## What is this product?

### Type

This is an investment fund established as a Company With Variable Capital (SICAV).

### Objectives

**Investment objective** The Sub-fund's aim is to create added value by implementing the investment policy by the Investment Manager, based on the advice received in this respect from the Investment Adviser.

**Investment policies** The Sub-Fund will invest its assets, either directly or indirectly, in listed equities worldwide directly or indirectly related to the blockchain technology, which is an advance database mechanism that allows transparent information sharing within a business network, linked together in a chain to become unalterable or immutable (such assets shall represent, under normal market conditions, between 30% and 75% of the sub-fund's net assets) as well as in other eligible assets such as, but not limited to, debt or debt securities, Money Market Instruments, term deposits, etc.

Investment shall be made without any geographical or economic restriction.

The Sub-Fund's policy is also realized by investments in UCITS and/or other UCIs (including money market funds), including Sub-Funds of the Fund or sub-funds of UCIs managed by the same Investment Manager. Hedging techniques may be used but there is no guarantee that such hedging will be effective.

In addition, the Sub-Fund may also use, for the purpose of efficient portfolio management and proxy hedging, currency forwards and options, as well as listed futures (and related options) on government bonds, interest rates, currencies and equity indices.

Participation in the options, forwards or futures markets and in currency exchange transactions involves investment risks and transaction costs to which the Sub-Fund would not be subject in the absence of the use of these strategies.

No more than 10% of the assets of the Sub-Fund may in aggregate be invested in units or shares of other UCITS and/or UCIs (including money market funds) and ancillary liquid assets (i.e. bank deposits at sight) will be limited to 20% of the Sub-Fund's net assets.

Up to 100% of the SB Blockchain Technology Sub-Fund's net assets may be invested in short-term negotiable debt securities, money market instruments, time deposits and/or money market funds, under very specific market conditions such as the 2008 Lehman Brothers bankruptcy, understanding these investments will comply with all applicable investment restrictions in terms of eligibility and legal and/or specific risk diversification.

In addition, the Sub-Fund may also use, for the purpose of investments, efficient portfolio management and proxy hedging, techniques and instruments.

The Sub-Fund may invest, directly and/or indirectly through other UCITS or UCIs, up to 10% of its net assets in equities and/or debt securities issued by issuers domiciled in or having an exposure to China.

For full investment objectives and policy details please refer to the Prospectus and the Prospectus Supplement.

**Benchmark** The Sub-Fund is actively managed without reference to any benchmark.

**Redemption and Dealing** Investors may purchase or sell shares of the Sub-Fund on any business day in Luxembourg.

**Distribution Policy** Any income generated by the Sub-Fund is reinvested to grow the value of the shares.

**Launch date** The Sub-Fund was launched on 26/04/2011 and the share class was launched on 29/08/2011.

**Fund Currency** The base currency of the Sub-Fund is EUR.

**Conversion of units/shares** Shareholders are allowed to request the conversion of all or part of their shares into shares of another class/sub-fund subject to the conditions and fees detailed in the prospectus of the Fund.

## What are the risks and what could I get in return?

### Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

### Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between 30 December 2017 and 30 December 2022.

**Moderate:** this type of scenario occurred for an investment between 31 December 2015 and 31 December 2020.

## What happens if Compass Asset Management S.A. is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the Sub-Fund to pay you.

**Be aware of currency risk.** In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://funds.waystone.com/public>.

- 10,000 EUR is invested.
