities set up in accordance with international agreements which have entered into force in Italy or in the case of foreign Central Banks or entities which manage the official reserves of a foreign State, must comply with the requirements set forth by Ministerial Decree of 12 December 2001.

If none of the conditions above are met and the Products are deposited with a bank, a SIM or certain authorised financial intermediaries in Italy, income realised by non-Italian resident Investors from the sale or redemption of the Products are subject to the imposta sostitutiva at the current rate of 26 per cent. In any event, non-Italian resident individuals or entities without a permanent establishment in Italy to which the Products are connected, that may benefit from a double taxation treaty with Italy providing that income deriving from the Products are to be taxed only in the country of tax residence of the recipient and comply with the relevant formalities, will not be subject to imposta sostitutiva in Italy on any capital gains realised upon the sale or redemption of Products.

(b) *Atypical securities*

In accordance with a different interpretation of current tax law, there is a possibility that the Products that are not deemed to fall within the category of bonds (*obbligazioni*) or debentures similar to bonds (*titoli similari alle obbligazioni*) would be considered as 'atypical' securities pursuant to Article 8 of Law Decree No. 512 of 30 September 1983 as implemented by Law No. 649 of 25 November 1983. In this event, payments relating to Products may be subject to an Italian withholding tax, levied at the rate of 26 per cent. Such withholding is levied by any entities, resident in Italy, which intervene, in any way, in the collection of payment or transfer of the Products.

The 26 per cent. withholding tax mentioned above does not apply to interest payments made to a non-Italian resident Investor of Products and to an Italian resident Investor of Products which is (i) a company or similar commercial entity (including the Italian permanent establishment of foreign entities), (ii) a commercial partnership, or (iii) a commercial private or public institution. Such income might be subject to income tax in the respective Investor's jurisdiction of residence.

Capital Gains

Any gain obtained from the sale or redemption of the Products would be treated as part of the taxable income (and, in certain circumstances, depending on the "status" of the Investor, also as part of the net value of production for IRAP purposes) if realised by an Italian company or a similar commercial entity (including the Italian permanent establishment of foreign entities to which the Products are connected) or Italian resident individuals engaged in an entrepreneurial activity to which the Products are connected.

Where an Italian resident Investor is (i) an individual not holding the Products in connection with an entrepreneurial activity, (ii) a non-commercial partnership, (iii) a non-commercial private or public institution, any capital gain realised by such Investor from the sale or redemption of the Products would be subject to an imposta sostitutiva, levied at the current rate of 26 per cent. Investors of Products may set off losses against gains, subject to conditions.

In respect of the application of the imposta sostitutiva, taxpayers may opt for one of the three regimes described below.

Under the "tax declaration" regime (*regime della dichiarazione*), which is the default regime for Investors of a Product under (i) to (iii) above, the imposta sostitutiva on capital gains will be chargeable, on a cumulative basis, on all capital gains, net of any incurred capital loss, realised by the Italian resident individuals holding Products not in connection with an entrepreneurial activity pursuant to all sales or redemptions of the Products carried out during any given tax year. The relevant Investor of a Product must indicate the overall capital gain realised in any tax year, net of any relevant incurred capital loss, in its annual tax return and pay the imposta sostitutiva on such gain together with any balance of income tax due for such year. Capital losses in excess of capital gains may be carried forward against capital gains realised in any of the four succeeding tax years, subject to certain limits.

As an alternative to the tax declaration regime, Italian resident individuals holding the Products under (i) to (iii) above may elect to pay the imposta sostitutiva separately on capital gains realised on each sale or redemption of the Products (the "risparmio amministrato" regime). Such separate taxation of capital gains is allowed subject to (i) the Products being deposited with Italian banks, SIMs or certain authorised financial intermediaries (including permanent establishments in Italy of foreign intermediaries); and (ii) an express election for the risparmio amministrato regime being punctually made in writing by the relevant Investor of Products. The depository is responsible for accounting for imposta sostitutiva in respect of capital gains realised on each sale or redemption of the Products (as well as in respect of capital gains realised upon the revocation of its mandate), net of any incurred capital loss, and is required to pay the relevant amount to the Italian tax authorities on behalf of the taxpayer, deducting a corresponding amount from the proceeds to be credited to the Investor of Products or using funds provided by the Investor of Products for this purpose. Under the risparmio amministrato regime, where a sale or redemption of the Products results in a capital loss, such loss may be deducted from capital gains subsequently realised, within the same securities management, in the same tax year or in the following tax years up to the fourth, subject to certain limits.

Any capital gains realised by Italian Investors of a Product under (i) to (iii) above who have entrusted the management of their financial assets, including the Products, to an authorised intermediary and have opted for the so-called "risparmio gestito" regime will be included in the computation of the annual increase in value of the managed assets accrued, even if not realised, at year end, subject to a 26 per cent. substitute tax, to be paid by the managing authorised intermediary. Under the risparmio gestito regime, any depreciation of the managed assets accrued at year end may be carried forward against any increase in value of the managed assets accrued in any of the four succeeding tax years., subject to certain limits Under the risparmio gestito regime, the Investor of Products is not required to declare the capital gains realised in its annual tax return.

Any capital gains realized by an Investor of Products which is an Italian Fund will not be subject to imposta sostitutiva, but will be included in the result of the relevant portfolio. Such result will not be taxed with the Fund, but subsequent distributions in favour of unitholders or shareholders may be subject to the Collective Investment Fund Tax.

Any capital gains realised by an Investor of Products which is an Italian pension fund (subject to the regime provided for by article 17 of the Legislative Decree No. 252 of 5 December 2005) will be included in the result of the relevant portfolio accrued at the end of the tax period, to be subject to the 20 per cent. substitute tax.

Any capital gains realised by an Investor of Products which is an Italian Real Estate Fund will be subject neither to substitute tax nor to any other income tax at the level of the Real Estate Fund.

Capital gains realised by non-Italian resident Investors of Products from the sale or redemption of the Products are not subject to Italian taxation, provided that the Products (i) are traded on regulated markets, or (ii) if not traded on regulated markets, are held outside Italy.

Capital gains realised by non-Italian resident Investors from the sale or redemption of Products not traded on regulated markets and deposited with a bank, a SIM or certain authorised financial intermediary in Italy are not subject to the imposta sostitutiva, provided that the effective beneficiary: (a) is resident in a country which allows for a satisfactory exchange of information

with Italy as listed in the White List; (b) is an international entity or body set up in accordance with international agreements which have entered into force in Italy; (c) is a Central Bank or an entity which manages, inter alia, the official reserves of a foreign State; or (d) is an institutional investor which is resident in a country which is included in the White List, even if not subject to tax in its own country of residence.

In order to benefit from the tax exemption, non-resident investors who deposited the Products with a bank, a SIM or certain authorised financial intermediaries in Italy must withdraw from the so-called *risparmio amministrato* regime - which provides for the application of an *imposta sostitutiva* separately on capital gains realised on each sale or redemption of the relevant Products - and file with the relevant depositary a statement in which the Investor declares to be eligible to benefit from the applicable exemption from *imposta sostitutiva*. Such statement, which is not requested for international bodies or entities set up in accordance with international agreements which have entered into force in Italy or in the case of foreign Central Banks or entities which manage the official reserves of a foreign State, must comply with the requirements set forth by Ministerial Decree of 12 December 2001.

If none of the conditions above are met and the Products are deposited with a bank, a SIM or certain authorised financial intermediaries in Italy, capital gains realised by non-Italian resident Investors are subject to the *imposta sostitutiva* at the current rate of 26 per cent. In any event, non-Italian resident individuals or entities without a permanent establishment in Italy to which the Products are connected, that may benefit from a double taxation treaty with Italy providing that capital gains realised upon the sale or redemption of Products are to be taxed only in the country of tax residence of the recipient and comply with the relevant formalities, will not be subject to *imposta sostitutiva* in Italy.

Inheritance and gift taxes

Pursuant to Law Decree No. 262 of 3 October 2006 converted into Law No. 286 of 24 November 2006, as subsequently amended, the transfers of any valuable asset (including shares, bonds or other securities) as a result of death or donation are taxed as follows:

1. transfers in favour of spouses and direct descendants or direct ancestors are subject to an inheritance and gift tax applied at a rate of four per cent. on the value of the inheritance or the gift exceeding, for each beneficiary, €1,000,000;
2. transfers in favour of relatives to the fourth degree or relatives-in-law to the third degree are subject to an inheritance and gift tax at a rate of six per cent. on the entire value of the inheritance or the gift. Transfers in favour of brothers/sisters are subject to the six per cent. inheritance and gift tax on the value of the inheritance or the gift exceeding, for each beneficiary, €100,000; and
3. any other transfer is, in principle, subject to an inheritance and gift tax applied at a rate of eight per cent. on the entire value of the inheritance or the gift.

If the transfer is made in the favour of persons with severe disabilities, the tax is levied at the rate mentioned above on the value exceeding, for each beneficiary, €1,500,000.

Transfer tax

Following the repeal of the Italian transfer tax contracts relating to the transfer of Products are subject to the registration tax as follows: (i) public deeds and notarised deeds are subject to fixed registration tax at the rate of €200.00; (ii) private deeds are subject to registration tax in case of use or voluntary registration.

Stamp duty

Pursuant to Article 19(1) of Decree No. 201 of 6 December 2011 ("Decree 201"), a proportional stamp duty applies on an annual basis to any periodic reporting communications which may be sent by a financial intermediary to an Investor in respect of any Products which may be deposited with such financial intermediary. The stamp duty applies at a rate of 0.2 per cent. and it cannot exceed €14,000, for taxpayers who are not individuals. This stamp duty is determined

on the basis of the market value or – if no market value figure is available – the nominal value or redemption amount of the Products held.

Based on the wording of the law and the implementing decree issued by the Italian Ministry of Economy on 24 May 2012, the stamp duty applies to any investor who is a client (as defined in the regulations issued by the Bank of Italy on 20 June 2012) of an entity that exercises in any form a banking, financial or insurance activity within the Italian territory.

The communication is deemed to be sent to the customers at least once a year, even for instruments for which it is not mandatory.

Wealth Tax on Products deposited abroad

Pursuant to Article 19(18) of Decree 201, Italian resident individuals holding the Products outside the Italian territory are required to pay an additional tax at a rate of 0.2 per cent. ("**IVAFE**").

This tax is calculated on the market value of the Products at the end of the relevant year or – if no market value figure is available – the nominal value or the redemption value of such financial assets held outside the Italian territory. Taxpayers are entitled to an Italian tax credit equivalent to the amount of wealth taxes paid in the State where the financial assets are held (up to an amount equal to the Italian wealth tax due).

Pursuant to article 1(710) of Law no. 160 of 27 December 2019, as of fiscal year 2020 the mentioned tax is also due by Italian resident non-commercial entities and Italian partnerships (i.e. società semplici and assimilated companies) holding the Products outside the Italian territory.

Tax Monitoring

Pursuant to Law Decree No. 167 of 28 June 1990, converted by Law No. 227 of 4 August, 1990, as amended, individuals (and certain other entities) resident in Italy who hold investments abroad or have financial activities abroad must, in certain circumstances, disclose the aforesaid and related transactions to the Italian tax authorities in their income tax return (or, in case the income tax return is not due, in a proper form that must be filed within the same time as prescribed for the income tax return). This also applies in the case that, at the end of the tax year, Products are no longer held by the above Italian resident individuals and entities.

However, the above reporting obligation is not required in case the financial assets are deposited for management with Italian banks, SIMs, fiduciary companies or other professional intermediaries, indicated in article 1 of Decree No. 167 of 28 June 1990, or if one of such intermediaries intervenes, also as a counterpart, in their transfer, provided that income deriving from such financial assets is collected through the intervention of such an intermediary.

*Italian Financial Transaction Tax ("**IFTT**")*

Italian shares and other participating instruments, as well as depositary receipts representing those shares and participating instruments irrespective of the relevant issuer (cumulatively referred to as "In-Scope Shares"), received by an Investor upon physical settlement of the Products may be subject to 0.2 per cent. IFTT calculated on the higher of the exercise value of the Products as determined according to Article 4 of the Ministerial Decree of 21 February 2013, as amended (the "**IFTT Decree**").

Investors in derivative transactions or transferable securities, including certificates, and, certain equity-linked notes, mainly having as underlying or mainly linked to In-Scope Shares are subject to IFTT at a rate ranging between €0.01875 and €200 per counterparty, depending on the notional value of the relevant derivative transaction or transferable securities calculated pursuant to Article 9 of the IFTT Decree. IFTT applies upon subscription, negotiation or modification of the derivative transactions or transferable securities or the equity linked notes, as described above. The tax rate may be reduced to a fifth if the transaction is executed on certain qualifying regulated markets or multilateral trading facilities.

Implementation in Italy of the EU Savings Directive

Italy has implemented the EU Savings Directive through Legislative Decree No. 84 of 18 April 2005 ("**Decree No. 84**"). Under Decree No. 84, subject to a number of important conditions being met, in the case of interest paid to individuals which qualify as beneficial owners of the interest payment and are resident for tax purposes in another Member State, Italian qualified paying agents shall not apply the withholding tax and shall report to the Italian Tax Authorities details of the relevant payments and personal information on the individual beneficial owner. Such information is transmitted by the Italian Tax Authorities to the competent foreign tax authorities of the State of residence of the beneficial owner.

On 10 November 2015, the Council of the European Union adopted a Council Directive (EU) 2015/2060 repealing, with effect from 1 January 2017 in the case of Austria and from 1 January 2016 in the case of all EU Member States, the EU Savings Directive ("**Repealing Directive**") to prevent overlap between the Savings Directive and the new automatic exchange of information regime provided for by Council Directive 2011/16/EU on Administrative Cooperation in the field of Taxation (implemented in Italy with the Legislative Decree No. 29 of 4 March 2014).

The new regime under the Council Directive 2011/16/EU (as amended by Council Directive 2014/107/EU and by Council Directive 2015/2376/EU) is in accordance with the Global Standard released by the Organisation for Economic Cooperation and Development in July 2014 and is generally broader in scope than the Saving Directive, although it does not impose withholding taxes.

For the purposes of the implementation in Italy of the Directive 2015/2060, Law No. 122 of 7 July 2016 has repealed the Decree No. 84 with effect from 1 January 2016.

8. ***Luxembourg Taxation***

The following overview is of a general nature and is included herein solely for information purposes. It is a general description of certain Luxembourg tax considerations relating to the purchasing, holding and disposing of Products.

This description is based on the laws, regulations and applicable tax treaties as in effect in Luxembourg on the date hereof, all of which are subject to change, possibly with retroactive effect. It is not intended to be, nor should it be construed to be, legal or tax advice.

The following overview does not purport to be a comprehensive description of all tax considerations that may be relevant to a particular prospective holder with regard to a decision to purchase, own or dispose of Securities.

Prospective holders are advised to consult their own tax advisers as to the tax consequences, under the tax laws of the country of which they are resident and under the laws of the all relevant jurisdictions, to which they may be subject.

The residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a tax, duty, levy, impost or other charge or withholding of a similar nature refers to Luxembourg tax law and/or concepts only.

8.1 **Withholding tax**

(a) Non-Luxembourg tax resident holders

Under the Luxembourg general tax laws currently in force, there is no withholding tax to be withheld by the debtor of Products on payments of principal, premium or arm's length non-profit participating interest (including accrued but unpaid interest) to non-Luxembourg tax resident holders. Nor is any Luxembourg withholding tax payable upon redemption or repurchase of Products held by non-Luxembourg tax resident holders to the extent said Products do not (i) give entitlement to a share of the profits generated by the issuing company and (ii) the issuing company is not thinly capitalised.

(b) Luxembourg tax resident holders

Under Luxembourg general tax laws currently in force and subject to the law of 23 December 2005, as amended (hereinafter the "Law"), there is no withholding tax to be withheld by the debtor of Products on payments of principal, premium or arm's length non-profit participating interest (including accrued but unpaid interest) to Luxembourg tax resident holders. Nor is any Luxembourg withholding tax payable upon redemption or repurchase of Products held by Luxembourg tax resident holders to the extent said Products do not (i) give entitlement to a share of the profits generated by the issuing company and (ii) the issuing company is not thinly capitalised.

Under the Law, payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to or for the immediate benefit of an individual beneficial owner who is tax resident of Luxembourg will be subject to a withholding tax of 20 per cent.

Luxembourg resident individuals can opt to self declare and pay a 20 per cent. levy on interest payments made or ascribed by paying agents located in a member state of the European Union other than Luxembourg or a member state of the European Economic Area.

In case the individual beneficial owner is an individual acting in the course of the management of his/her private wealth, said withholding tax will be in full discharge of income tax. Responsibility for the withholding tax will be assumed by the Paying Agent. Payments of interest under Products coming within the scope of the Law would be subject to withholding tax at a rate of 20 per cent.

8.2 **Registration tax**

Neither the issuance nor the transfer of Products will give rise to any Luxembourg stamp duty, issuance tax, registration tax, transfer tax or similar taxes or duties. Notwithstanding, documents relating to the Products, other than the Products themselves, attached to a notarial deed may require registration. In this case, and based on the nature of such documents, registration duties may apply.

8.3 **Automatic exchange of information**

Under the law of 18 December 2015 implementing the Directive on Administrative Cooperation ("DAC2") and the OECD Common Reporting Standard (the "CRS") (the "Law"), since 1 January 2016, the Luxembourg financial institutions are required to provide to the fiscal authorities of other EU member states and jurisdictions participating to the CRS details of payments of interest, dividends and similar type of income, gross proceeds from the sale of financial assets and other income, and account balances held on reportable accounts, as defined in the DAC2 and the CRS, of account holders residents of, or established in, an EU member state and certain dependent and associated territories of EU member states or in a jurisdiction which has introduced the CRS in its domestic law.

Payment of interest and other income derived from the Products will fall into the scope of the Law and are therefore subject to reporting obligations.

Prospective investors should consult their own tax advisor with respect to the application of the DAC2 and the CRS to such investor in light of such investor's individual circumstances.

9. **Swiss Taxation**

9.1 **Swiss Federal Stamp Duties**

Neither the issuance of Products nor the trade of Products which classify as pure derivatives for Swiss Federal Stamp Duty purposes are normally subject to Swiss Federal Issuance Tax (*Emissionsabgabe*) and/or Swiss Federal Securities Transfer Tax (*Umsatzabgabe*) even if an Issuer resident in Switzerland issues the Products. Exemptions to these rules apply to Products which, due to specific features, are considered debt financing instruments (bonds or money market securities), share-like or fund-like products, as well as Low Exercise Price Options (LEPO) on shares (with a maturity exceeding one year) for purposes of Swiss Federal Stamp

Duty law. These specific types of products are in general subject to Swiss Federal Securities Transfer Tax. If upon the exercise or redemption of a Product an underlying security is delivered to the investors, the transfer of the underlying security may be subject to Swiss Securities Transfer Tax (i) of 0.15% in the case of an underlying security which has been issued by a Swiss resident issuer or (ii) of 0.3% in the case of an underlying security which has been issued by an issuer resident abroad, provided in both cases that a Swiss securities dealer (*Effekthändler*), as defined in art. 13 para. 3 of the Swiss Federal Act on Stamp Duties (*Bundesgesetz über die Stempelabgaben*), is a party to the transaction with the Products or acts as an intermediary thereto. Certain exemptions may, inter alia, apply regarding certain institutional investors such as mutual funds, life insurance companies and social security institutions.

9.2 *Swiss Federal Withholding Tax (Verrechnungssteuer)*

Payments by the Issuer of interest on, and repayment of principal of, the Products are, in principle, not subject to Swiss Federal Withholding Tax, provided that the Issuer does not qualify at any time as a Swiss tax resident for Swiss Federal Withholding Tax purposes and the proceeds of the Products will be used outside of Switzerland unless use in Switzerland is permitted under applicable Swiss Federal Withholding Tax rules (all as interpreted by the Swiss Federal Tax Administration).

According to a confirmation obtained from the Swiss Federal Tax Administration, subject to certain conditions being met, the payments made from Products issued by Leonteq Securities AG, Guernsey Branch, and Leonteq Securities AG, Amsterdam Branch, will not be subject to the Swiss Federal Withholding Tax.

For Products subject to Swiss Federal Withholding Tax, the Issuer will arrange for withholding of taxes at the source. The Investor who is resident in Switzerland may be entitled to a full refund of or a full tax credit for the Swiss Federal Withholding Tax, subject to conditions being met.

A non-Swiss resident Investor may be able to claim a full or partial refund of the Swiss Federal Withholding Tax if such an investor is entitled to claim the benefits with regard to such a payment of a double taxation treaty concluded between Switzerland and his or her country of residence.

On 3 April 2020, the Swiss Federal Council proposed draft legislation and opened the consultation procedure regarding the reform of the Swiss Federal Withholding Tax regime, which had previously been suspended since 2014. A main aspect of the draft legislation is the exemption of Swiss-domiciled legal entities and foreign investors from Swiss Federal Withholding Tax on income from Swiss debt investments. If enacted, Swiss-domiciled individual investors would remain the only group of investors still subject to Swiss Federal Withholding Tax. In addition, the draft law also imposes Swiss Federal Withholding Tax on income to Swiss resident investors from Products issued outside of Switzerland provided such products are held through an account at a Swiss paying agent. Technically, the draft legislation replaces the current debtor-based regime with a paying agent-based regime. This paying agent-based regime (i) subjects all interest payments made through paying agents in Switzerland to individuals resident in Switzerland to Swiss Federal Withholding Tax and (ii) generally exempts interest payments to other persons, including to Swiss-domiciled legal entities and foreign investors from Swiss Federal Withholding Tax. The Swiss resident investor remains entitled to a full reclaim of the Swiss Federal Withholding Tax under the draft law, provided respective conditions are met.

9.3 *Income Taxes at interest payment or repayment of principal*

The Swiss Federation, Cantons and Communes in Switzerland are entitled to impose Swiss Income Taxes.

Payments of interest on the Products and repayment of principal of the Products to an investor who is a non-resident of Switzerland and who, during the tax period, has not engaged in a trade or business through a permanent establishment or a fixed place of business within Switzerland

and who is not subject to income taxation in Switzerland for any other reason ("**Non-Resident Holders of the Products**") will not be liable to Swiss Income Taxes.

Holders of the Products who are individuals resident in Switzerland and who hold the Products as private assets ("**Resident Holders of the Products**") and who receive payments of interest on Products are required to include such amounts in their personal income tax return and will be taxable on any net taxable income (including the payments of interest on the Products) for the respective tax period. In the case of Products with a "predominant one-time interest payment" (*Obligationen mit überwiegender Einmalverzinsung*), the increase in the value of the Products at sale or maturity, being the positive amount of the sales price less the issuance or later purchase price or, in the case of Products purchased after issuance and held to maturity, the positive amount of the redemption amount less the purchase price, is also taxable income and does not qualify as a tax-free capital gain. The offsetting of losses realised on the sale of Products with a 'predominant one-time interest payment' is, according to the practice of the Swiss Federal Tax Administration, limited to gains on the sale of any Products with a 'predominant one-time interest payment' within the same tax period.

Individual taxpayers who hold Products as part of Swiss business assets, and corporate taxpayers holding Products as part of Swiss business assets ("**Domestic Commercial Holders of the Products**") who receive payments of interest on Products, are required to recognize the payments of interest on Products as earnings in their profit and loss statement for the respective tax period, and will be taxable on any net taxable earnings (including the payments of interest on the Products) for such period. The same applies to Swiss resident individual investors who qualify as so-called professional securities dealer for income tax purposes (*gewerbsmässiger Wertschriftenhändler*).

9.4 **Swiss Income Taxes at sale or redemption**

Products held by Non-Resident Holders of the Products will not be liable to Swiss Income Taxes on gains realized from the sale or redemption of the Products.

Resident Holders of the Products who sell or otherwise dispose of the Products in principle realize a tax-free capital gain or a tax-neutral capital loss, respectively for Swiss Income Tax purposes. In the case of gains or losses realized on Products with a "predominant one-time interest payment" please refer to the explanations above relative to income taxation of principal or interest.

Domestic Commercial Holders of the Products are required to recognize capital gains or losses realized on the sale of the Products in their profit and loss statement for the respective tax period, and will be liable to Swiss Income Tax on any net profit from such sale. The same applies to Swiss resident individual investors who qualify as so-called professional securities dealer for income tax purposes (*gewerbsmässiger Wertschriftenhändler*).

9.5 **Wealth Tax / Capital Tax**

Cantons and Communes in Switzerland are entitled to impose a Wealth and/or Capital Tax. At federal level, no such tax is levied.

Non-Resident Holders of the Products are not liable to Wealth Tax or Capital Tax.

Resident Holders of the Products or individuals that are Domestic Commercial Holders of the Products are required to report the Products as part of their private wealth or as part of their Swiss business assets, as the case may be, and are liable to Wealth Tax on any net taxable wealth (including the Products). In the case of individuals that are Domestic Commercial Holders of the Products, however, they are only liable to Wealth Tax to the extent aggregate taxable wealth is allocable to Switzerland.

Corporate Domestic Commercial Holders of the Products are required to report the Products as part of their assets in their financial statements and are subject to Capital Tax on net taxable equity. In the case of a non-Swiss resident corporate Domestic Commercial Holders of the Products holding Products as part of a Swiss permanent establishment, however, they are only liable to Capital Tax to the extent aggregate taxable equity is allocable to Switzerland.

9.6 *International Automatic Exchange of Information in Tax Matters*

On 19 November 2014, Switzerland signed the Multilateral Competent Authority Agreement. Such Multilateral Competent Authority Agreement is based on article 6 of the Organization for Economic Cooperation and Development/Council of Europe administrative assistance convention and is intended to ensure the uniform implementation of Automatic Exchange of Information ("AEOI"). The Federal Act on the International Automatic Exchange of Information in Tax Matters ("**AEOI Act**") entered into force on 1 January 2017. The AEOI Act is the legal basis for the implementation of the AEOI standard in Switzerland.

The AEOI is being introduced in Switzerland through bilateral agreements or multilateral agreements. The agreements have, and will be, concluded on the basis of guaranteed reciprocity, compliance with the principle of specialty (i.e., the information exchanged may only be used to assess and levy taxes (and for criminal tax proceedings)) and adequate data protection.

Based on such multilateral or bilateral agreements and the implementation of Swiss law, Switzerland collects and exchanges data in respect of financial assets, including, as the case may be, the Products, held in, and income derived thereon and credited to, accounts or deposits with a paying agent in Switzerland for the benefit of individuals resident in a European Union member state or in a treaty state. As regards the United Kingdom, the following applies: During the transition period or until the United Kingdom definitively leaves the European Union single market and the customs union, the agreement on the AEOI concluded between Switzerland and the European Union remains applicable to the United Kingdom. After the end of the transition period or when the United Kingdom definitively leaves the European Union single market (probably on 1 January 2021), the AEOI between Switzerland and the United Kingdom should continue based on Multilateral Competent Authority Agreement

9.7 *Swiss Facilitation of the Implementation of the U.S. Foreign Account Tax Compliance Act*

Switzerland has concluded an intergovernmental agreement with the U.S. to facilitate the implementation of the U.S. Foreign Tax Compliance Act (FATCA). The agreement ensures that the accounts held by U.S. persons with Swiss financial institutions are disclosed to the U.S. tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance. Information will not be transferred automatically in the absence of consent, and instead will be exchanged only within the scope of administrative assistance on the basis of the double taxation agreement between the U.S. and Switzerland. On 8 October 2014, the Swiss Federal Council approved a mandate for negotiations with the U.S. on changing the current direct-notification-based regime to a regime where the relevant information is sent to the Swiss Federal Tax Administration, which in turn provides the information to the U.S. tax authorities.

10. *Swedish Taxation*

Swedish withholding tax

There is no Swedish withholding tax at source (källskatt) applicable on payments made by the issuer in respect of the Products. However, Sweden operates a system of preliminary tax (preliminärskatt) to secure payment of taxes. In the context of the Products a preliminary tax of 30 per cent. will be deducted from all payments of interest in respect of the Products made to any individuals, or estates, that are resident in Sweden for tax purposes provided the paying entity is subject to reporting obligations. A preliminary tax of 30 per cent. will also be deducted from any other payments in respect of the Products not treated as capital gains, if such payments are paid out together with payments treated as interest. Depending on the relevant holder's overall tax liability for the relevant fiscal year the preliminary tax may contribute towards, equal or exceed the holder's overall tax liability with any balance subsequently to be paid by or to the relevant holder, as applicable.

11. *United Kingdom Taxation*

The following comments are of a general nature, relating only to the position of persons who are absolute beneficial owners of the Products and is based on United Kingdom law and what

is understood to be the current practice of Her Majesty's Revenue & Customs ("HMRC"), in each case at the date of this Base Prospectus, which may change at any time, possibly with retrospective effect. The following is a general overview only of the United Kingdom withholding taxation treatment at the date hereof in relation to income payments in respect of the Products. The overview also contains some very general statements about stamp duty and stamp duty reserve tax ("SDRT"). The comments are not exhaustive, and do not deal with other United Kingdom tax aspects of acquiring, holding, disposing of, abandoning, exercising or dealing in the Products.

Interest payments

Interest will only be subject to a deduction on account of United Kingdom income tax if it has a United Kingdom source in which case it may fall to be paid under deduction of United Kingdom income tax at the basic rate (currently 20 per cent.) subject to such relief as may be available under the provisions of any applicable double taxation treaty or to any other exemption which may apply.

Whether or not interest has a United Kingdom source will depend on the facts. The most important factor will be the residence of the debtor and the location of its assets. Interest on securities issued by a United Kingdom resident issuer or an issuer acting out of the United Kingdom are likely to have a United Kingdom source.

Where interest has a United Kingdom source, any payment of interest may nonetheless be made without withholding or deduction for or on account of United Kingdom income tax where any of the following conditions are satisfied:

- (i) if the Products are and continue to be "quoted Eurobonds" as defined in section 987 of the In-come Tax Act 2007. The Products will constitute "quoted Eurobonds" if they carry a right to interest and are and continue to be listed on a recognised stock exchange within the meaning of section 1005 of the Income Tax Act 2007. Products admitted to trading on a recognised stock exchange outside the United Kingdom will be treated as "listed" on a recognised stock exchange if (and only if) they are admitted to trading on that exchange and they are officially listed in accordance with provisions corresponding to those generally applicable in European Economic Area states in a country outside the United Kingdom in which there is a recognised stock exchange;
- (ii) so long as the respective Issuer is authorised for the purposes of the Financial Services and Markets Act 2000 and its business consists wholly or mainly of dealing in financial instruments (as defined by section 984 of the Income Tax Act 2007) as principal, provided the payment is made in the ordinary course of that business; or
- (iii) if the relevant interest is paid on Products with a maturity date of less than one year from the date of issue and which are not issued under arrangements the effect of which is to render such Products part of a borrowing with a total term of a year or more.

The references to "interest" above mean "interest" as understood in United Kingdom tax law and in particular any premium element of the redemption amount of any Products redeemable at a premium may constitute a payment of interest subject to the withholding tax provisions discussed above. The statements above do not take any account of any different definitions of "interest" or "principal" which may prevail under any other law or which may be created by the terms and conditions of the Products or any related documentation.

12. *United States Taxation*

The following is an overview of certain of the material US federal income tax consequences of the acquisition, ownership and disposition of Products by a non-US holder that has no connection to the United States other than holding the Products. For purposes of this section, a "non-US holder" is a beneficial owner of Products that is: (i) a non-resident alien individual for US federal income tax purposes; (ii) a foreign corporation for US federal income tax purposes; or (iii) an estate or trust whose income is not subject to US federal income tax on a net income basis. If a partnership (including any entity treated as a partnership for US federal income tax

purposes) holds Products, the tax treatment of a partner generally will depend on the status of the partner and upon the activities of the partnership. Investors that are not non-US holders or investors that are partnerships, should consult their tax advisers with regard to the US federal income tax considerations of an investment in the Products.

This summary is based on interpretations of the US Internal Revenue Code of 1986 (the "**Code**"), Treasury regulations issued thereunder, and rulings and decisions currently in effect (or in some cases proposed), all of which are subject to change. Any of those changes may be applied retroactively and may adversely affect the US federal income tax consequences described herein. Prospective investors should consult their own tax advisers concerning the application of US federal income tax laws to their particular situations as well as any consequences of the purchase, beneficial ownership and disposition of Products arising under the laws of any other taxing jurisdiction.

INVESTORS SHOULD CONSULT THEIR TAX ADVISERS AS TO THE US FEDERAL, STATE, LOCAL, AND OTHER TAX CONSEQUENCES TO THEM OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF PRODUCTS.

Withholding Under Section 871(m)

Under section 871(m) of the Code and regulations thereunder, a payment on a financial instrument that directly or indirectly references a US company may be treated as a "dividend equivalent" payment from sources within the United States. Such payments generally will be subject to US withholding tax at a rate of 30 per cent. The regulations provide that a payment includes a dividend equivalent payment whether there is an explicit or implicit reference to a dividend with respect to the underlying security. An underlying security is any interest in an entity if a payment with respect to that interest could give rise to a US source dividend. Certain exceptions may apply to an issue of Products that references an index that is treated as a "qualified index".

Final regulations and administrative guidance provide that with respect to a financial instrument issued on or after 1 January 2017 and before 1 January 2023, an instrument that has a delta of one with respect to an underlying security will be subject to withholding. With respect to a financial instrument issued on or after 1 January 2023, (a) a "simple" financial instrument that has a delta of 0.8 or greater with respect to an underlying security and (b) a "complex" financial instrument that meets the "substantial equivalence test" with respect to an underlying security will be subject to withholding under section 871(m). The delta of a simple instrument is determined, and the substantial equivalence test for a complex instrument is performed, on the earlier of the date that the financial instrument is priced and the date when the financial instrument is issued; however, the issue date must be used if the financial instrument is priced more than 14 calendar days before it is issued. In addition, the delta or substantial equivalence of Products that are sold or acquired after their initial issuance may, in certain cases, be required to be retested at the time of sale. If such Products are determined to be section 871(m) transactions, it is possible that all holders of Products, including holders of Products sold at their initial issuance, may be adversely affected if the Issuer or a withholding agent does not, or is unable to, identify and distinguish Products sold at initial issuance and thereafter.

Certain events may cause previously issued Products to be deemed to be new issuances for purposes of the effective dates provided in the regulations. For example, it is possible that the IRS could assert that a reconstitution or rebalancing of an underlying basket or index is a significant modification of a Product due to an exercise of discretion with respect to such reconstitution or rebalancing and a deemed reissuance upon the occurrence of such event. It is also possible that US withholding tax could apply to the Products under these rules if a holder enters, or has entered, into certain other transactions in respect of the underlying equity or the Products. A holder that enters, or has entered, into other transactions in respect of the underlying or the Products should consult its own tax advisor regarding the application of section 871(m) to its Products in the context of its other transactions.

Withholding on payments will be based on actual dividends or, if otherwise notified by the Issuer in accordance with applicable regulations, on estimated dividends used in pricing the Product. If a Product provides for any payments in addition to estimated dividends to reflect

dividends on the underlying security, withholding will be based on total payments. If the Products are subject to withholding under section 871(m), information regarding the amount of each dividend equivalent and any other information necessary to apply the regulations in respect of such Products will be provided, communicated, or made available to holders of the Products in a manner permitted by the applicable regulations. Withholding tax may apply even where holders do not receive a concurrent payment on the Products in respect of dividends on a reference asset. US tax will be withheld on any portion of a payment or deemed payment on the Products treated as a dividend equivalent.

If payments on the Products are subject to withholding under section 871(m), the Issuer expects to withhold at 30 per cent. even if a holder is otherwise eligible for a reduction under an applicable treaty. Non-US holders that are entitled to a lower rate of withholding under a tax treaty may be able to claim a refund for any excess amounts withheld by filing a US tax return. However, holders may not receive the necessary information to properly claim a refund for any withholding in excess of the applicable treaty-based amount. In addition, the IRS may not credit a holder for withholding taxes remitted in respect of a Product for purposes of claiming a refund. Finally, a holder's resident tax jurisdiction may not permit the holder to take a credit for US withholding taxes related to dividend equivalent amounts. The Issuer will not pay any additional amounts with respect to amounts withheld.

The relevant Issue Terms may indicate if the Issuer has determined that a Product is subject to withholding under section 871(m). Although the Issuer's determination generally is binding on holders, it is not binding on the IRS. The IRS may successfully argue that a Product is subject to withholding under section 871(m), notwithstanding the Issuer's determination to the contrary. The section 871(m) regulations are extremely complex. Holders should consult their tax advisors regarding the US federal income tax consequences to them of section 871(m) and regulations thereunder, and whether payments or deemed payments on the Products constitute dividend equivalent payments.

Foreign Investment in Real Property Tax

Under Section 897 of the Code, commonly referred to as the US Foreign Investment in Real Property Tax Act ("**FIRPTA**"), a Non-US Holder may be subject to US federal income tax on a disposition of a United States real property interest (a "**USRPI**"). Very generally, a USRPI may be an interest in US real property or an interest in a United States real property holding corporation (a "**USRPHC**") within the meaning of Section 897 of the Code. However, an interest in a USRPHC that does not exceed generally 5 per cent. of the corporation's regularly traded stock is not a USRPI, after taking into account shares or interests of the underlying issuer that are directly, indirectly or constructively owned by such Non-US Holder. In addition, holding Products may also impact the taxation of such other shares or interests.

The Issuer will not attempt to ascertain whether an issuer of reference shares, or an issuer of shares that are components of an index or basket, is a USRPHC. If a Product is a USRPI, any gain from the disposition thereof generally would be subject to US federal income tax and required to be reported by the Non-US Holder on a US federal income tax return, and the amount realised on such disposition would in certain cases be subject to withholding at a rate of 15 per cent. Even if the Issuer does not withhold, there can be no assurance that a withholding agent will not withhold in respect of a Product. A Non-US Holder may have US income tax liability that exceeds amounts withheld, if any. Neither the Issuer nor a withholding agent will pay any additional amounts in respect of amounts withheld or any tax liability arising under section 897 of the Code. Non-US Holders should consult with their tax advisors regarding the application of section 897 to an investment in the Products.

US Federal Estate Tax

Products may be subject to US federal estate tax if an individual holds the Products at the time of his or her death. The gross estate of a holder domiciled outside the United States includes only property situated in the United States. Holders should consult their tax advisors regarding the US federal estate tax consequences of holding the Products at death.

Backup Withholding and Information Reporting

A holder may be subject to backup withholding with respect to certain amounts paid to such holder unless it provides a correct taxpayer identification number, complies with certain certification procedures establishing that it is not a US person or establishes proof of another applicable exemption, and otherwise complies with applicable requirements of the backup withholding rules. Backup withholding is not an additional tax. A holder can claim a credit against its US federal income tax liability for amounts withheld under the backup withholding rules, and amounts in excess of its liability are refundable if such holder provides the required information to the IRS in a timely fashion. A holder may also be subject to information reporting to the IRS with respect to certain amounts paid to such holder unless it (1) provides a properly executed IRS Form W-8 (or other qualifying documentation) or (2) otherwise establishes a basis for exemption. If such withholding applies, the Issuer will not be required to pay any additional amounts with respect to amounts withheld.

13. **FATCA**

Under sections 1471 through 1474 of the Code, any final current or future regulations or official interpretations thereof, any agreement entered into pursuant to section 1471(b) of the Code, or any US or non-US fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of such sections of the Code or any other non-US tax information reporting regimes ("**FATCA**"), a 30 per cent withholding tax may be imposed on "withholdable payments" and certain "passthru payments" made to (i) a "foreign financial institution" unless the financial institution complies with, among other things, certain information reporting and withholding obligations with respect to its accounts in accordance with applicable rules, and (ii) any other holder or beneficial owner that does not comply with the Issuer's or an intermediary financial institution's request for ownership certifications and identifying information. The failure to provide such information, or the failure of certain non-US financial institutions to comply with FATCA, may compel the Issuer or an intermediary to withhold 30 per cent. on payments on the Products to such holders. Neither the Issuer nor any other person will pay any additional amounts with respect to such withholding.

Withholding under FATCA applies currently to "withholdable payments" and with respect to "foreign passthru payments," will apply no earlier than the date that is two years after the date on which final US Treasury regulations defining "foreign passthru payments" are published. Notwithstanding the foregoing, the withholding provisions of FATCA discussed above generally will not apply to any obligation (other than an obligation that is treated as equity for US tax purposes or that lacks a stated expiration or term) that is outstanding on 30 June 2014 (a "grandfathered obligation"), unless the obligation is materially modified after such date.

The discussion above reflects recently proposed US Treasury regulations. The US Treasury have indicated that taxpayers may rely on the proposed regulations until final regulations are issued, and the discussion above assumes that the proposed regulations will be finalised in their current form.

No assurance can be given that payments on the Products will not be subject to withholding under FATCA. Each potential investor in Products should consult its own tax advisor to determine how FATCA may affect an investment in the Products in such investor's particular circumstance.

PURCHASE AND SALE

No representation is made that any action has been or will be taken by the Issuer or the Lead Manager in any jurisdiction that would permit a public offering of any of the Products or possession or distribution of the Base Prospectus or any other offering material or any Issue Terms in relation to any Products in any country or jurisdiction where action for that purpose is required (other than actions by the Issuer to meet the standards of completeness, comprehensibility and consistency of the Prospectus Regulation for offerings contemplated in this Base Prospectus and/or the Final Terms). No offers, sales, resales or deliveries of any Products, or distribution of any offering material relating to any Products, may be made in or from any jurisdiction and/or to any individual or entity except in circumstances which will result in compliance with any applicable laws and regulations and which will not impose any obligation on the Issuer and/or the Lead Manager.

Subject to the restrictions and conditions set out in this Base Prospectus, the categories of potential investors to which the Products are intended to be offered are retail and institutional investors.

Selling Restrictions

European Economic Area and United Kingdom

If the Final Terms specifies the "Prohibition of Sales to EEA and UK Retail Investors" as "Not Applicable", in relation to each Member State of the European Economic Area and the United Kingdom (each, a "**Relevant State**"), each offeror appointed pursuant to the Programme will be required to represent and agree, that it has not made and will not make an offer of Products which are the subject of the offering contemplated by this Base Prospectus as completed by the Final Terms in relation thereto to the public in that Member State except that it may make an offer of such Products to the public in that Relevant State:
